NEW QUESTION: 3

You have a Teams Phone deployment that contains a Session Border Controller (SBC) named SBC1.

You deploy a second SBC named SBC2 that is configured as shown in the following exhibit.

sbc2.contoso.com

You must use the SBC's FQDN that has the host name registered in DNS. For example, if your organization owns **contoso.com** then **sbc.contoso.com** is good name for the SBC, but **sbc.contoso.onmicrosoft.com** isn't. [Learn more](#)

Add a description so you know why it was created

SBC settings

When you are adding this SBC, you can turn on or off the SBC and change settings that are specific to the SBC.

Enabled	☐ Off
SIP signaling port	5067
Send SIP options ⓘ	☒ On
Forward call history	☐ Off
Forward P-Asserted-Identity (PAI) header ⓘ	☐ Off
Concurrent call capacity	24
Failover response codes	408, 503, 504
Failover time (seconds) ⓘ	30
SBC supports PIDF/LO for emergency calls	☐ Off

You discover that SBC2 fails to receive SIP Options packets from Microsoft SIP gateways and you notice that calls take a long time to connect.

Use the drop down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

NOTE: Each correct selection is worth one point.

- A. app permission policy
- B. meeting policy
- C. live events policy
- D. meeting template policy
- E. teams events policy
- F. customization policy

Answer: ([SHOW ANSWER](#))

B: Turn meeting registration on or off

Follow these steps in the Teams admin center to turn meeting registration on or off:

1. Open the Teams admin center.
2. Select Meetings from the navigation pane.
3. Under Meetings, select Meeting Policies.
4. Either select an existing policy or create a new one.
5. Within your chosen policy, navigate to the Meeting scheduling section.
6. Turn Meeting Registration setting On or Off.
7. Select Save

C: Live events policies are used to control who in your organization can hold live events and the features that are available in the events they create. You can use the default policy or create one or more custom live events policies. After you create a custom policy, assign it to a user or groups of users in your organization.

NEW QUESTION: 20

You have a Microsoft Teams deployment.

You plan to schedule the events shown in the following table.

Name	Requirement
Event1	Attendees must register for the event. Anonymous users must be able to register for the event.
Event2	The event must support 2,000 attendees. Anonymous users must NOT be able to join the event. Guest user accounts must be able to join the event.

You need to recommend which type of event access to use for the events.

What should you recommend for each event? To answer, drag the event access types to the correct events. Each event access type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows a Microsoft Teams interface for assigning event access types. On the left, under 'Event access types', there are four options: 'In-org webinar', 'In-org town hall', 'Public webinar', and 'Public town hall'. On the right, under 'Answer Area', there are two empty input fields labeled 'Event1:' and 'Event2:'. A watermark 'dumpsfiles.com' is visible across the center.

Answer:

The screenshot shows the same Microsoft Teams interface as before, but with selections. In the 'Event access types' list, all four options are highlighted with green boxes. In the 'Answer Area', 'Event1:' has 'Public webinar' selected (highlighted with a red box) and 'Event2:' has 'In-org town hall' selected (highlighted with a red box). NEW QUESTION: 37

You have a Microsoft Teams Phone deployment.

You implement Teams Rooms on Windows.

You need to apply a custom theme to the display of Team1 Rooms on Windows.

What should you configure?

- A. a configuration profile
- B. a SkvDeSettinias.xml file
- C. a team template
- D. a LayoutModification.xml file

Answer: C ([LEAVE A REPLY](#))

Custom background template

To create custom backgrounds that meet the guidelines in the previous sections, you can download the Microsoft Teams Rooms Theme Template.

The template is a .PSD file that can be opened by apps such as Adobe Photoshop or Paint.NET (a plug-in may be required). The template provides assets and guidelines to help you place text and graphics in your custom backgrounds that won't be obscured by on-screen elements.

NEW QUESTION: 40

You have a Microsoft Teams Phone deployment.

You have a call queue named Customer Service.

You need to ensure that when the agents of Customer Service make calls, the outbound calling name appears as Contoso, and the caller ID shows the phone number of Customer Service.

Other users must NOT be affected.

Which three actions should you perform? Each correct answer presents a part of the solution.

NOTE: Each correct selection is worth one point.

- A. From the Microsoft Teams admin center configure a new caller ID policy
- B. Set Calling Party Name to the organization name.
- C. From the Microsoft Teams admin center, modify the global (Org-wide default) caller ID policy.
- D. Set Replace the caller ID with to Resource account
- E. Set Override the caller ID policy to On.

Answer: (SHOW ANSWER)

You can manage caller ID policies by going to Voice > Caller ID policies in the Microsoft Teams admin center. You can use the global (Org-wide default) policy or create and assign custom policies. Users in your organization automatically get the global policy unless you create and assign a custom policy.

Create a custom caller ID policy

In the left navigation of the Microsoft Teams admin center, go to Voice > Caller ID policies. (A) Select Add.

Enter a name and description for the policy.

Turn on or off Block incoming caller ID and Override the caller ID policy. (E) Enter a Calling Party Name.

Under Replace the caller ID with, set which caller ID is displayed for users by selecting one of the following: (D) User's number: Display the user's number.

Anonymous: Display the caller ID as Anonymous.

Resource account: Set a resource account associated with an Auto Attendant or Call Queue.

If you choose Resource account, you're prompted to specify a resource account for the next field, called Replace the caller ID with this resource account. Only resource accounts with an assigned phone number will be displayed. If you just assigned a phone number to the resource account, it may take a few minutes before the resource account is available for selection.

7. Select Save.

You have a Teams Phone deployment that uses Direct Routing and a legacy PBX.

You need to leverage the a PBX during outbound calls from scheduled Teams meeting.

What should you create?

- A. an Audio Conferencing policy
- B. an Audio Conferencing routing policy
- C. a meeting broadcast policy

Answer: ([SHOW ANSWER](#))

Enable the routing of Teams meeting dial-out calls through Direct Routing Teams meeting dial-out calls are initiated from within a meeting in your organization to PSTN numbers, including call-me-at calls and calls to bring new participants to a meeting.

To enable Teams meeting dial-out routing through Direct Routing to on-network users, you need to create and assign an Audio Conferencing routing policy called "OnlineAudioConferencingRoutingPolicy".

Note:

Direct Routing lets you connect a supported, customer-provided Session Border Controller (SBC) to Phone System. With this capability, you can configure on-premises Public Switched Telephone Network (PSTN) connectivity with Microsoft Teams client, as shown in the following diagram:

The Yammer Enterprise network is configured as shown in the Network exhibit (Click the Network tab.)

1. Consolidate multiple networks

Congratulations! This Yammer Enterprise network is fully synced with the domains on your Microsoft 365 tenant. There are no further actions needed.

2. Enforce Microsoft 365 identity

Congratulations! This Yammer Enterprise network is enforcing Microsoft 365 identity for your users. There are no further actions needed.

3. Align network for Native Mode

For this Yammer Enterprise network to enter Native Mode and be discoverable through the Security & Compliance Center's eDiscovery capabilities, you must configure this network so that AAD and Microsoft 365 supports all its users, groups, and content. In this step, you will align this network through a series of changes.

Caution: The changes you make in this step are not reversible.

In addition to reviewing the summary details below, we recommend that you download and review the Alignment Report to see which users, groups, and content will be impacted by these changes.

You should also export the data for your Yammer Enterprise network, including all files, before starting this step.

Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment and problem statements- If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

General Overview

The network contains an Active Directory forest named contoso.com that syncs to Microsoft 365 by using Azure AD Connect. Domain controllers run Windows Server 2019.

Physical Locations

Contoso has offices in Toronto, New York, and London. Contoso has a manufacturing facility in Vancouver.

Contoso has a global sales team that works remotely without a physical corporate office.

Active Directory Environment

The network contains an Active Directory forest named contoso.com that syncs to Microsoft 365 by using Azure AD Connect. Domain controllers Windows Server 2019.

Microsoft Office 365

Contoso has a Microsoft 365 subscription. All users are assigned Microsoft 365 F3 licenses.

Contoso uses Microsoft Exchange Online for email.

Network Infrastructure

All the offices connect to each other by using a private WAN. The Toronto office has a 1 -Gbps internet circuit and the London office has a 100-Mbps internet circuit. Internet access for all the offices is provided through the Toronto and London offices.

The remote sales team users connect to the network by using VPN connections. The remote users use various connection types, including wireless and mobile.

Skype for Business Server traffic for the remote users is routed through the VPN connections.

Telephony

Contoso uses a centralized Skype for Business Server 2015 deployment configured for disaster recovery between the Toronto and London datacenters.

Each frontend pool connects to the PSTN through a pair of managed Session Border Controllers (SBCs) that provide Enterprise Voice and dial-in conferencing.

Contoso has a Skype for Business Server Survivable Branch Appliance (SBA) and a local SBC that connect to a Primary Rate Interface (PRO in the Vancouver manufacturing facility.

Contoso has hybrid connectivity deployed between Skype for Business Server and Office 365.

All SBCs are Microsoft Teams-certified.

The returns department has an auto attendant that uses an ID of returns3a@contoso.com.

Planned Changes

Contoso plans to migrate all existing services from Skype for Business Server to Teams.

Direct Routing will be deployed for the existing SBCs.

Existing meeting rooms have Skype for Business Server video endpoints that are Skype for Business Server-certified. The endpoints are not Teams-certified.

You plan to use the video endpoints in Teams until the equipment is replaced with Microsoft Teams Rooms.

A limited pilot of the Teams migration and the Direct Routing deployment will occur in the Vancouver facility before deployment to the entire company.

Technical Requirements

Contoso identifies the following technical requirements:

- * During the limited pilot, the media path must be optimized.
- Media flow/ for the remote sales team users must be optimized.

NEW QUESTION: 62

You have a Microsoft Teams deployment.

You plan to use a SkypeSettings.xml file to deploy Teams Rooms.

Which two actions can you perform in the file? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Define the account sign-in credentials.
- B. Allow remote control from personal devices.
- C. Automatically accept proximity-based meeting invitations.
- D. Enable the default video camera.

Answer: (SHOW ANSWER)

Manage console settings with an XML configuration file

At startup, if a Microsoft Teams Rooms console finds an XML file named SkypeSettings.xml

located at C:\Users\Skype\AppData\Local\Packages

\Microsoft.SkypeRoomSystem_8wekyb3d8bbwe\LocalState, it applies the configuration settings indicated by the XML file then deletes the XML file.

XML elements include:

* <AllowRoomRemoteEnabled> Boolean

If true, room remote connections are allowed. Enabled by default.

* <AutoAcceptProximateMeetingInvitations> Boolean

If true, proximity based meetings are automatically accepted. Disabled by default.

Topic 3, Contoso, Ltd. (NEW)

Overview

Contoso, Ltd. is an international manufacturing company that has 2,000 employees.

Contoso currently uses a third-party meeting service. The company plans to migrate the meeting service to Microsoft Teams and replace all legacy video teleconferencing [VTC] devices.

Contoso has offices in Toronto. New York. Rome, and London. The company has a global sales team that works remotely.

The on-premises network contains an Active Directory Domain Services (AD DS) forest named contoso.com.

Contoso has a Microsoft 365 subscription. All users are licensed for Microsoft 365 E5 and Teams

Premium. All users are enabled for Teams Phone by using Operator Connect.

The contoso.com domain syncs to Microsoft 365 by using Azure AD Connect cloud sync. All users use the Microsoft Authenticator app for multi-factor authentication (MFA) to cloud services. A Microsoft Surface Hub device is deployed to the boardroom in each office.

The reception area at the Toronto office is configured to use a phone number of +14165555555 in Teams.

Contoso identifies the following issues:

- * A user in the London office cannot locate the recorded files from a recurring Teams meeting.
- * Executives in the New York office report having to use Microsoft Authenticator to access their Microsoft OneDrive files from the Surface Hub.
- * A user in the Toronto office reports receiving incoming calls while attending Teams meetings instead of having calls sent automatically to voicemail.

Contoso plans to implement the following changes:

- * Deploy a new Teams-certified endpoint to all the boardrooms and huddle spaces in all the offices.
- * Start a pilot project to deploy an Intelligent Speaker to the boardroom in the Rome office and evaluate transcription and voice attribution capabilities.
- * Deploy a Teams shared device to the lunchroom in the Toronto office. Calls placed to +14165555555 must ring in both the reception area and the lunchroom.

Contoso identifies the following technical requirements:

- * The endpoint deployed to each boardroom must include a console on the table. The endpoint must automatically invite the existing Surface Hub when joining a Teams meeting.
- * The sales team must be able to temporarily sign in to the endpoints deployed to the huddle spaces to respond to Teams messages and attend video calls.
- * The endpoints deployed to the huddle spaces must allow only outbound emergency calls when a user is NOT signed in.
- * During Teams meetings, the sales team must have a watermark displayed on shared content.

NEW QUESTION: 72

You need to implement the planned changes for the boardrooms and huddle spaces. The solution must meet the technical requirements. Which type of endpoint should you use for each location? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION: 73

You are planning a Microsoft Teams Phone deployment. That will use Direct Routing. You need to allow traffic from Microsoft 365 to a Session Border Controller (SBC). Which IP address ranges should you allow through the firewall?

- A. 8.8.8.8/32 and 4422/32
- B. 10.10.0.0/24 and 10.11.0.0/24
- C. 132.245.0.0/16 and 40.104.0.0/15
- D. 52.112.0.0/14 and 52.120.0.0/14

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 74

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses configuration profiles to manage Microsoft Teams-certified IP phones. The Standard configuration profile is applied to the IP phones.

The help desk receives reports that several user phones fail to lock automatically after the timeout period.

You need to verify whether the configuration profile is applied to the problematic phones.

Solution: From Devices in the Microsoft Teams admin center, you select Phones, find the

reported phones, and review the Configuration profile column.

Does this meet the goal?

A. Yes

B. No

NEW QUESTION: 87

Your company has a Microsoft Teams Phone deployment.

The company has a direct inward dial (DID) phone number range of +14035554300 to +14035554329.

Phone numbers +14035554310 to +14035554325 are assigned to Teams users, auto attendants, and call queues.

You need to ensure that when an unassigned number is dialed, the caller is forwarded to a call queue named Reception.

Which three actions should you perform? Each correct answer presents a part of the solution.

NOTE: Each correct selection is worth one point.

A. Set Routing options to Voice application and assign the Reception call queue.

B. Add the DID range of +14035554300 to +14035554309 to the phone number range.

- C. Set Routing options to Person in organization and assign the Reception call queue.
- D. Add the DID range of +14035554300 to +14035554329 to the phone number range.
- E. From the Microsoft Teams admin center, select Phone numbers select Routing rules and then select Add a new rule

NEW QUESTION: 88

You have a Microsoft Teams Phone deployment.

You need to configure voice routing for Direct Routing. The solution must only allow calling within the United States and Canada for a user named user1 contoso.com.

Which four actions should you perform in sequence to minimize user call disruption? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

The screenshot shows the Microsoft Teams admin center interface. On the left, under the 'Actions' tab, there is a list of actions:

- Create a voice route that has a dial number pattern of "+1(408) 555-1234".
- Create a dial plan.
- Assign a dial plan to user1.
- In the global dial plan, create a normalization rule that has a pattern of "+1(408) 555-1234".
- Assign a voice routing policy to user1.
- Create a voice routing policy.
- Add a PSTN usage record named Record1.

 On the right, there is an 'Answer Area' which is currently empty. A watermark 'dumpsfiles.com' is visible across the image.

NEW QUESTION: 99

You have a Microsoft Teams Phone deployment that contains two users named User1 and User2.

User1 will be on leave for two weeks.

You need to redirect all calls to the phone number of User1 to the phone number of User2. The solution must minimize administrative effort.

What should you modify for User1?

- A. the voicemail transfer target settings
- B. the call delay and order settings
- C. the call delegation settings
- D. the phone number type

Answer: C ([LEAVE A REPLY](#))

Use the Teams admin center

You can use the Teams admin center to configure call forward and unanswered settings, group call pickup, and call delegation for your users.

To configure immediate call forward settings:

In the Teams admin center, go to Users > Manage users and select a user.

On the user details page, go to the Voice tab.

Under Call answering rules, select Be immediately forwarded, and select the appropriate call forward type and destination.

To configure simultaneous ringing, on the same page select Ring the user's devices. In the Also allow drop-down, select the appropriate simultaneous ringing setting.

To configure unanswered settings, on the same page select the appropriate setting in the If unanswered drop-down. In the Ring for this many seconds before redirecting drop-down, specify the number of seconds to wait.

The configuration of call delegation and group call pickup are integrated into the call forward and unanswered settings by selecting the appropriate type. For example, to configure that calls should also ring the user's delegates, on the same page select Call delegation under Also allow. Then add the appropriate delegates by selecting Add people and clicking Save.

NEW QUESTION: 111

You have a Teams Phone deployment that contains a branch office.

You need to restrict toll bypass for a user based on the office in which the user is working during an inbound or outbound PSTN call.

What should you use?

- A. a voice routing policy
- B. Local Media Optimization
- C. Location-Based Routing
- D. dial plans

E. a calling policy

Answer: E ([LEAVE A REPLY](#))

Calling policies in Teams

In Microsoft Teams, calling policies control which calling and call forwarding features are available to users. Calling policies determine whether a user can make private calls, use call forwarding or simultaneous ringing to other users or external phone numbers, route calls to voicemail, send calls to call groups, use delegation for inbound and outbound calls, and so on.

You can use the global (Org-wide default) policy that's created automatically or create and assign custom policies.

Calling policies include:

- * Prevent toll bypass and send calls through the PSTN

Turning on this setting sends calls through the Public Switched Telephone Network (PSTN) and incur charges rather than sending them through the network and bypassing the tolls. This setting is off by default.
