NEW QUESTION: 1

In the process of cross-line detection, which feature value of the moving object does not need to be obtained?

- A. Exercise time
- B. Movement direction
- C. Movement trends
- D. Movement speed

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 2

The "Floating IP" set when installing the IVS 3800 to manage the master node is the IP address used when logging in to the CSP OM Portal.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 3

Which of the following descriptions about indoor monitoring selection is correct?

- A. The hemispherical ceiling installation has poor aesthetics
- B. Indoor dome cameras generally adopt vertical pole installation
- C. Indoor monitoring cannot use tube cameras or bolt cameras
- D. Under normal circumstances, the resolution of the selected dome camera is 1920+1080

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 4

IVS3800 server comprising lmer_Service , Outer_Service , Immer_OM , Outer_OM and Mgmt this . 5 network planes.

Which statement about lgmt is wrong?

- A. The network plane represents the server management network port
- B. Engineers can access the iBMC interface of the server through the network plane
- C. Engineers can access the virtual console of the server through the network plane to install CSP
- D. Engineers can access the CSP OM Portal interface of the server through the network plane

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 5

In daily maintenance work, which of the following operations can be used to check the quality of the video picture?

- A. Set up a video quality diagnosis plan
- B. Collect fault information
- C. Set cruise plan
- D. Collect system logs

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 6

Software-defined camera SDC "defines security cameras in the intelligent era with professional AI cores, open operating systems, and rich ecosystems."

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 7

In order to ensure the night shooting effect, the camera must be equipped with an external white light fill light.

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 8

IVS3800 improves the reliability of data through the backup function. Which of the following statement about backups is wrong?

- A. Backup source server and destination server can be in the same cluster
- B. Support for backing up videos and pictures to parallel domains and superior domains
- C. Real-time backup is to back up the real-time video of the camera and the metadata obtained by analysis

D. Historical backup is to back up the historical data of the camera

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 9

You can view () alarms and () alarms through the CSPOM portal interface, and handle the alarm information according to the corresponding alarm suggestions.

A. History: current

B. History: Activities

C. History: Equipment

D. Equipment: Activities

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 10

Which statement about electronic shutter is correct?

A. The higher the shutter value, the lower the brightness, which is suitable for capturing high-speed moving objects

B. The lower the shutter value, the lower the brightness, which is suitable for capturing high-speed moving objects

C. The lower the shutter value, the higher the brightness, which is suitable for capturing high-speed moving objects

D. The higher the shutter value, the higher the brightness, which is suitable for capturing high-speed moving objects

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 11

About IVS 3800 description and analysis platform monitoring platform system, which of the following is incorrect?

A. One monitoring platform can only be connected to one analysis platform, but one analysis platform can be connected to multiple monitoring platforms

B. The monitoring platform refers to the image management service, which is mainly responsible for the access, storage and forwarding of the view

C. IVS3800F contains both a monitoring platform and an analysis platform

D. Analysis platform refers to image analysis service and image retrieval service, mainly responsible for the processing of intelligent business

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 12

Which of the following systems is used to connect the data cascade interface of the visual library?

A. The upper and lower video sharing platforms are interconnected, and the video image database system of the video private network is interconnected with the video image database system of the public security information network.

B. The upper and lower levels of video image database systems are interconnected, and the video private network video sharing platform is interconnected with the public security information network video sharing platform

C. The interconnection of the video image database system of the upper and lower levels, the interconnection of the video image database system of the video private network and the video image database system of the public security information network

D. Interconnection of the upper and lower video sharing platforms, the video sharing platform of the private network and the video sharing platform of the public security information network

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 13

PowerCube 500 function module and lithium battery module communicate through () interface.

A. POE+ interface

B. COM_CAN interface

C. RS485 interface

D. PoE interface

Answer: **B** [\(LEAVE A REPLY\)](#)

NEW QUESTION: 14

Single selection If you need to uniformly manage the access platform and analysis platform in the HoloSens iClient, you need to configure the access platform correlation analysis platform in the CsP OM portal where the access platform is located

A. False

B. True

Answer: **A** [\(LEAVE A REPLY\)](#)

NEW QUESTION: 15

Which of the following types of video storage does the IVS3800S support? (Multiple choice)

A. Alarm recording of server configuration

B. Real-time recording manually opened by the server

C. Real-time recording manually opened locally by the camera

D. Alarm recording of the local configuration of the camera

Answer: **A,B,D** [\(LEAVE A REPLY\)](#)

NEW QUESTION: 16

When the CSP after the installation is complete, the virtual console in the need to disconnect the disc image, and iBMC on interface " boot media is valid " is set to " permanent ", " boot media " modify " hard "

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

Valid H12-521_V1.0-ENU Dumps shared by TrainingDump.com for Helping Passing H12-521_V1.0-ENU Exam! NEW QUESTION: 17

In the planning and design of IVS3800, the specific server model and quantity are determined according to business needs. Which of the following options are the main factors affecting the number of servers? (Multiple choice)

A. The amount of structured and characteristic value data

B. Number of AI accelerator cards

C. Number of RAID card

D. Number of hard drives

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 18

When setting up a picture backup plan, check " All " in the " Backup Type " to indicate:

A. The platform will back up all captured targets or license plate thumbnails and structured data stored on the source server

B. The platform will back up all captured live panoramas and structured data stored on the source server

C. The platform will back up all captured live panoramas, target or license plate thumbnails and structured data stored on the source server

D. The platform will back up all captured live panoramas and small images of the target or license plate stored on the source server

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 19

Which of the following is an image analysis service?

- A. View access
- B. Vehicle search
- C. View forwarding
- D. License plate recognition

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 20

The video big data system can aggregate and store all kinds of video data (vehicles, faces, portraits, etc.) and perform standardized processing.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 21

Which of the following descriptions about the relevant parameters of face recognition camera selection is correct?

- A. The camera's face capture rate has no direct relationship with the final face recognition accuracy rate
- B. Face recognition cameras have high performance requirements and low installation requirements
- C. The lower the camera installation height, the better the face capture effect
- D. The installation and debugging effect of the face recognition camera will not affect the face capture rate

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 22

After the camera performs the restoration of the default configuration, all the parameters except () are restored to the factory configuration, which should be used with caution.

(Multiple choice)

- A. Focus position of hemisphere and tube machine in manual and semi-automatic mode
- B. User upload certificate
- C. Device IP
- D. Device port

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 23

Huawei HoloSens IVS1800 stand-alone deployment network, what is the largest camera access scale?

- A. 16
- B. 32
- C. 64

D. 8

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 24

When setting the camera live patrol, it is necessary to ensure that the number of patrol windows is less than the number of patrol cameras.

A. False

B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 25

How many levels of collaboration can the upper and lower domain resource collaboration support?

A. 3

B. 1

C. 2

D. 4

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 26

The standard technology of the video site includes requirements for wind resistance, lightning protection and grounding, anti-corrosion, anti-collision, and anti-corrosion.

A. True

B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 27

The central cloud platform uses hierarchical storage technology, which is characterized by combining storage media (HDD, SSD) to store the most frequently used and most intensive data (such as high-frequency access snapshots) on high-performance disks. The historical data (such as historical video) with reduced access frequency is transferred to a storage medium with a larger capacity and a lower cost.

A. True

B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 28

Which of the following situations will cause the alarm indicator of the lithium battery module to show red and stay on?

A. There is a problem with the communication cable of the lithium battery module

B. Lithium battery module has emergency or major alarm

- C. There is a problem with the power input of the lithium battery module
- D. Internal failure of lithium battery module

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 29

When creating an inter-domain intelligent analysis task on the intelligent vision platform, which of the following descriptions is wrong?

- A. Or the intelligent analysis task also supports the extremely fast analysis function, so you need to check it when configuring
- B. If you need to create a fortification task for the camera in the future, the fortification domain (that is, the execution domain of the fortification) needs to be consistent with the execution of the intelligent analysis task
- C. Inter-domain intelligent analysis tasks are the same as local intelligent analysis tasks, and also support intelligent analysis of targets and vehicles
- D. Select " Owned Domain " when selecting the execution domain. If the selected camera belongs to this domain, the intelligent analysis task will be executed in this domain, and if the selected camera belongs to the lower domain, the subordinate domain will execute the intelligent analysis task.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 30

If the RAID failure and writable function is enabled when configuring the RAID group of the IVS3800, what effect will happen when multiple hard drives fail? (Multiple choice)

- A. When multiple hard disks fail, the level of the RAID group is downgraded from RAID5 to RAID0. If the hard disk fails again, the data cannot be recovered
- B. When multiple hard drives fail, the RAID group level is downgraded from RAID5 to RAID0, and the system can still write data to the hard drives, but the previous data will be lost
- C. When multiple hard disks fail, the level of the RAID group is downgraded from RAID5 to RAID0, the system can still write data to the hard disk and the previous data will not be lost
- D. When multiple hard disks fail, after the RAID group level is downgraded from RAID5 to RAID0, if the hard disk fails again, the data will continue to be restored

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 31

In order to prevent light reflections, the strobe lights for bayonet cameras are usually installed crosswise, and the strobe lights must be at least 2 meters away from the high camera.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

Valid H12-521_V1.0-ENU Dumps shared by TrainingDump.com for Helping Passing H12-521_V1.0-ENU Exam! (62 Q&As Dumps, **40%OFF** Special Discount: **Exam-Tests**)

NEW QUESTION: 32

Which of the following options is not included in the routine check performed on HoloSens iClient?

- A. Check the integrity of the video
- B. Check the statistical status of human faces and vehicle snapshots
- C. Check that the camera is online
- D. Check the running status of the cluster

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 33

The electric zoom camera cannot adjust the focal length and focus on the camera Teb preview page.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 34

The core of the license plate recognition technology is the segmentation of license plate characters. Which of the following technologies cannot be used to segment the license plate characters?

- A. Vertical projection
- B. Key point detection
- C. Grayscale processing
- D. Binary processing

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 35

What can effectively compensate for the dark defect of the main body of the picture when the camera is shooting in a backlight environment.

- A. Backlight compensation

- B. Noise reduction
- C. White balance
- D. Strong light suppression

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 36

The Huawei video platform widely supports the ARM architecture. What are the characteristics of the ARM architecture?

- A. Using the ARM architecture, the same functional performance occupies a small chip area, low power consumption, higher integration, and more hardware CPU cores have better concurrent performance
- B. flat with RISC instruction set length of a national, flexible, and simple addressing modes, high efficiency
- C. It is a new entrant in the field of data center and its ecology is still in a stage of rapid development
- D. Many registers are used most of the data operations are completed in the registers, the instruction execution speed is faster

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 37

POE+ adopts IEEE802.3bt standard, and its output power consumption does not exceed ().

- A. 15.4W
- B. 90W
- C. 30W
- D. 50W

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 38

About Huawei HoloSens IVS1800. Which of the following descriptions is correct? (Multiple choice)

- A. The HDNI interface of IVS1800 is used for HDNI video output and supports dual HDMI heterogeneous output. HDM 1, 4 interface output resolution supports up to 1080P: HDNI2.0 interface output resolution supports up to 4K
- B. IVS1800 adopts Safevideo+ technology, when RAID5 fails. The remaining disk data is 100% readable and writable, ensuring the availability of business data
- C. The USB interface of IVS1800 can be used to connect a U disk, connect a USB mouse, and connect a mobile hard disk
- D. IVS1800 has 8 disks. RAID and RATD1

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 39

200 channels of cameras are stored for 1 day according to 1080P4Mbps stream, and the storage space occupied by recording is about () TB.

- A. 12
- B. 6
- C. 10
- D. 8

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 40

Regarding Huawei's camera access function, which of the following statements is wrong?

- A. The platform can automatically discover cameras through ONVIF protocol
- B. Support batch configuration
- C. Support camera dynamic template access
- D. The camera must be configured online

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 41

For the routine inspection of CSP, which of the following parts are mainly included?

(Multiple choice)

- A. Check the status of the license
- B. View the running status of the cluster
- C. View the running status of CSP and container
- D. Check CPU and memory usage status

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 42

If it is found on the intelligent vision platform that the camera to be subscribed is performing an intelligent analysis task, continue to click "Subscribe", and the intelligent analysis task of the camera will be interrupted.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 43

The lens surface is not clean, or the presence of water stains, dust, etc. may cause which of the following failures?

- A. The picture is dark or bright
- B. The overall image noise is too much, resulting in unclear image lines
- C. There is an unclear situation in the monitoring interview
- D. Fuzzy screen appears on the live screen

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 44

Huawei's integrated site provides power supply, energy storage, and photovoltaic modules for video sites, which can be adapted to various power supply scenarios such as pure mains, pure light, and optical hybrid.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 45

In the process of video summarization, it is necessary to splice the target track set and the background image into frames, and then combine the frames into a video.

A. False

B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 46

Commonly used camera access protocols include ONVIF, SDK, GB/T28181, etc.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 47

Huawei HoloSens IVS1800 multi-machine deployment network, what is the largest camera access scale?

A. 256

B. 64

C. 32

D. 128

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 48

Which statement about intrusion detection is correct?

- A. Detect whether there are intrusions from outsiders in the designated area
- B. Detect whether there is a target running higher than the set speed value in the designated area
- C. Detect whether there is a target staying or wandering in the designated area
- D. Count the number of people who passed in the designated area

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 49

If a pedestrian is facing a strong light source such as sunlight or fill light, it may cause the face to be overexposed and cause the face to turn white. Which of the following solutions can be used? (Multiple choice)

- A. High resolution
- B. Lower the exposure compensation value
- C. Dynamic bit rate
- D. Reduce contrast

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 50

A pan/tilt vibration camera is installed in a certain place, and the key position monitoring can be realized by setting ().

- A. Balance
- B. Cruise
- C. Round robin
- D. Preset position

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 51

Which of the following is not a prerequisite for the intelligent vision platform to perform target capture statistics?

- A. A target fortification mission has been created for the camera on the platform
- B. Have subscribed to the face metadata generated by the smart camera on the platform
- C. Target recognition intelligent analysis task has been created for the camera on the platform
- D. The target recognition algorithm plug-in has been installed on the platform

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 52

Through which of the following features, IVS3800 provides flexible computing resources and intelligent task scheduling and management capabilities?

- A. Speed analysis
- B. Behavior analysis
- C. Tide scheduling
- D. Cluster management

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 53

The environmental inspection of the intelligent vision platform is mainly computer room inspection. Which of the following general inspection and maintenance items include? (Multiple Choice)

- A. Dustproof state
- B. Cabinet power supply
- C. Fire status
- D. Working temperature and humidity in the computer room

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 54

In the light edge second-level networking scenario, if the second-level domain adopts Huawei HoloSens IVS3800, what forms can the first-level domain adopt? (Multiple choice)

- A. All of the above
- B. Huawei HoloSens IVS9000
- C. Huawei HoloSens IVS1800
- D. Huawei HoloSens IVS3800

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 55

Manual zoom camera, you can adjust the N-F knob to (), adjust a T knob to ().

- A. Adjust focus, adjust focus
- B. Adjust focus, adjust focus
- C. Adjust the focus, adjust the focus
- D. Adjust the focus, adjust the focus

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 56

The function of the camera gimbal is to adjust the tilt angle and re-straight angle of the camera.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 57

What type of recordings can be backed up by the smart vision platform?

- A.** It can back up the manual and scheduled recordings that have been generated on the server, and can also back up the manual or scheduled recordings stored in the camera
- B.** Only the manual and scheduled recordings that have been generated on the server can be backed up. The manual or scheduled recordings stored in the camera cannot be backed up.
- C.** Only the scheduled recordings that have been generated on the server can be backed up
- D.** Only the manual recordings that have been generated on the server can be backed up

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 58

The power supply mode of the camera only supports the power supply mode of the power cord.

- A.** False
- B.** True

Answer: **A** ([LEAVE A REPLY](#))

NEW QUESTION: 59

Which of the following descriptions of the design concept of Huawei HoloSens SDC os is correct? (Multiple choice)

- A.** Security and Trusted Architecture
- B.** Centralized control management method
- C.** Lightweight microservice architecture
- D.** Hierarchical decoupling design

Answer: **A,C,D** ([LEAVE A REPLY](#))

NEW QUESTION: 60

Upon completion of tasks across platforms / resources / after data collaboration configuration, which can be made of the following? (Multiple choice)

- A.** Create an inter-domain search task
- B.** Create inter-domain fortification missions
- C.** Subscribe to inter-domain data
- D.** Create inter-domain intelligent analysis tasks

Answer: **A,B,C,D** ([LEAVE A REPLY](#))

NEW QUESTION: 61

Which of the following RAID modes are supported by the IVS1800 business data disk? (Multiple choice)

- A.** NON-RAID
- B.** RAID 1

C. RAID 6

D. RAID 5

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 62

Which of the following product forms of IVS3800 need to build RAID5 and RAID1 when configuring data disk RAID? (Multiple Choice)

A. IVS3800R V2

B. IVS3800C V2

C. IVS3800F V2

D. IVS3800S V2

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 63

Through statistical analysis of the time and frequency of the target person's appearance in a specific area, the person's residence, activity trajectory, companions and other information can be analyzed.

A. False

B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 64

Single selection in the scenario where a single IVS1800 local man- machine is deployed, basic service configuration can be completed through the display, mouse, keyboard and other equipment

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 65

The chip of the intelligent vision platform widely uses the ARM architecture. ARM is characterized by a multi-core architecture and a simplified instruction set, but it is not as good as the x86 architecture in terms of achieving computational efficiency optimization.

A. False

B. True

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 66

Which of the following conditions is not a requirement for the installation environment of intelligent traffic surveillance cameras?

A. Try to avoid any liquid that can flow into the inside of the equipment

B. Try to avoid installing near objects with strong reflective characteristics such as glass, floor tiles, water surfaces, leaves, road signs, billboards, etc.

C. Try to install on both sides of the road to get the best view

D. ambient brightness needs 701ux to 9001ux between

Answer: [C \(LEAVE A REPLY\)](#)

NEW QUESTION: 67

The camera installation process generally includes the following steps: 1. Confirm the installation environment; 2. Install the built-in accessories of the camera; 3. Install the supporting bracket of the camera; 4. Install the camera; 5. Verify the result.

The correct installation step is ().

A. 1-2-3-4-5

B. 1-4-2-3-5

C. 1-3-2-4-5

D. 1-2-4-3-5

Answer: [A \(LEAVE A REPLY\)](#)

NEW QUESTION: 68

() refers to the detection of whether the flow of people in the designated area exceeds the set threshold, and when the threshold is exceeded, an alarm is generated.

A. Regional population statistics

B. Population density testing

C. Cross-line statistics

D. Queuing statistics

Answer: [B \(LEAVE A REPLY\)](#)

NEW QUESTION: 69

In the problem of capturing images of the following target, which cannot be optimized by adjusting the parameters, which installation position must be changed?

A. Motion blur

- B. Shun light target overexposed
- C. The image of the backlit target is dark
- D. Yin and Yang face

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 70

Which of the following is not a part of the view library standard GA/T1400?

- A. Teaching database technical requirements
- B. Application platform technical requirements
- C. Video networking technical requirements
- D. General technical requirements

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 71

When configuring the front-end camera to connect to the platform, different access methods are used in different scenarios. Regarding the choice of camera access method, which of the following statements is correct? (Multiple choice)

- A. ADVR, DVS or NVR only supports analog camera access, so you need to add analog cameras to the platform by adding DVR/DVS/NVR
- B. When a small number of cameras are added and they are to be connected to the IVS platform, they can be added in a single way
- C. When the user only knows the IP address segment, and there are a large number of online cameras that need to be connected to the IS platform, they can be quickly added by manual batch addition
- D. When users have planned specific IP addresses for a large number of cameras, and want to connect them to the platform, they can add them in batches automatically

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 72

If the rod is deformed, it needs to be () in time; if the rod is tilted, it needs to be () in time.

- A. Replace the foundation; adjust the rods
- B. Adjust the foundation; adjust the foundation
- C. Replace the rods; adjust the foundation
- D. Replace the rods, replace the rods

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 73

Front-end intelligence refers to that the smart vision platform subscribes to the metadata of the front-end smart camera for analysis, retrieval and fortification. The front-end intelligence is used to reduce the analysis pressure of the platform itself.

- A. False

B. True

Answer: (SHOW ANSWER)

NEW QUESTION: 74

The IVS3800 server is based on the AI accelerator card to achieve business analysis and retrieval acceleration.

A. True

B. False

Answer: A (LEAVE A REPLY)

NEW QUESTION: 75

A certain urban area needs to deploy a batch of video sites for road monitoring, face recognition, vehicle management, etc. Regarding the selection of rods and network equipment for video sites, which of the following selections meet the requirements? (Multiple choice)

A. Use the old monitoring poles and router access

B. Vehicle bayonet rod GPON

C. Face recognition rods, switch access

D. Use the old traffic station rods and switch access

Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 76

In the process of installing CSP, when "install Mode" is selected as "Include CsP "other Node"", which node is currently being installed?

A. Stand-alone deployment

B. Manage the master node

C. Manage slave nodes

D. Business node

Answer: C (LEAVE A REPLY)

Valid H12-521_V1.0-ENU Dumps shared by TrainingDump.com for Helping Passing H12-521_V1.0-ENU Exam! NEW QUESTION: 77

In the light edge three-level networking scenario, if the first-level domain adopts Huawei HoloSens IVS3800, what forms can the second-level domain adopt?

- A. Huawei HoloSens IVS3800
- B. Huawei HoloSens IVS1800
- C. Huawei HoloSens IVS9000
- D. All of the above

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 78

Equipment upgrade operations include: (Multiple Choice)

- A. Software version upgrade
- B. Restore the factory
- C. Load license
- D. Algorithm package upgrade

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 79

Regarding the face deployment control operation of the intelligent vision platform, which of the following statements is wrong?

- A. After a face control alarm occurs, you can view the live and video playback to obtain more information when the control alarm occurs
- B. If the face control task is set, there is no need to open the intelligent analysis task of face recognition on the platform
- C. After the face control alarm occurs, you can view the corresponding alarm result on ic1ient
- D. When controlling the face, you need to upload the picture of the specific person to the platform or select the object to be controlled from the list library

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 80

When checking the power supply of the camera, for the ball camera without power supply instructions, you can judge whether the power supply of the camera is normal by checking whether it can automatically rotate after power-on.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 81

If you want the intelligent vision platform to have functions such as target intelligent analysis and vehicle intelligent analysis, the administrator needs to load intelligent algorithms in advance. Among them, the Cs algorithm package is used to analyze videos

or pictures and perform feature value extraction; while the VA type algorithm package is used for functions such as search for pictures and fortifications.

A. False

B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 82

The installation requirements of the target recognition camera include (). (Multiple Choice)

A. Width during irradiation

B. High irradiation distance

C. Erection height

D. Overlooking height

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 83

In the process of installing IVS applications, which of the following materials are needed? (Multiple choice)

A. Json file

B. Process documents

C. VS3000 application software package

D. CSP installation image package

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 84

Which of the following descriptions about the view gallery application platform is correct?

A. The video gallery application platform does not support user management

B. All of the above options are correct

C. During data retrieval, the platform supports online retrieval across multi-level visual galleries

D. Since the upper and lower units of the visual library system are cascaded, the application platforms of different levels are exactly the same

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 85

After the micro-mount camera is installed, the still objects in the picture are clear and the moving objects are blurred. Which of the following measures can solve the problem?

A. Increase saturation

B. Lower the shutter limit value

C. Increase airspace noise reduction parameters

D. Improve sharpness

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 86

Huawei HoloSens IVS1800 stand-alone deployment network, what is the largest camera access scale?

- A. 64 way
- B. 8 way
- C. 32 way
- D. 16 way

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 87

In the license plate recognition, the binarized license plate image is horizontally projected to the Y axis, and the longest continuous projection segment is obtained as the character area, and the continuous black lines in the horizontal direction are filtered out.

What is this method called?

- A. Vertical projection
- B. Directional segmentation
- C. Horizontal projection
- D. Binary processing

Answer: C [\(LEAVE A REPLY\)](#)

NEW QUESTION: 88

Regarding the central platform equipment, which of the following description is wrong? (Multiple Choice)

- A. OceanStor 5500 V5 is used to deploy HUAWEI CLOUD Stack to provide computing resources (such as memory, network card, etc.) for users to create virtual machines on physical servers as upper-layer services (CSP, IVS)
- B. Universal server 2288H v5 provides system disk and data disk resources for management plane and business plane virtual machines
- C. oceanStor 9000 stores video and image data for the business layer
- D. FusionServer G5500 GPU hardware physical resources, providing GPU acceleration and hard decoding capabilities for business layer virtual machines

Answer: A,B [\(LEAVE A REPLY\)](#)

NEW QUESTION: 89

During the capturing process of the target capture camera, the moving object moves too fast and the target capture is blurred. The focus can be adjusted to enhance the clarity of the capture.

- A. True
- B. False

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 90

Regarding the light edge logic network architecture, which of the following description is wrong? (Multiple Choice)

- A. Outer-OM is an internal management plane that provides signaling interaction between OM modules within the system
- B. Outer_Service is an external business plane, providing business application interface access or external business data interaction
- C. Inner_Service is the internal business plane, which provides signaling interaction between the internal business modules of the system
- D. Inner-OM is an external management plane that provides CSP OM Portal interface access and operating system SSH access: at the same time, it can also provide video network connection and algorithm warehouse connection according to business needs

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 91

In sunny weather, the pictures captured by the camera appear white, which of the following methods cannot solve the problem?

- A. Reduce exposure compensation coefficient
- B. Turn on the fog mode
- C. Reduce saturation
- D. transfer large Gamma strength

Answer: C ([LEAVE A REPLY](#))

(62 Q&As Dumps, **40%OFF** Special Discount: **Exam-Tests**)

NEW QUESTION: 92

By supporting the use of PowerCube 500 and the intelligent network management system, fault alarms and real-time monitoring data can be reported to the upper-level network management.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 93

What are the improvements of H.265 protocol compared to H.264 protocol? (Multiple Choice)

- A. Higher definition
- B. Lower bandwidth
- C. Higher compression rate
- D. Lower computational load

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 94

Which of the following scenarios are suitable for installing target recognition cameras? (Multiple Choice)

- A. Security check channel
- B. Park area, large population
- C. Indoor corridors with sufficient light
- D. Subway turnstile

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 95

Which of the following is not a necessary condition for high-density face capture?

- A. Large memory
- B. High computing power chip
- C. Excellent face detection algorithm
- D. High frequency exposure

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 96

Resource collaboration means that when the analysis resources of the upper-level domain IVS platform are tight, according to the business scenario, you can apply for the analysis resources of the lower-level domain or cross-level domain to perform intelligent analysis tasks based on video files.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 97

When checking the license operating status of the intelligent vision platform, what needs to be focused on is whether the license status is activated and the license utilization rate.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 98

Which of the following are high-definition resolutions? (Multiple choice)

- A. 4CIF
- B. C270P
- C. 1080P
- D. 720P

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 99

The PowerCube500 alarm indicator flashes yellow slowly, indicating:

- A. The module has an internal fault and cannot be recovered
- B. The module has an external fault and can be recovered
- C. The module has no power input or malfunction
- D. The module has an alarm and can be recovered

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 100

Which one of the following configurations can solve the problem of blurring or jamming of the live screen? (Multiple choice)

- A. Modify the protocol parameter to TCP on the camera web page
- B. Modify the stream type as the main stream on the camera web page
- C. Modify the protocol parameter to UDP on the camera web page
- D. Change the stream type to the auxiliary stream on the camera web page

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 101

IVS3800 realizes the unified management of the algorithm plug-in of the whole network through the algorithm coordination feature, and ensures the consistency of the intelligent analysis data of the whole network.

Which of the following are not part of the algorithmic synergy?

- A. When the analysis resources of the upper-level domain IVS platform are tight, according to the business scenario, you can apply for the analysis resources of the lower-level domain or cross-level domain to perform intelligent analysis tasks based on video files.
- B. The upper-level algorithm warehouse can view the intelligent algorithm status of the entire network and manage the algorithm plug-ins of the entire network.
- C. The lower-level algorithm warehouse can obtain a unified and credible algorithm software version from the upper-level algorithm warehouse

D. The upper-level algorithm warehouse can control the maximum download bandwidth and the maximum number of concurrent downloads when downloading algorithms from the lower-level algorithm warehouse

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 102

Ball cameras can be powered by PoE.

A. False

B. True

Answer: **A** ([LEAVE A REPLY](#))

NEW QUESTION: 103

When performing facial image retrieval tasks on the intelligent vision platform, it can only be performed through the "Face Retrieval" interface. It is not possible to directly intercept and search for faces during the video preview.

A. False

B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 104

Huawei SDC os in the APP manager responsible for smart APP install, activate, monitor, upgrade, but 12-521 intelligent party APP management.

A. False

B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 105

IVS3800 uses SafeVideo+ technology to ensure safe and reliable video recording.

Which statement about SafeVideo+ is correct? (Multiple choice)

A. Use file storage to organize and present data in a hierarchical structure of files and folders

B. When there are multiple RAID groups, support for migrating services to other normal operating RAID groups after the RAID group fails

C. When RAID5 when there are multiple hard drive failures, as long as RAID5 also hard running, the VS3800 can view the video, but cannot continue to store video

D. Use intelligent load balancing algorithm to comprehensively consider RAID group capacity, media traffic and other factors to realize automatic load sharing between RAID groups

Answer: **B,D** ([LEAVE A REPLY](#))

NEW QUESTION: 106

Which of the following functions can be achieved by two platforms interconnected by the GB/T28181 protocol?

- A. Add external cameras
- B. Support the equipment shared from the external domain to configure the recording plan in the local domain
- C. View the live screen of the other party's domain
- D. Delete foreign domain users

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 107

On the CS POM Porta1 resource monitoring interface, you can view the running status of nodes and containers.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 108

It is necessary to add some video sites to the urban roads, and the wired transmission pipelines have already covered this area. Considering the project cost and construction difficulty, which network access method is appropriate? (Multiple choice)

- A. GPON wired access
- B. Ethernet wired access
- C. LTE wireless access
- D. Microwave wireless access

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 109

When the "Service Center and Service Communication Failure" alarm appears on the CSP interface, you will not be able to watch the video playback of the camera on the HoloSens iClient.

- A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 110

If the engineer forgets to enable the " Bayonet Data Storage " and " Metadata Subscription " functions on the HoloSens iClient when configuring the front-end intelligent functions of a certain vehicle recognition camera.

So what are the consequences?

- A.** The camera cannot be recorded on iClient
- B.** Cannot configure intelligent analysis task for this camera on iClient
- C.** Cannot see the live status of the camera on iClient
- D.** When performing vehicle bayonet data detection, the data from the front-end camera cannot be found

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 111

Which of the following are the development trends of data centers? (Multiple choice)

- A.** Resource cloudification
- B.** Business automation
- C.** Intelligent hardware system
- D.** Modular components

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 112

Which of the following are included in the low-level design (LLD) of the video site? (Multiple Choice)

- A.** Site configuration BOQ
- B.** Universal design
- C.** Site configuration checklist
- D.** Site layout design
- E.** Site investigation report

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 113

Regardless of whether the product selected for the intelligent vision platform is IVS3800 or IVS1800, before performing platform intelligent behavior analysis. All need engineers to install and configure the corresponding algorithm plug-in.

- A.** False
- B.** True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 114

When installing the Light Edge IVS3800, some verification tools are required to verify the integrity of the installation package and algorithm package to prevent the package from being maliciously tampered with during delivery or storage.

- A. True
- B. False

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 115

The functions of Power Cube 500 include (). (Multiple choice)

- A. Provide a transmission network for the camera body
- B. Real-time monitoring data
- C. Fault alarm
- D. Powering the camera

Answer: A,C,D [\(LEAVE A REPLY\)](#)

NEW QUESTION: 116

Regarding Huawei HoloSens IVS3800F, which of the following descriptions is correct? (Multiple choice)

- A. The NVMe disk of IVS3800F is for storing the feature value data
- B. IVS3800F only provides people/vehicle feature analysis and extraction, behavior analysis, video summary, and video search functions
- C. The RAID level of the IVS3800F data disk is RAID5, and SafeVideo+ is used for data protection
- D. The SSD data disks of IVS3800F is for storing structured data

Answer: A,C,D [\(LEAVE A REPLY\)](#)

NEW QUESTION: 117

IVS3800 realizes the unified management of the algorithm plug-ins of the whole network through the algorithm coordination feature, and ensures the consistency of the intelligent analysis data of the whole network. Which of the following are not part of the algorithmic synergy?

- A. The upper-level algorithm warehouse can control the maximum download bandwidth and the maximum number of concurrent downloads when the lower-level algorithm warehouse downloads the algorithm
- B. The upper-level algorithm warehouse can view the intelligent algorithm status of the entire network, and unified management of the entire network algorithm plug-in
- C. The lower-level algorithm warehouse can obtain a unified and credible algorithm software version from the upper-level algorithm warehouse

D. When the analysis resources of the upper-level domain IVS platform are tight, according to the business scenario, you can apply for the analysis resources of the lower-level domain or cross-level domain to perform intelligent analysis tasks based on video files.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 118

The distribution rate of a camera is 1080P, the code rate is 4Mbps, it needs to be stored for 30 days, and it needs storage space of ().

A. 2.15T

B. 1.85T

C. 0.75T

D. 1.25T

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 119

What are the functions of PowerCube 500? (Multiple choice)

A. Fault alarm

B. Powering the camera

C. Provide a transmission network for the camera body

D. Real-time monitoring data

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 120

Regarding the replacement of parts, which of the following descriptions is correct? (Multiple Choice)

A. The process of removing the functional module. Record the cable connection position of the functional module - use a flat-blade screwdriver to pry off the fastening lock on the quick-plug terminal. Remove the quick-plug terminal - remove the interface cables in turn, and do insulation protection to remove the old functional modules

B. Process of replacing the functional module X Put on protective gloves - disconnect the mains front input circuit breaker of the functional module - remove the old functional module - install the new functional module-close the AC front input circuit breaker of the functional module - take off Gloves

C. The process of removing the lithium battery module. Record the cable connection position of the lithium battery module + use a flat-blade screwdriver to pry off the fastening lock on the quick-plug terminal. Remove the quick-plug terminal - remove the interface cables in turn. And do a good job of insulation protection - remove the old lithium battery module

D. The process of replacing the lithium battery module, wear protective gloves - remove the old lithium battery module H install a new lithium battery module take off the protective gloves

Answer: (SHOW ANSWER)

NEW QUESTION: 121

Which of the following types does cloud-side collaboration include? (Multiple choice)

- A. Resource coordination
- B. Algorithm collaboration
- C. Task coordination
- D. Data collaboration

Answer: A,B,C,D (LEAVE A REPLY)

NEW QUESTION: 122

Which of the following statement about IVS1800 is wrong ?

- A. The iClient client scenario is applicable to multiple IVS1800 scenarios
- B. iClient field is, need to prepare - a PC is used to configure the business
- C. For local man-machine scenarios, a PC needs to be prepared for business configuration
- D. The local airport is suitable for a single IVS1800 scene

Answer: C (LEAVE A REPLY)

NEW QUESTION: 123

The basic construction of the video site includes nine parts: positioning and laying out, excavation of foundation pit, construction materials entering the site, foundation pit bottoming, grounding parts production and grounding, formwork fixing, concrete construction, exit maintenance, and muck backfilling.

- A. True
- B. False

Answer: A (LEAVE A REPLY)

NEW QUESTION: 124

Huawei HoloSens IVS3800 networking mode includes ().

- A. Multi-level and multi-domain networking
- B. Secondary networking

- C. Three-level networking
- D. Single domain networking

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 125

When the application of IVS3800 is redeployed, the ESN of the server will change, but the license does not need to be re-applied.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 126

Fault information is an important basis for fault handling. Collect as much original fault information as possible, such as log information, networking information, etc. This information can speed up the locating speed of the cause of the fault and improve the accuracy of the locating.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 127

Regarding the connection between Micro Edge and other platforms, which of the following statements is wrong?

- A. IVS1800 supports access to the IVS3800 platform through the T28181 protocol
- B. IVS1800 supports access to the IVS3800 platform through the ONVIF protocol
- C. After IVS1800 is connected to IVS3800, IVS3800 can perform live browsing and video playback operations on the cameras under IVS1800
- D. IVS1800 does not support access to VS3800 as NVR device

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 128

The equipment selection of the video site refers to the selection of (). (Multiple choice)

- A. Camera
- B. Rod
- C. Power supply and distribution equipment
- D. Network transmission equipment

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 129

What are the intelligent analysis functions supported by MCS algorithms? (Multiple choice)

- A. NVN

- B. Fortification
- C. Tagging
- D. Search

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 130

The micro edge is suitable for small surveillance scenarios such as supermarkets, schools, bank business halls, and parks.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 131

Through the "Business Statistics" interface on HoloSens iClient, you can export "Device Online Rate Report" and "Device Offline Rate Report" to analyze the platform's access to cameras.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 132

If a suspected vehicle needs to be intercepted and checked on a certain road section, control measures can be implemented on the vehicle on the video service platform.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 133

The target recognition camera is usually set up at a height of 3.5-5 meters to achieve the maximum coverage.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 134

Which of the following are regarding the smart vision platform equipment? (Multiple Choice)

- A. UPS
- B. Precision air conditioning
- C. Light edge
- D. Micro-edge

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 135

In the hall and other light-sending scenes, the brightness of the human face is too dark, which can be solved by adjusting (). (Multiple choice)

- A. Dynamic bit rate
- B. Wide dynamic
- C. High resolution
- D. Brightness compensation

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 136

Gauss DB is widely used in video cloud platforms. Which of the following descriptions about Gauss DB OLTP are correct? (Multiple choice)

- A. Simple and easy to use
- B. Is a NoSQL database
- C. Safe and reliable
- D. Extreme performance

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 137

What are the commonly used network equipment in data centers? (Multiple choice)

- A. Safety equipment
- B. Aggregation switch
- C. Access switch
- D. Core switch

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 138

The points of face recognition include both indoor scenes and outdoor scenes.

- A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 139

Video structuring can extract feature information such as the type, brand, and color of the vehicle target in the video.

A. True

B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 140

When configuring image backup on the IVS3800 platform, you need to configure the clone camera first.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 141

In the pre-installation scenario of IVS3800, which of the following steps is not required?

A. Install server and switch hardware

B. Install CSP and IVS applications

C. Configure the switch network

D. Design LLD

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 142

When the bayonet camera is used in conjunction with the radar, the distance for the radar speed measurement to capture is 15m-30m.

A. False

B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 143

Log in to the camera's web interface. Which of the following is the reason for the "live request failed" message when requesting live streaming?

A. The currently requested stream does not support live streaming

B. When the local operating system is Windows 7/8/10 operating system, the browser is not run as an administrator

C. The playback control is not installed normally or is forbidden to run

D. There is a problem with the browser settings

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 144

Which two types of domains does Huawei Nss protocol use for docking?

- A. Both are Huawei platforms
- B. Both are third-party platforms
- C. Any platform is fine
- D. Huawei platform and third-party platform

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 145

A park intends to add a dome camera to the existing integrated video site, which uses PoE to supply power. Which interface of PowerCube 500 should be accessed?

- A. PoE++ interface
- B. DC48V
- C. DC12V
- D. AC24V

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 146

The maintenance inspection table of the intelligent vision system can be divided into inspection categories according to the two dimensions of date and business scope.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 147

Which of the following descriptions about the selection of vehicle recognition cameras in the entrance and exit scenarios of the park is correct?

- A. The greater the detection distance, the better
- B. camera best resolution in 1920 * 1080 or less
- C. Covered lanes are greater than 2 lanes
- D. The installation height is best not higher than 1.5m

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 148

SDC os is based on the characteristics of the container, ensuring that the camera can be started normally only after the integrity and legality of the system software package is verified during the startup phase, avoiding the malicious flashing of the outdoor deployment camera, and intruding into the user network.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 149

The WIFI indicator of the Power Cube 500 function module shows a steady red light, indicating that the WIFI function () at this time.

- A.** The WLAN module is not inserted or the inserted WLAN module cannot be recognized
- B.** First access, need to re-function module
- C.** The WLAN module has been identified and can work normally
- D.** WLAN module failure

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 150

Data collaboration meets the needs of cross-regional and cross-system data sharing. Which of the following statements about data collaboration are correct? (Multiple choice)

- A.** Support historical data between subscription domains
- B.** Support data collaboration between peer-level domains
- C.** Back to support data collaboration between upper and lower levels and cross-level domains
- D.** Supports up to three levels of networking

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 151

The internal management plane and business plane of the IVS 3800 system are isolated, and the networking reliability is high. However, which of the following functions is required for the switch?

- A.** Active and standby
- B.** Load sharing
- C.** Static LACP
- D.** Stacking

Answer: C ([LEAVE A REPLY](#))

- D.** Intelligent analysis tasks can be created on the platform, and structured data and characteristic values can be obtained by analysis

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 153

Which of the following are smart vision platform devices? (Multiple Choice)

- A.** UPS
- B.** Micro-edge
- C.** Light edge
- D.** Precision air conditioning

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 154

During video backup between platforms, the configuration server backup download speed is extremely fast, for example, the video is backed up at 1 time, 2 times, 4 times and 8 times the speed of the camera code. Which of the following types supports setting 2 times speed backup? (Multiple choice)

- A.** Manual real-time backup of the server
- B.** Manual recording stored on the server
- C.** The ongoing scheduled real-time backup of the server
- D.** Planned video stored on the server

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 155

Regarding the network requirements for light-edge single-domain networking, which of the following description is wrong?
(Multiple choice)

- A.** 10GE optical port or GE electrical port (connected to service TOR) binding mode in active/standby mode (Band=1)
- B.** 10GE optical port or GE electrical port (the binding mode connected to the service TOR is LACP mode (Band=4)

C. GE electrical port (connected to the management TOR) binding mode in active/standby mode (Band-1)

D. The binding mode of the GE electrical port (connected to the management TOR) is LACP mode (Band=4)

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 156

The function of the lens is similar to that of the human eye. In order to adapt to changes in environmental illuminance, the human eye uses an automatically adjustable iris to control the intensity of light reaching the retina to improve the image quality: while the camera lens uses adjustment () to adjust the arrival of the sensor Light intensity.

A. Field of view

B. Aperture

C. Focal length

D. Light transmittance

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 157

When docking the monitoring platform with the analysis platform, regardless of whether there is a camera connected to the IVS 3800 at this time, the camera synchronization operation needs to be performed.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 158

The user cannot log in to HoloSens iClient or the reason for the lack of smart permissions may be prompted after logging in?

A. User account expired

B. User is locked

C. Network abnormality

D. Permission issues

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 159

As for the routine inspection of CSP, which of the following parts are mainly included? (Multiple choice)

A. View the running status of CSP and container

B. Check the status of the license

C. View the running status of the cluster

D. Check the CPU and memory usage status

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 160

The () function of the ball camera can ensure that the camera automatically returns to the preset position after manual operation.

- A. Caretaker
- B. Cruise
- C. Electronic map
- D. Preset position

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 161

Regarding the description of IVS3800s, which of the following statements is wrong?

- A. Once the server uses the GE electrical port as the service plane, it cannot be modified to a 10GE optical port in the later period.
- B. When the server is configured with a 10GE optical port, be sure to use a 10GE optical port for connection, otherwise the service plane network will be blocked
- C. The GE electrical port of the server can only be used for the management plane, not for the service plane
- D. IVS3800s v2 and support GE electrical port or 10GE optical port for service plane

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 162

Which is the correct description of the SDC OS lightweight microservice governance framework?

- A. The framework is developed based on the Android kernel
