NEW QUESTION: 1

A company records data in Microsoft SharePoint Online. The company is creating a mobile app by using Microsoft Power Platform only. The company requires the app to connect directly to SharePoint Online to collect data. You need to recommend which Microsoft Power Platform product or feature to implement. What should you recommend?

- A. Power Pages
- B. Canvas app
- C. Model-driven app
- D. Power Automate

Answer: B (LEAVE A REPLY)

NEW QUESTION: 2

You are creating a new business process flow to qualify leads. You create an action. The action is not available inside the Action Step. You need to make the action available to the Action Step. Which two steps must you perform? Each correct answer presents part of the solution. NOTE Each correct selection is worth one point.

- A. Activate the action.
- B. Select Run as an on-demand process
- C. Add at least one step to the action.
- D. Ensure that the entity for the action matches the corresponding entity for the business process flow stage.

Answer: C,D (LEAVE A REPLY)

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april18/microsoft-flow/add-action-business-process-flow>

NEW QUESTION: 3

The owner of a company needs to know who signs into the system.

You need to ensure that the owner can view the user audit logs.

Where does each action need to be performed? To answer, select the appropriate options in the answer area.

NOTE Each correct selection is worth one point.

Action	Location
Activate user auditing.	System Settings Personal Settings Customize the System Microsoft 365 Compliance
View the user audit logs.	Advanced Find Individual record User Summary report Microsoft 365 Compliance

Answer:

Action	Location
Activate user auditing.	System Settings Personal Settings Customize the System Microsoft 365 Compliance
View the user audit logs.	Advanced Find Individual record User Summary report Microsoft 365 Compliance

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/audit-data-user-activity>

NEW QUESTION: 4

You are designing a Power Virtual Agents chatbot.

The chatbot must be able to maintain customer information if the conversation topic changes during a dialog.

You need to configure variables to store customer name and email address.

Which type of variable should you create?

- A. session
- B. topic
- C. bot
- D. slot

Answer: ([SHOW ANSWER](#))

By default, a variable's value can only be used in the topic where this variable gets created. However, you might want the bot to use the same value across topics. This means the bot can remember the necessary context when a conversation spans multiple topics. In some systems, these types of variables are known as global variables. In Power Virtual Agents, these variables are called bot variables, because they apply across the entire bot.

Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/authoring-variables-bot>

NEW QUESTION: 5

You create a Power Apps app.

The app must be able to display a list of records that are sorted by category. The app must also expand or hide the list by subtopics.

You need to configure the app.

Which tool should you use?

- A. card
- B. expression
- C. Power BI dashboard
- D. gallery

Answer: D ([LEAVE A REPLY](#))

A gallery control in Power Apps allows you to display a list of records, and can be configured to sort the records by a specific field, such as category. Additionally, the gallery control has built-in functionality for expanding or hiding a list of subtopics. This can be done by adding a toggle control within the gallery template to show or hide the subtopics based on user interaction. Reference: <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-gallery>

NEW QUESTION: 6

You create a Power Apps app for Microsoft Teams using Microsoft Dataverse for Teams. Users report that they are unable to view the app in Teams. You need to ensure that users can access the app. What should you do?

- A. Share the app with a security group by using the Maker portal.
- B. Share the app with a security group in Teams.
- C. Request that a tenant administrator pin the app to the app bar in Teams.
- D. Publish the app by using the Maker portal.
- E. Share the app with individual users by using the Maker portal.

Answer: C ([LEAVE A REPLY](#))

When you create a Power Apps app for Microsoft Teams using Microsoft Dataverse for Teams, the app needs to be added to the app bar in Teams before it can be accessed by users. This can only be done by a tenant administrator. To ensure that users can access the app, you would need to request that the tenant administrator pin the app to the app bar in Teams.

Sharing the app with a security group by using the Maker portal (A) or in Teams (B) would allow users in that group to access the app, but they would still need to be able to find and open the app.

Here are some references from Microsoft that may be helpful in understanding how to make Power Apps app available in Teams:

- * Microsoft docs: Add a Power Apps app to a Microsoft Teams channel
- * Microsoft docs: Pin a Power Apps app to the app bar in Microsoft Teams
- * Microsoft docs: Distribute Power Apps for Microsoft Teams

NEW QUESTION: 7

You add a business process flow to the Account table. The flow has three stages.

You need to ensure that a workflow can run when a user completes the final stage.

Which option should you use?

- A.** Start when: Record status changes
- B.** Available to run: Run this workflow in the background
- C.** Available to run: As an on-demand process
- D.** Available to run: As a child process

Answer: C ([LEAVE A REPLY](#))

You can trigger on-demand workflows from inside a business process flow. For example, you can add an on-demand workflow to a business process flow so that an activity, such as a task or email, is created whenever a stage is completed.

Note: A workflow becomes activated based on where you drop the workflow onto the business process flow designer.

On-demand stage processes. When the workflow is dropped onto a business process flow stage, the workflow is triggered on entry or exit of the stage.

Reference:

<https://docs.microsoft.com/en-us/power-automate/bpf-add-on-demand-workflow>

NEW QUESTION: 8

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You administer the Microsoft 365 and Power Platform environments for Contoso, Ltd. The company has a model-driven app that is used to track customer interactions with employees. The app uses standard table types for customers. A user named Elisabeth Rice signs in to the app by using the following sign in name: Elisabeth.Rice@contoso.com.

After marriage, Elisabeth changes her legal name to Elisabeth Mueller.

You need to update the sign in name for the user without losing any application history.

Solution: Ask the Microsoft 365 administrator to sign in to the admin portal and change the username.

Does the solution meet the goal?

- A.** No
- B.** Yes

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 9

You are implementing a model-driven app to support a new line of business.

There are several places where automated business logic must be applied.

You need to determine how to apply the business logic.

Which method should you use? To answer, drag the appropriate methods to the appropriate business logic statements. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Methods	Answer Area	Method
Business rule	Business logic Make a field read only until a predetermined value is exceeded. Automatically send an email when a record's status is changed to deactivated. Use the previous value of a field when the value is automatically updated as part of the	Method
Real-time workflow		Method
Power Automate instant flow		Method

Answer:

Methods	Answer Area	Method
Business rule	Business logic Make a field read only until a predetermined value is exceeded. Automatically send an email when a record's status is changed to deactivated. Use the previous value of a field when the value is automatically updated as part of the	Business rule

NEW QUESTION: 11

A company uses Power Apps to create maintenance requests. The maintenance manager emails the manager of the department noted in the request.

The maintenance manager wants to automate the email process when a new maintenance request is created.

You need to build a Power Automate flow to automate the email process.

Which three components should you add to the flow in sequence? To answer, move the appropriate components from the list of components to the answer area and arrange them in the correct order.

Components

- condition
- trigger
- stage
- data step
- action

Answer Area

Microsoft

Answer:

Component

condition	
trigger	
stage	
data step	
action	

Model Area

stage

action

NEW QUESTION: 12

You need to coordinate updates and deployment for managed solutions containing completed work without disrupting the system.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Deployment option for changes to an unrelated table

	▼
Deploy a patch with the changes made from the current solution.	
Deploy a full copy of the new solution with the changes using the upgrade option.	
Deploy a full copy of the current solution with the changes using the upgrade option.	

Deployment option for automation enhancements

	▼
Deploy the new solution and then deploy a full copy of the original solution. Use the upgrade option for both deployments.	
Deploy a full copy of the original solution and then deploy the new solution. Use the upgrade option for both deployments.	
Deploy a full copy of the original solution using the upgrade option. Then, deploy the new solution by using the update option.	

Answer:

Deployment option for changes to an unrelated table

Deploy a patch with the changes made from the current solution.

Deploy a full copy of the new solution with the changes using the upgrade option.

Deploy a full copy of the current solution with the changes using the upgrade option.

Deployment option for automation enhancements

Deploy the new solution and then deploy a full copy of the original solution. Use the upgrade option for both deployments.

Deploy a full copy of the original solution and then deploy the new solution. Use the upgrade option for both deployments.

Deploy a full copy of the original solution using the upgrade option. Then, deploy the new solution by using the update option.

NEW QUESTION: 13

You have a canvas app that allows users to view, select and purchase products. The app uses a Gallery control to display products and checkboxes that allow users to select products.

When users select items from the product catalog, they move to a different screen to complete a purchase.

Users must be able to clear all product selections when they click the button.

You need to configure the button.

What should you do?

- A. Use the Reset (Control) formula and pass the gallery control as a parameter to the Reset formula.
- B. Use the Reload(control) formula and pass the gallery control as parameter to the Reload formula.
- C. Use the ForAll() function to iterate through each item of the Gallery and clear user selections.
- D. Set the OnCheck value to populate a collection and the OnUncheck value to remove the item from the collection. Clear the collection when the user selects the button.

Answer: D ([LEAVE A REPLY](#))

<https://debajmecrm.com/quick-tip-resetting-controls-inside-gallery-in-canvas-app/>

NEW QUESTION: 14

You need to resolve the issue reported by substitute employees after they are assigned service requests.

How should you configure the system? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Aspect	Configuration
Relationship	Service Request 1:N Qualification Service Request N:N Qualification Service Request N:1 Qualification
Cascading rule	Restrict Cascade All Cascade None

Answer:

Aspect	Configuration
Relationship	Service Request 1:N Qualification Service Request N:N Qualification Service Request N:1 Qualification
Cascading rule	Restrict Cascade All Cascade None

NEW QUESTION: 15

A company is creating a canvas app and a model-driven app to manage their customer accounts.

The canvas app requires a business rule to set the Business Type column to large if the customer size is greater than a specific currency value.

The model-driven app requires a business rule to recommend the account rating be re-evaluated when the account goes on credit hold for this app only.

You need to configure the scope for the business rules.

Which scope should you use? To answer, drag the appropriate scopes to the correct business rules. Each scope may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Scopes	Answer Area	
All forms	Business rule	Scope
Specific form	Business Type column setting for customer size	
Table	Account rating re-evaluation	

Answer:

Scopes	Answer Area	
All forms	Business rule	Scope
Specific form	Business Type column setting for customer size	Table
Table	Account rating re-evaluation	Specific form

Reference:

<https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/create-business-rules-recommendations-apply-logic-form>

NEW QUESTION: 16

A company uses a model driven app.

The company needs to automatically update the Status column in real time.

You need to configure this feature.

Solution: Create a flow that has an Update a row action.

Does the solution meet the goal?

A. Yes

B. No

NEW QUESTION: 17

You use a dataflow to import data into Microsoft Dataverse. The data uses the following schema:

Column name	Data type
accountid	Unique Identifier
accountnumber	Text
createdon	Date and Time
modifiedon	Date and Time
versionnumber	Big Integer

The data must load in the least amount of time.

You need to configure the incremental refresh settings for the dataflow.

Which columns should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION: 19

You create a new Power Virtual Agents chatbot for an organization.

Testing and production deployment of the chatbot are not complete.

You need to ensure that appropriate users can access the chatbot.

Which methods should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Method
Test the chatbot with unlicensed internal users	Use the demo website Share the chatbot to each user individually Share the chatbot to a security group containing all users
Allow other licensed internal users to edit the chatbot	Share the chatbot to each user individually Share the chatbot to a security group containing all users Deploy the chatbot to Microsoft Teams in your tenant
Deploy the chatbot to production for public consumption	Embed the chatbot code in an IFrame on your company's public website Deploy the chatbot to Microsoft Teams in your tenant Deploy the chatbot to AppSource

Answer:

Requirement	Method
Test the chatbot with unlicensed internal users	Use the demo website Share the chatbot to each user individually Share the chatbot to a security group containing all users
Allow other licensed internal users to edit the chatbot	Share the chatbot to each user individually Share the chatbot to a security group containing all users Deploy the chatbot to Microsoft Teams in your tenant

NEW QUESTION: 20

A company’s sales staff wants a simplified way to manage their opportunities in Dynamics 365 Sales without adding custom code. You need to provide a solution for each requirement. Which solutions should you provide? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Solution
Drag and drop opportunities to change the stage.	Add a Kanban control. Add a Timeline control. Add an Editable Grid control. Add a Calendar control.
Show each salesperson their opportunities in Calendar and Kanban view.	Add both controls to a custom view. Add both controls to the My Opportunities view. Add one control to All Opportunities and a custom view. Add one control to My Opportunities and a custom view.
Show each salesperson the number of open opportunities by stage in a standard view.	Use the List view. Use the Timeline control. Use the Kanban control. Use the chart pane on the view.

Answer:

Requirement	Solution
Drag and drop opportunities to change the stage.	Add a Kanban control. Add a Timeline control. Add an Editable Grid control. Add a Calendar control.
Show each salesperson their opportunities in Calendar and Kanban view.	Add both controls to a custom view. Add both controls to the My Opportunities view. Add one control to All Opportunities and a custom view. Add one control to My Opportunities and a custom view.
Show each salesperson the number of open opportunities by stage in a standard view.	Use the List view. Use the Timeline control. Use the Kanban control. Use the chart pane on the view.

NEW QUESTION: 21

You plan to create a Power BI dataflow.

The Power BI dataflow has the following requirements:

- * Be able to create a copy of the dataflow to separate Power BI workspaces-
- * Schedule the dataflow to update every day at 11:00 AW.

You need to configure the dataflow.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Copy Power BI dataflow.	Export the JSON file. Export the JSON file. Change the settings. Change the properties. Add Streaming dataset.
Schedule updates.	Configure the Power BI service. Refresh the history. Configure the Power BI service. Share the dashboards with other users. Refresh automatically.

Answer:

NEW QUESTION: 22

You plan to add a Power Apps app to Microsoft Teams.

A Microsoft Dataverse for Teams environment has not been provisioned.

You need to create a Dataverse for Teams environment.

Which two actions can you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create an app permission policy in the Teams admin center.
- B. Create a new environment in the Microsoft Power Platform Admin Center.
- C. Create a new app in Teams.
- D. Install an existing app in Teams.

Answer: (SHOW ANSWER)

NEW QUESTION: 23

A company is planning to create a Power Virtual Agents bot.

The bot has the following requirements:

- * The bot must provide address information for the company.
- * The bot must be available from Microsoft Teams and from the internet website of the company.

You need to configure the bot. Which component should you use?

- A. Skill
- B. Composer
- C. Template
- D. Channel

Answer: D (LEAVE A REPLY)

To make the bot available from Microsoft Teams and from the company's internet website, you need to configure the channels for the bot. Power Virtual Agents uses channels to connect the bot to different communication platforms such as Microsoft Teams, Skype, Facebook, and more. By configuring the appropriate channels for the bot, you can make it available on those platforms and allow users to interact with the bot from those locations.

You can configure channels by going to the Power Virtual Agents portal, and then select the bot you want to configure. Then select the "Channels" tab, where you can add the channels which you want the bot to be available on.

NEW QUESTION: 24

A company is implementing a data model by using Dataverse.

The company requires the following columns in a new custom table:

Column name	Requirement
Special Notes	Must contain string data that stores 100 characters and be rendered as a multiline control.
Specification	Must contain string data that stores up to 8,000 characters and be rendered as a multiline control.
Student	Must contain an input control that can store a reference to an account or a contact in the system.
Course Type	Must contain a list of predefined options. Users must be able to select only one option.

You need to choose the column type that uses the least amount of database storage for each column.
Which column types should you choose? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Column name	Column type
Special Notes	Multiline Text Text Text Area Multiline Text
Specification	Multiline Text Text Text Area Multiline Text
Student	Lookup Choices Customer Lookup

NEW QUESTION: 25

A company is training an AI model using a custom table to determine the amount of time it takes to deliver a package based on several key fields.

The testing data used to train the model is used for all training and regression testing scenarios and is considered complete data.

The trained model predicts a 2 percent variance between the estimated delivery time and the actual delivery time of packages.

The executive sponsors reject the model because the actual variance is at 15 percent.

You need to address the sponsors' concern.

What should you do?

- A.** Reduce the size of the data used within the model.
- B.** Increase the size of the data used with the model.
- C.** Use sample training data from Microsoft.
- D.** Replace the training data with real-world data.

Answer: D (LEAVE A REPLY)

Note: Start using AI Builder with sample data.

Don't have any data of your own to create a model? No problem! We've got you covered.

Sample data is available for several AI Builder model types, together with instructions for working with the sample data.

NEW QUESTION: 26

You create a desktop flow to interact with a certification authority's website.

You need to get data in and out of the desktop flow.

How should you set up the input and output parameters? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Parameter direction	Configuration
Inbound	Microsoft Copy and paste qualification data into the desktop flow. Run a cloud flow from the Dataverse qualification record to send data to the desktop flow. Connect by using the Dataverse connector from the desktop flow and retrieve the qualification data.
Outbound	Copy and paste the verification data into the qualification record. Send data from the desktop flow to a cloud flow to update the qualification record. Connect by using the Dataverse connector from the desktop flow and the qualification record

Answer:

Parameter direction	Configuration
Inbound	Microsoft Copy and paste qualification data into the desktop flow. Run a cloud flow from the Dataverse qualification record to send data to the desktop flow. Connect by using the Dataverse connector from the desktop flow and retrieve the qualification data.
Outbound	Copy and paste the verification data into the qualification record. Send data from the desktop flow to a cloud flow to update the qualification record. Connect by using the Dataverse connector from the desktop flow and the qualification record

NEW QUESTION: 27

You need to format the Current Date field for parental consent. What should you use?

- A. switch
- B. dynamic content
- C. condition
- D. expression

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 28

You are designing a desktop user interface (UI) flow.

The UI flow automates legacy software.

You need to prepare data for transfer to a Microsoft SharePoint list.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Select information to pass to the SharePoint list.

Copy and paste the text in the output definition window.

On the Outputs menu of the UI flow, choose **Select text on screen.**

Enter a name and description for the output.

Start recording the UI flow.

Stop the recording and save the flow.

Answer Area

Answer:

1 - Start recording the UI flow.

2 - On the Outputs menu of the UI flow, choose Select text on screen.

3 - Select information to pass to the SharePoint list.

4 - Enter a name and description for the output.

Reference:

<https://docs.microsoft.com/en-us/power-automate/ui-flows/inputs-outputs-desktop#use-outputs-to-extract-information-from-the-app>

NEW QUESTION: 29

You need to design the resort portal's email registration process.

Which solutions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
Implement the invitation code redemption process.	Auto-populate the invitation code field on the sign-in screen from the email link. Embed the invitation code in the email link URL. Send the customer their username and temporary password in the email link.
Validate the user's email.	Two-factor authentication Azure Active Directory authentication Social provider sign-in Invitation code sign-up

Answer:

Requirement	Solution
Implement the invitation code redemption process.	Auto-populate the invitation code field on the sign-in screen from the email link. Embed the invitation code in the email link URL. Send the customer their username and temporary password in the email link.
Validate the user's email.	Two-factor authentication Azure Active Directory authentication Social provider sign-in Invitation code sign-up

NEW QUESTION: 30

You are using a development environment to add a new column to a system table. You plan to move the changes to a test environment they are complete.

The changes must meet the following requirements:

- * Must be clearly identified so that they are not confused with system components and components from other solutions.
- * Must not affect any existing components in the test environment.

You need to prepare a solution for deployment to the test environment.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create a new unmanaged solution and select the correct publisher.

Create a new publisher.

Select a managed solution and add the correct publisher.

Add the table with all components to the solution.

Choose an existing publisher.

Add the table to the solution and add the new column.

Run the solution checker on the solution.

Answer area

>

<

Answer:
Answer Area

Create a new publisher

Create a new unmanaged solution and select the correct publisher

Add the table top the solution and add the new column.

Run the solution checker on the solution

- 1 - Create a new publisher
- 2 - Create a new unmanaged solution and select the correct publisher
- 3 - Add the table top the solution and add the new column.
- 4 - Run the solution checker on the solution

NEW QUESTION: 32

A company is implementing Microsoft Power Platform solutions.

The company requests information on the features that are supported by Power Fx.

You need to identify the features of Power Fx.

What should you identify?

- A.** It uses synchronous data operations.
- B.** It uses an undefined value for uninitialized variables.
- C.** It is available for purchase through a Microsoft reseller.
- D.** It uses formulas that are similar to Microsoft Excel formulas.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 33

You have a classic workflow. The workflow updates a custom column on a record when an account record is created. The workflow must update the custom column based on the following conditions:

* Update the custom column value using the Account Number.

* If the Account Number column is blank, update the custom column value using the Ticker Symbol.

* If the Ticker Symbol column is blank, update the custom column value to N/A You need to configure the custom column value by using the update record step. What should you do?

- A.** Add a formula that evaluates the two column values and uses the first populated value or else the default value
- B.** Add the two columns with the default value by using the Forms Assistant.
- C.** Add check conditions to determine if the two columns contain data.
- D.** Add an expression that evaluates the two column values and uses the first populated value or else the default value.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 34

You are a Dynamics 365 Customer Service help desk administrator.

Cases entered in forms require different types of data to be stored in different types of fields.

You need to create forms for each of the following case types:

Case type	Requirement
Case type A	A new case form that includes a timeline
Case type B	A new case form that includes a business process flow
Case type C	A new case form that can display case data on an interactive dashboard
Case type D	A new mobile-friendly case form that requires minimal fields for record creation
Case type E	A new mobile-friendly case form that displays the subject, case title, and status fields from a parent case

Which form types should you create? To answer, drag the appropriate form types to the meet the data entry requirements. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

NEW QUESTION: 42

A company uses Power Apps.
Users must be able to view only the address1 columns in the Account table.
You need to ensure other address columns are not visible to users when creating views and filters.
What should you do?

- A. Delete the other address columns from the table.
- B. Use column-level security to remove read access to all users.
- C. Disable the Search option for the columns.
- D. Create business rules to hide the other address columns.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 43

You need to create adoption duties for the administrative staff.
What should you create?

- A. business unit
- B. business rule
- C. business process flow

Answer: C (LEAVE A REPLY)

NEW QUESTION: 44

You need to store scanned consent forms. Where should you store the forms?

- A. Column
- B. SharePoint
- C. Attachment
- D. Notes

Answer: B (LEAVE A REPLY)

NEW QUESTION: 45

A farm uses a canvas app to manage schedules for planting fields with crop seeds. The farm uses business intelligence to provide recommendations for schedule changes based on weather data. You must implement a business rule that changes information for several forms in the canvas app based on business intelligence data. You need to configure the business rule. Which scope should you use?

- A. Form specific
- B. All Forms
- C. Table

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 46

A company has a Power Apps app. The app must meet the following requirements:

- * Managers assign lead records to the sales department. A new phone call record must be created if a lead record has no activities.
- * An email must be sent to the manager if the phone call record created is not completed after one day.

A classic workflow must run when a lead record is assigned. You need to configure the check conditions for the workflow. NOTE: Each correct selection is worth one point.

NEW QUESTION: 47

On a Contact record, a user creates a Note record that contains the word running.
One week later, the user reports that they cannot find the Contact record associated with the Note record.
You need to find the Note record.
Solution: Use Quick Find search on the Notes list to search for the word run.
Does the solution meet the goal?

- A. Yes
 - B. No
- Answer: B** ([LEAVE A REPLY](#))

Instead use Relevance Search.
Note: Relevance Search finds matches to any word in the search term in any field in the entity. Matches may include inflectional words, like "stream," "streaming," or "streamed." Reference:
<https://docs.microsoft.com/en-us/power-platform/admin/configure-relevance-search-organization#what-is-relevance-search>

NEW QUESTION: 48

A veterinary office plans to use Microsoft Power Platform to streamline customer experiences. The customer creates a canvas app to manage appointments.
On the client appointment form, there is a dropdown field for clients to select their type of pet. If a client selects the option Other, a text field must appear so that staff members can add details about the pet.
You need to create a dynamically visible field.
What should you configure?

- A. business rule
- B. business process flow
- C. workflow

Answer: A ([LEAVE A REPLY](#))

A business rule can be used to configure the visibility of a field based on the value selected in another field. In this case, a business rule could be created to make the text field for additional pet details visible when the "Other" option is selected in the dropdown field for the type of pet. This can be done by going to the Power Apps portal, navigating to the Common Data Service, and creating a new business rule for the entity that contains the appointment form. Within the rule, you can set the visibility of the text field to be dependent on the value selected in the dropdown field. Reference: <https://docs.microsoft.com/en-us/power-platform/model-driven-apps/model-driven-business-rules> It's important to note that the above feature is only available in the PowerApps Model Driven App and not in Canvas App.

NEW QUESTION: 49

You need to add controls to the check-in solution for the health and wellness questions.

Which form control should you use?

- A. Check box
- B. Drop down
- C. Text input

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 50

A customer uses Power Apps to view and maintain their contacts that are stored in Microsoft Dataverse.

Several columns must be configured to ensure the security settings for sales associates are view only.

You need to configure the access restrictions.

Which component for field-level security should you use? TO answer, select the appropriate options in the answer are a.

NOTE: Each correct selection is worth one point

Action	Component
Enable the fields for record-level security.	Azure Data Lake Gen2 Azure SQL Power Apps app designer Microsoft Power Platform admin center
Set the security settings for the sales associates to view only.	Azure Active Directory group team Dataverse table Field Security Profiles User

 Microsoft

Answer:

- * Configure a business rule to show an error message.
- * Edit values in calculated fields.
- * Edit the Address composite field.
- * Use the editable grid on mobile phones.

Which actions can you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Group by or sort columns in the current view.	Yes No
Configure a business rule to show an error meessage.	Yes No
Edit values in calculated fields	Yes No
Edit the Address composite field.	Yes No
use the editable grid on mobile phones.	Yes No

Answer:

Group by or sort columns in the current view.	Yes No
Configure a business rule to show an error message.	Yes No
Edit values in calculated fields	Yes No
Edit the Address composite field.	Yes No
use the editable grid on mobile phones.	Yes No

NEW QUESTION: 53

You are designing a Power Virtual Agents chatbot for a store.

You need to teach the chatbot to acknowledge the store's product categories and the variations within specific categories.

You need to create custom entities to provide the chatbot with the knowledge of the product categories.

Which features should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION: 54

You are using the Data import wizard to import records into the account table from a CSV file. The CSV-to-table mapping is as follows:

- * The Name column represents the account name and maps to the Account Name column.
- * The Parent Name column represents the holding company of the account with subsidiaries underneath.

Records that are imported into the table are only related to other records in the file.

You need to configure the import to create the relationship between records.

What should you do?

- A. Create an alternate key on the account table by using the Account Name column. Do not map Parent Name in the file.
- B. Look up the record IDs of the records in the Parent Account column. Add the record IDs as a new column in the file. Map the new column to the Parent Account column.
- C. Map Parent Name in the file to the Parent Account column. Select Parent Account as the lookup criteria.
- D. Map Parent Name in the CSV file to the Parent Account column. Select Account Name as the lookup criteria.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 55

A company has employees in France, Mexico, and the United States. You are creating a Power Apps app to allow users to add client records to Microsoft Dataverse. The default language for the company is English. The company wants the app to display each local language. You need to add the Spanish and French languages.

Which four actions should you perform in sequence for each language? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Import the solution.

Export translations.

Replace the language code column and translated wording in the CrmTranslations.xml file.

Select an unmanaged solution.

Select a managed solution.

Add a language code column and translated wording in the CrmTranslations.xml file.

Import translations.

Export the solution.

Answer Area

Answer:

Actions	Answer Area
Import the solution.	Select a managed solution.
Export translations.	Export translations.
Replace the language code column and translated wording in the CrmTranslations.xml file.	Add a language code column and translated wording in the CrmTranslations.xml file.
Select an unmanaged solution.	Import translations.
Select a managed solution.	
Add a language code column and translated wording in the CrmTranslations.xml file.	
Import translations.	
Export the solution.	

Explanation:

Step 1: Select an unmanaged solution.

Export the localizable text

The scope of the localizable text that will be exported is the unmanaged solution that contains the localizable text.

From Power Apps, select Solutions.

In the All Solutions list, select the unmanaged solution that contains the localizable text you want.

On the command bar, select Translations > Export Translations.

Step 2: Export translations.

Step 3: Add a language code column and a translated wording in the CrmTranslations.xml file.

Get the localizable text translated

You can send this file to a linguistic expert, translation agency, or localization firm.

If you have the knowledge to translate the text, or if you just want to see the format, you can extract the zip file that you exported you will see that it contains two XML files.

[Content_Types].xml

CrmTranslations.xml

You can open the CrmTranslations.xml file with Microsoft Office Excel.

When you view the data in Excel, look at the Localized Labels tab.

657	cr2b3_car	1da1f788-3f64-e811-a957-000d3af3b3af	DisplayName	Active		

Any custom tables or columns will have empty cells for the localizable text. Add the localized values for those items.

Step 4: Import translations.

Import the localized text

Importing the text requires compressing the files and importing them into the system.

Import the files

From the same unmanaged solution that you exported the translations from, in the menu choose Translations > Import Translations.

Note: If you have customized table or column text, such as column labels or drop-down list values, you can provide the users in your environment who are not working with the base language version of your environment with this customized text in their preferred languages.

The process has the following steps:

Enable other languages for your environment

Export the localizable text

Get the localizable text translated

Import the localized text

NEW QUESTION: 56

A company that manufactures medical devices uses Power Apps to manage their sales and device maintenance.

A Table named Devices in Microsoft Dataverse has a column named Status. The Status column must have a new status value of Review added to the existing Choice values of Active and Inactive.

The table must be added to a solution to be promoted once the change is made.

Only this change must be promoted to the test environment. The changes must not be able to be changed once promoted. You need to add the change to a solution for promotion.

NEW QUESTION: 61

You create a Power Virtual Agents bot.

You observe that the bot is not able to recognize input from some users.

You need to configure the bot response for unrecognized input from users.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A.** Transfer to an agent.
- B.** Use a fallback topic.
- C.** Display a system-defined error message.
- D.** Connect to a different channel.

Answer: (SHOW ANSWER)

B . Use a fallback topic: Power Virtual Agents provides the capability to handle unrecognized inputs by using fallback topics. A fallback topic is a topic that is triggered when the bot is unable to recognize the user input. You can configure fallback topics by going to the Power Virtual Agents portal, and then select the bot you want to configure. Then select the "Topics" tab and create a new topic with a fallback trigger. Reference: <https://docs.microsoft.com/en-us/power-virtual-agents/topics-triggers#fallback-triggers> C . Display a system-defined error message: This is another option to handle unrecognized inputs by displaying a predefined message that inform the user that the bot was unable to understand their input.

NEW QUESTION: 62

A customer has a support website that includes FAQ pages, knowledge articles, and support content.

You plan to leverage an existing Power Virtual Agents bot to enhance and streamline existing support functionality for the existing support portal.

You need to create topics from existing website content. The process must minimize human errors during topic creation.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Hover over the topic and select the Automate icon.

Capture suggested topics.

Add selected topics to the chatbot.

Enable the topics.

Identify the pre-filled trigger phrases.

Answer area

Answer:

Answer Area

Add the suggested topics to your bot.

Enable the topics.

- 1 - Add the suggested topics to your bot.
- 2 - Enable the topics.

NEW QUESTION: 63

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating Power Virtual Agents chatbot that captures demographic information about customers.

The chatbot must determine the group a customer belongs to based on their age. The age groups are:

- 0 - 17
- 18 - 25
- 26 - 35
- 36 - 55
- 55 - 100

You need to configure the chatbot to ask a question that can be used to determine the correct age group.

Solution: Use age for Identify in the question and then add branches for each group that use conditional logic.

Does this meet the goal?

- A. Yes
- B. No

Answer: B (LEAVE A REPLY)

Instead, create a custom Age group entity and synonyms for each individual age in the corresponding item. Use Age group for Identify in the question.

The prebuilt entities cover commonly used information types, but on some occasions, such as when building a bot that serves a specific purpose, you'll need to teach the bot's language understanding model some domain-specific knowledge.

To do this, you need to create a custom entity.

Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/advanced-entities-slot-filling>

NEW QUESTION: 64

You need to create a Power Automate desktop flow.

What are two possible ways to create the flow? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A.** Record mouse and keyboard events.
- B.** Configure a pre-built template.
- C.** Use pre-built actions.
- D.** Create models by using Microsoft Visio.

Answer: A,C ([LEAVE A REPLY](#))

C: Desktop flows are used to automate tasks on the Web or the desktop. Using Power Automate you can automate tasks on the desktop as well as the Web.

A: Alternatively, you can use the two legacy methods of creating desktop flows: Windows recorder (V1) and Selenium ID. With these you record mouse and keyboard events.

Reference:

<https://docs.microsoft.com/en-us/power-automate/desktop-flows/create-flow>

<https://docs.microsoft.com/en-us/power-automate/desktop-flows/create-web>

NEW QUESTION: 65

You plan to create a dataflow by using Power Query to transform the data. You observe that some cells display an error instead of the expected data. You need to obtain more details about the errors. What should you do?

- A.** Select the row that includes the cell with the error.
- B.** Use the Flow Checker.
- C.** Select the cell with the error.
- D.** Use the App Checker.
- E.** Use the Advanced Editor.

Answer: C ([LEAVE A REPLY](#))

When you select the cell with the error, a tooltip will appear with more details about the error. This will help you identify the cause of the error and take the necessary steps to fix it.

NEW QUESTION: 66

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses Dataverse.

The company plans to store and manage documents and data in the environment. The company requires a solution that minimizes Dataverse storage consumption.

You need to recommend a solution.

Solution: Configure SharePoint Online integration.

Does the solution meet the goal?

- A.** No
- B.** Yes

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 67

You plan to create classic workflows for process automation on the Account table. The process automation has the following requirements:

- * If the Account Name column changes, a custom column named Previous Name must be updated with the original value.
- * If the Credit Limit column changes, an email must be sent to the record owner with the new value.
- * Asynchronous processes must be used whenever possible.

You need to implement the process automation.

What is the minimum number of workflows you should use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Topic 4, Contoso Suites

Background

Contoso Suites is an animal shelter that specializes in finding homes for dogs that have been given up by their owners. The shelter can house up to 20 dogs. The shelter is implementing one model-driven Power Apps app to track the dogs and schedule meetings with potential adopters. No other apps will be created. The model-driven app uses Dataverse with out-of-the-box functionality when possible. Dataverse is set up with the following configuration:

- * The solution prefix 'cs' is used for all new components.
- * Only the root business unit is used.
- * All tables are stored in Dataverse and do not require rapid scaling.
- * Exchange server-side sync is not configured.

Adopters

- * Adopter information is stored in a Contact table.
- * Contacts are considered to be duplicates if they have the same email address and last name.
- * Adopters are often late to meetings, so a reminder email is sent to them two hours before their meeting.
- * The email reminders must not be tracked in the system.

Dogs

- * Dog information is stored in a Dog table, which is organization owned.
- * Breed, size, and weight are fields in the table.

Dog residency

- * A Resident table tracks the stay of each dog.
- * Each resident record has a lookup for the dog and its food.
- * The food type and amount are logged on each resident record. Auto-posting is not configured for changes to food type and amount.
- * A fee of \$120 is in a currency column named Adoption Fee. This fee can be changed depending on the adoption circumstances.
- * A formula column named Deposit is automatically populated with 20% of the adoption fee.
- * A resident record is generated automatically when a dog record is created. This is the only way a resident record can be created.

Exercise and feedings

- * Exercise for the dogs is tracked in an Exercise table.
- * Feedings are tracked in a Feeding table.
- * Exercise and feeding records appear in a resident record timeline.

Care staff

- * The care staff must be able to view who changed the food type and the amount that was given, for up to three months ago.
- * The staff must be able to update the weight of a dog on the resident record.
- * The staff report that the buttons are too small on the touch screen they use to log exercise and feeding.
- * The staff must be able to view who the adopters are for upcoming meetings. The staff must not be able to update adopter information.

Administrative staff

- * Administrative staff must receive a weekly list of duplicate contacts. Duplicate alerts must not appear when a staff member saves a new contact.
- * When an adopter wants to adopt a dog, the staff must perform a series of adoption duties in order. The following duty list must be displayed on the screen:
 - o Commitment:
 - o Obtain adopter signature in a commitment document.
 - o Collect deposit
 - o Pre-pickup:
 - o Document spay or neutering date.
 - o Perform spay or neutering.
 - o Document pickup date.
 - o Pickup:
 - o Collect full payment.
 - o Verify dog is picked up.
 - o A dog must be picked up no sooner than two days after spaying or neutering.
 - o A pop-up window must appear with an error message if the Pickup date is too soon.
 - o Only administrative staff must be able to add new adopters and dogs.

A company uses a canvas app.

Supervisors must approve transactions when a user from the sales department enters a revenue amount that is over \$1 million.

You need to configure an approval process without using code.

What should you create?

- A.** Azure Service Bus service
- B.** Power Automate cloud flow
- C.** Power Apps component framework (PCF) control
- D.** Column Expression

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 70

You need to create the evaluation record for a prospect. What should you use?

- A.** a quick create form
- B.** a classic Dataverse workflow
- C.** a plug-in
- D.** a cloud flow

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 71

You are building a model-driven app. The environment has Advanced settings enabled.

A form in the app requires a custom interface.

You need to embed the custom interface onto the form without using custom code.

What should you do?

- A.** Use the classic experience to add a canvas app.
- B.** Modify the model-driven app to use tablet form factor.
- C.** Create a canvas app and add it to a solution.
- D.** Modify the model-driven app to use mobile form factor.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 72

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses a model-driven app

The company needs to automatically update the Status column in real time You need to configure this feature.

Solution: Create a flow that has an Update item action.

Does the solution meet the goal?

- A.** No
- B.** Yes

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 73

You use Power BI Desktop to configure Power BI reports.

You need to create a canvas app that displays user account information and include the app in a Power BI report.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A.** From the Power Apps Insert menu, add a Power BI tile
- B.** From the Power BI Desktop menu, insert a Power Apps visual and include the required fields in the Power Apps data
- C.** Publish the report to the Power BI service
- D.** Connect to Common Data Service from Power BI Desktop

Answer: B,C,D ([LEAVE A REPLY](#))

Step 1 (B): Here's how we embed PowerApps into a Power BI report:

Download and login to the Power BI desktop application

Click on (...) and select "Import from the marketplace."

Step 2: Open Power BI desktop and use "Get data" to connect with the Common Data Service data source.

Step 3: Publish the report to Power BI service.

Reference:

<https://purple.telstra.com/blog/powerbi-integration-with-powerapps>

NEW QUESTION: 74

You configure and test a user interface (UI) flow. You plan to run the flow as a scheduled flow.

The UI flow must run on a Windows 10 device. As part of process automation, the UI flow must sign into the Windows 10 device with the credentials for a user account named User1.

You need to ensure that the flow runs during non-peak hours and requires no physical user intervention.

What should you do?

- A.** Ensure that all user sessions are signed out except for locked user sessions.
- B.** Ensure that the User1 account has an active user session on the device.
- C.** Ensure that all user sessions are signed out.
- D.** Ensure that there are no active user sessions on the device.

Answer: ([SHOW ANSWER](#))

Reference:

<https://docs.microsoft.com/en-us/power-automate/ui-flows/run-ui-flow>

NEW QUESTION: 75

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses Dataverse.

The company plans to store and manage documents and data in the environment. The company requires a solution that minimizes Dataverse storage consumption.

You need to recommend a solution.

Solution: Add a File column to a table.

Does the solution meet the goal?

- A.** No

B. Yes

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 76

You plan to create a Power Virtual Agents bot.

The bot must support single sign-on.

You need to publish the bot.

Which two locations should you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Microsoft Teams

B. Mobile app developed for iOS and Android

C. Azure Bot Service channels

D. Website developed using pro developer tools

Answer: C,D ([LEAVE A REPLY](#))

C) Azure Bot Service channels: You can configure a Power Virtual Agents bot as a channel in Azure Bot Service. Single sign-on can be configured for the bot using Azure Active Directory (AAD) and the OpenID Connect protocol. This allows you to use your existing AAD users and groups to control access to your bot.

D) Website developed using pro developer tools: You can embed a Power Virtual Agents bot on a website using the Web Chat control. Single sign-on can be configured for the bot using Azure Active Directory (AAD) and the OpenID Connect protocol. This allows you to use your existing AAD users and groups to control access to your bot.

Create a Wunderlist task.	▼ Dynamics 365 workflow Microsoft Flow Business Process Flow

NEW QUESTION: 78

You are a system administrator for a company with locations in Mexico, United States, and France. The company has both fulltime employees and contractors in all regions. Fulltime employees use a mobile app. The company has two security groups: fulltime employees and contractors.

The company requests a chatbot in Microsoft Teams to answer employee benefit questions. The chatbot must meet the following requirements:

- * It must be in the local language.
- * Only fulltime employees may access the chatbot.

You need to configure the chatbot.

Which action should you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Configuration
Chatbot in local language	Create one chatbot that manages all three languages. Create one chatbot that manages all three languages. Create one chatbot and add it to three Teams channels that are configured for the local language. Create three chatbots, one for each language.
Employee access	Publish the chatbot in Teams. Share the chatbot with the fulltime employees. Publish the chatbot to the mobile app channel. Add the chatbot to Appsource. Publish the chatbot in Teams.

Answer:

Answer Area

Requirement	Configuration
Chatbot in local language	Create one chatbot that manages all three languages. Create one chatbot that manages all three languages. Create one chatbot and add it to three Teams channels that are configured for the local language. Create three chatbots, one for each language.
Employee access	Publish the chatbot in Teams. Share the chatbot with the fulltime employees. Publish the chatbot to the mobile app channel. Add the chatbot to Appsource. Publish the chatbot in Teams.

NEW QUESTION: 79

A company uses a Power Apps app with Microsoft Dataverse.
The company requires the import of records into Dataverse. Duplicate records in the data must be deleted without user intervention.
You create a duplicate detection rule.
You need to configure the rule for the data import.
Which option should you configure?

- A. Enable the Templates for Data Import option.
- B. Enable the When a record is created or updated option.
- C. Disable the Allow Duplicates option.
- D. Enable the During data import option.

Answer: D (LEAVE A REPLY)

When configuring a duplicate detection rule in Power Apps with Microsoft Dataverse, to automatically delete duplicate records during a data import, you should enable the "During data import" option. This option allows the detection rule to automatically delete duplicates as they are imported into the system, without requiring user intervention.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/create-duplicate-detection-rule>

<https://docs.microsoft.com/en-us/power-platform/admin/data-integration-duplicate-detection>

NEW QUESTION: 80

You create functionality for a company. The functionality includes a Microsoft Dataverse table with a form for data entry. The functionality will be distributed to other lines of business in the company, each with its own Dataverse environment.

New forms must not be created in order for updates to the functionality to work correctly.

You need to package the new functionality for distribution.

What should you do?

- A.** Use a patch solution and disable the ability to create new forms for the table.
- B.** Use a managed solution and include only the needed form.
- C.** Use an unmanaged solution and include only the needed form.
- D.** Use a managed solution and disable the ability to create new forms for the table.

Answer: B ([LEAVE A REPLY](#))

Managed solutions are used to deploy to any environment that isn't a development environment for that solution. This includes test, UAT, SIT, and production environments. Managed solutions can be serviced independently from other managed solutions in an environment. As an ALM best practice, managed solutions should be generated by exporting an unmanaged solution as managed and considered a build artifact. Additionally:

You can't edit components directly within a managed solution.

NEW QUESTION: 81

You need to design the resort portal's email registration process.

Which solution should you use?

- A.** Default the invitation code from the email upon logging into the portal
- B.** Auto-populate the invitation code field on the sign in screen from the email link
- C.** Embed the invitation code in the email link URL
- D.** Send the customer their username and temporary password in the email link

Answer: C ([LEAVE A REPLY](#))

Scenario: Guests must receive a separate email to verify proof of ownership for their registration.

Note: You can setup redeem an invitation code for power apps portal.

Reference:

<https://carldesouza.com/how-to-setup-redeem-an-invitation-code-for-power-apps-portal/>

NEW QUESTION: 82

You use Power BI Desktop to configure Power BI reports and dashboards.

You need to create a canvas app that displays account information and include the app in a Power BI report.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE Each correct selection is worth one point.

- A.** From the Power Apps Insert menu, add a Power BI
- B.** Publish the report to the Power BI service.
- C.** Connect to Common Data Service from Power BI Desktop.

D. Connect Common Data Service from Power BI Desktop. Selected required fields from the Accounts table.

E. From the Power BI Desktop menu, insert a Power Apps visual and include the required fields in the Power Apps data.

Answer: A,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 83

A company creates a Microsoft Power Apps app through the Power Apps designer portal for use in Microsoft Teams.

This app needs to be promoted to the user acceptance testing environment.

You need to complete the Microsoft recommended actions before you export the solution.

Which two actions should you complete? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Write validation tests.

B. Set the Optimized embedding appearance field to true.

C. Publish all changes.

D. Run the solution checker.

E. Clone a solution.

Answer: ([SHOW ANSWER](#)**)**

The Power Apps solution checker performs a rich static analysis check on your solutions against a set of best practice rules to quickly identify problematic patterns. After the check completes, you receive a detailed report that lists the issues identified, the components and code affected, and links to documentation that describes how to resolve each issue.

The solution checker analyzes these solution components:

Common Data Service plug-ins

Common Data Service custom workflow activities

Common Data Service web resources (HTML and JavaScript)

Common Data Service configurations, such as SDK message steps

NEW QUESTION: 84

You are embedding a Power Apps visual in a Power BI dashboard.

External customers must authenticate to have access to the dashboard.

You need to configure the solution.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Set the Power BI service to authenticate users.

B. Use a table in the Power BI dashboard.

C. Publish to Power BI Report Server.

D. Set the Power BI service to allow anonymous access.

E. Share the Power Apps visual components with external users.

Answer: A,E ([LEAVE A REPLY](#))

Power BI uses Azure Active Directory (AAD) to authenticate users who sign in to the Power BI service, and in turn, uses the Power BI login credentials whenever a user attempts to access resources that require authentication. Users sign in to the Power BI service using the email address used to establish their Power BI account; Power BI uses that login email as the effective username, which is passed to resources whenever a user attempts to connect to data. The effective username is then mapped to a User Principal Name (UPN) and resolved to the associated Windows domain account, against which authentication is applied.

NEW QUESTION: 85

You have a form that displays a custom field from an entity.
A customer wants to restrict users from filtering on the custom field.
You need to prevent users from filtering the field in Advanced Find.
What should you modify?

- A. Fields in the Edit Filter Criteria option of the Quick Find view
- B. the Field Security field on the Field Properties form
- C. a searchable field on the Field Properties form
- D. Fields in the Add Find Columns option of the Quick Find view

Answer: (SHOW ANSWER)

NEW QUESTION: 86

A company plans to implement AI Builder to add intelligence to several business processes.
Each business process uses different sources and produces different outputs.
You need to determine which AI Builder model types to use.
Which model types should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Recognition requirement	Model type
Identify a person’s age in a paragraph when written using the pattern twenty years old .	Entity extraction Text recognition Key phrase
Identify items and prices from an invoice.	Form processing Text recognition Object detection

Answer:

Recognition requirement	Model type
Identify a person's age in a paragraph when written using the pattern twenty years old .	Entity extraction Text recognition Key phrase
Identify items and prices from an invoice.	Form processing Text recognition Object detection

Reference:

<https://docs.microsoft.com/en-us/ai-builder/form-processing-model-overview>

<https://docs.microsoft.com/en-us/ai-builder/entity-extraction-overview>

NEW QUESTION: 87

A company is using Dataverse with a model-driven app. The app includes a table named Quotations.

Users in the system enter relevant details, such as customer, address, line items, and total amounts. The users then create a standardized report to manually populate the details.

The company requires the formatted report to be generated from the record and populated with the record details. The company does not want to purchase additional licenses.

You need to recommend a solution.

Which solution should you recommend?

- A. a Word template
- B. an Excel template
- C. an article template

Answer: (SHOW ANSWER)

NEW QUESTION: 88

You create a Power Virtual Agents chatbot to reduce the number of incoming support calls that require a live person.

The chatbot does not direct users to the correct information. You determine that this is because the chatbot is not able to identify which product a user is referring to in a conversation.

You need to present a list of products so that users can select the correct product.

What should you create?

- A. Table
- B. Variable
- C. Slot filling
- D. Entity

Answer: C (LEAVE A REPLY)

Slot filling is a natural language understanding concept that means saving an extracted entity to an object. However, in Power Virtual Agents, slot filling means placing the extracted entity value into a variable.

NEW QUESTION: 89

A company uses Power Apps.

The company plans to create a canvas app that uses a responsive design.

You need to configure the app.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Enable the lock orientation setting.

B. Configure the height and width properties by using a formula.

C. Disable the Scale to fit setting.

D. Configure the height and width properties by using drag handles.

Answer: B,C ([LEAVE A REPLY](#))

To create a canvas app that uses a responsive design in Power Apps, you should perform the following actions:

B). Configure the height and width properties by using a formula: By using a formula to set the height and width properties, you can ensure that the app will respond to changes in screen size and orientation. For example, you can use the Width() and Height() functions to set the width and height properties based on the size of the screen.

C). Disable the Scale to fit setting: The Scale to fit setting, when enabled, makes the app's content fit on the screen by scaling it down. To create a responsive app, this setting must be disabled.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/responsive-design>

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-width>

NEW QUESTION: 90

Your organization does not permit the use of custom code for solutions.

You need to create a view that can be viewed by all users in an organization.

Where should you create the view?

A. Microsoft Visual Studio

B. Maker portal

C. Advanced Find

D. System Settings

Answer: B ([LEAVE A REPLY](#))

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-edit-views-app-designer>

NEW QUESTION: 91

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating Power Virtual Agents chatbot that captures demographic information about customers.

The chatbot must determine the group a customer belongs to based on their age. The age groups are:

0 - 17

18 - 25

26 - 35

36 - 55

55 - 100

You need to configure the chatbot to ask a question that can be used to determine the correct age group.

Solution: Use Date and time for Identify in the question and then add branches that use conditional logic to determine the age group.

Does this meet the goal?

A. No

B. Yes

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 92

You need to set up the new service request completion process.

Which two components should you include in the solution? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. connection

B. business process flow

C. connection reference

D. Power Automate flow

Answer: ([SHOW ANSWER](#))

Topic 1, ADatum Corp.

Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background

ADatum Corporation provides verification and investigation services that are used by insurance companies, law firms, and other organizations in the public sector. Services include verifying an individual's background, qualifications, and specific scenarios that require onsite visit.

The thorough work ADatum Corporation performs results in highly accurate cases with minimal critical information missing. Because of these high-quality results, ADatum Corporation is quickly proving itself as one of the best in the industry. In recent months, business has significantly increased, with most new business czoming from high-profile companies and individuals.

Management has decided to create a new qualification verification (QV) role to help ensure that clients get the most accurate results. This role examines completed work to ensure that nothing is missed.

Current environment

Data storage and retention

All information sent by clients for services is stored in Microsoft Dataverse with a model-driven app as the interface.

Clients enter their data in a website, which then uses a service account to create the records in the Dataverse database.

Team members currently have full access to all Service Request records.

Service requests

The Service Request table includes header information about the individual or organization that is the subject of verification.

New Service Request records are assigned to a queue. All potential users who will be performing the verifications have access to these records.

A service request is assigned to a single user who will ensure that all qualifications are verified. This single user is the only one able to process Qualification records related to their own service requests.

Many required tasks when performing verification services are currently done by using manual processes.

To keep up with demand, ADatum Corporation identifies several processes that can be replaced by using Power Automate flows to hire fewer new staff and keep costs down.

Qualification verification

The qualification table contains details about an individual school degree, professional qualifications, and other qualifications that must be verified.

A service request can have one or more Qualification records associated with it.

Record status is pending verification until the initial team member finishes, at which point the member changes the status to Complete.

When all qualification records related to a service request are verified either by manual or automated processes, the results are made available to ADatum Corporation's client.

In the rare event that results are questioned, a new service request is created and verified independently of the previous work that took place.

To complete a service request, users perform the following actions:

Send a templated email by using Microsoft Outlook to the client after all qualifications for a service request are checked.

Change the service request status to Completed. Currently, service requests do not indicate when all Qualification records are addressed.

Microsoft Power platform environment

The following environments exist: development, testing, user acceptance testing (UAT), and production.

Managed solutions are used to move customizations from the development environment to other higher-level environments. These solutions are created and maintained by the power users and provided to internal IT for deployment when they are ready.

Two managed solutions, Verification Process Automation and Onsite Visit, share several components.

All customizations to Power Platform components are performed by several power users who have received training and are certified as subject matter experts.

Power users have been granted the System Administrator security role in the development environment.

Corporate policy prohibits power users from writing code due to lack of a formal code review process.

Internal IT will not be able to supply any development resources for this project due to a lack of staff. This means that any customizations and automation created for this project must be low-code/no-code for the power users to implement them.

Customizations created by power users are deployed by internal IT.

Requirements

Process automation

ADatum Corporation plans to establish a new QV department to verify completed work so that the quality of work is maintained. The new process for verifying professional qualifications must automate the following:

Enter data and navigate the authority's website. The authority website UI changes frequently because the company constantly improves the user experience.

Search page contents for a specified value to determine validity.

Update the corresponding Qualification record in Dataverse.

The new process for completing a service request must automate the following:

Set the Service Request record status to Complete when work on all Qualification records is finished.

Send an email to the client with the results when the service request is completed. The email must list each qualification as either Valid or Not Valid, depending on the verification.

Qualification verification

To check work done by a wide array of users, 10 percent of Qualification records must be double checked.

Qualification records must be automatically assigned to a queue.

Qualification records must be flagged with a new status field named Assigned to ensure that records are rechecked.

Ensure that only QV team members can change the status from Assigned to In Progress to Complete.

Record the name of the QV team member who performed the work and the date completed.

Governance and security

All components required for the verification process must be included in a new solution.

Corporate security requires that deployments to non-development environments must be automated using service accounts.

User security and data access must also be consistent across environments, except for the elevated access of the power users in the development environment.

The Onsite Visit managed solution has a table that is not in the Verification Process Automation managed solution. This table must be upgraded prior to the go-live date without the other shared components.

A VP of sales requires a test environment to demonstrate to potential clients the security policies that are included in their initial offering.

Issues

More employees than are required can access individual client information and continue to have access after a service request is completed.

When users go on vacation, all their outstanding Service Request records are assigned to a substitute employee. The substitute employees are unable to see all the qualifications related to their service requests.

Currently, testing the new QV functionality outside the development environment is not possible due to corporate security policies requiring the same security role across all environments.

Internal IT reports that the solution import to the test environment failed because of missing dependencies related to the flow for completing service requests.

NEW QUESTION: 93

You are creating Power BI reports for a company.

A company that has a model-driven app wants to use Power BI reports within the app. You create the reports.

You need to ensure that these reports are available within the app.

Which two actions should you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Add the Power BI report to a dashboard in the model-driven app.

B. Use the native reports in model-driven apps.

C. Add the Power BI report to the Site Map dashboards.

D. Create a PCF file.

E. Share the Power BI report to all users.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 94

You make the following customizations to a Microsoft Dataverse Environment

* Create a new table

* Add data to the new table.

* Delete an unused area from the site map.

The components must be transported to a different environment.

You need to determine the method required to transport each component.

Which method should you use? To answer, drag the appropriate methods to the correct components. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

NEW QUESTION: 95

You are customizing a model-driven app for a company. You create a Theme template to ensure the company logo and colors are properly used within these apps.

The theme must meet the following requirements:

Updated to add the logo

Downloaded by the makers to create the app

You need to configure the assets. To answer, drag the appropriate configurations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Configurations

Edit the theme in System settings and upload a jpg file.

Replace an existing UI item's hexadecimal number.

Upload the theme elements as new web resources.

Use the component library.

Answer Area

Requirement

Update logo.

Change model-driven app colors.

Configuration

Answer:

Configurations

Edit the theme in System settings and upload a jpg file.

Replace an existing UI item's hexadecimal number.

Upload the theme elements as new web resources.

Use the component library.

Answer Area

Requirement

Update logo.

Change model-driven app colors.

Configuration

Upload the theme elements as new web resources.

Replace an existing UI item's hexadecimal number.

NEW QUESTION: 96

A company uses Common Data Service to store sales data.

For the past few quarters, the company has experienced a decrease in sales revenue. The company wants to improve sales forecasting.

The company plans to use AI Builder to implement the solution. You select fields that will be used for prediction.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

ACTIONS

Export data from Common Data Service into Microsoft Excel

Train the category classification AI model by using Common Data Service data

Train the AI model by using data exported to Microsoft Excel

Publish the AI model

Use the model with Power Apps

Import the AI model analysis into Common Data Service

Train the prediction AI model by using Common Data Service data

ANSWER AREA

Answer:

Answer Area

Before you can use your prediction model, you have to train it to perform the way you want.

Publish the AI model

Use the model with Power Apps

- 1 - Before you can use your prediction model, you have to train it to perform the way you want.
- 2 - Publish the AI model
- 3 - Use the model with Power Apps

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-train-model>

NEW QUESTION: 97

You are a Dynamics 365 Customer Service system administrator.

Your organization does not permit the use of custom code for solutions.

You need to create a view that can be viewed by all users in an organization.

Where should you create the view?

- A.** Microsoft Excel template
- B.** Entities component of a solution
- C.** Microsoft Virtual Studio
- D.** Templates area

Answer: B ([LEAVE A REPLY](#))

Entity: Refers to a table in Dataverse. Table and entity are often used interchangeably for data access.

Edit public views through tables

In the solution create a new table or find an existing table that where the public views need to be edited.

Expand Data, select Tables, select the table you want, and then select the Views area.

On the toolbar, select Add view. Add view to table

On the Create a view dialog, enter a name and, optionally, a description, and then select Create.

NEW QUESTION: 98

A company uses Microsoft Teams. You plan to create a Power Apps app for Microsoft Teams.

You need to determine the environment that will be used by the app.

Which environment will the app use?

- A.** An existing Dataverse environment that you select.
- B.** An existing Dataverse for Teams environment that you select.
- C.** A Dataverse environment that is automatically created for the team.
- D.** A Dataverse for Teams environment that is automatically created for the team.

Answer: D ([LEAVE A REPLY](#))

The Dataverse for Teams environment is automatically created for the selected team when you create an app or bot in Microsoft Teams for the first time or install a Power Apps app from the app catalog for the first time. The Dataverse for Teams environment is used to store, manage, and share team-specific data, apps, and flows. Each team can have one environment, and all data, apps, bots, and flows created with the Power Apps app inside a team are available from that team's Dataverse for Teams database.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/about-teams-environment>

NEW QUESTION: 99

You have a canvas app with an embedded Power BI tile.

You share the canvas app. Users report that they are unable to access the Power BI content.

You need to determine why users are unable to access the content

What is the cause of the user's problems?

- A.** The Power BI dashboard is not shared.
- B.** The Power BI interactions property on the Power BI tiles is set to Off.
- C.** The Power BI connection is not shared.
- D.** The Power BI Display mode property on the Power BI tiles is set to Disabled

Answer: A ([LEAVE A REPLY](#))

When embedding a Power BI tile in a Canvas app, there are several factors that must be considered in order to ensure that users have access to the content. One of the most important is sharing the Power BI dashboard that the tile is embedded in. If the dashboard is not shared with the users, they will not be able to view the content in the tile.

To share a Power BI dashboard, you must have the "Edit" permission for the dashboard. Once you have this permission, you can share the dashboard with other users by following these steps:

Open the Power BI service and navigate to the dashboard that you want to share.

Click the "Share" button in the top-right corner of the dashboard.

In the "Share" pane that appears, enter the email addresses of the users that you want to share the dashboard with.

Select the level of access that you want to grant to the users. You can choose to give them "View" access, which allows them to view the dashboard but not make changes, or "Edit" access, which allows them to view and make changes to the dashboard.

Click the "Share" button to share the dashboard with the users.

Additionally, there are other factors that could cause user's problems:

B . The Power BI interactions property on the Power BI tiles is set to Off. In that case, the user's won't be able to interact with the visuals.

C . The Power BI connection is not shared. In that case, the user's won't have the access to the data source D . The Power BI Display mode property on the Power BI tiles is set to Disabled, in that case the user's won't see the tile It is important to check all of these factors and ensure that they are properly configured in order to ensure that users have access to the content.

When embedding a Power BI tile in a Canvas app, there are several factors that must be considered in order to ensure that users have access to the content. One of the most important is sharing the Power BI dashboard that the tile is embedded in. If the dashboard is not shared with the users, they will not be able to view the content in the tile.

NEW QUESTION: 101

You need to design and create the solution for gathering contact information from guests for marketing purposes.

What should you use? To answer, select the appropriate options In the answer area.

NOTE: Each correct selection is worth one point.

Action	Solution
Extract business card data.	AI Builder Common Data Service Power Virtual Agents Power Automate
Implement the contact gathering solution.	Create a new entity extraction component. Integrate the solution with Azure Cognitive Services. Use a prebuilt AI model.

Answer:

Action	Solution
Extract business card data.	AI Builder Common Data Service Power Virtual Agents Power Automate
Implement the contact gathering solution.	Create a new entity extraction component. Integrate the solution with Azure Cognitive Services. Use a prebuilt AI model.

NEW QUESTION: 102

You are creating tables for use with Microsoft Power components.

The display names of the tables must not be changed when the solution is promoted to the user acceptance testing environment.

You need to apply this restriction to the solution,

Where should you make the changes?

- A. Managed solution
- B. Unmanaged solution
- C. Power Apps
- D. Segmented solution
- E. Default solution

Answer: A (LEAVE A REPLY)

NEW QUESTION: 103

A company uses a model-driven app for customer support. The company has the following requirements for the app:

* Send an email in real-time to customers when they enter their email address.
* Send an email to customers at the same time every day for cases that are open for more than 24 hours.
The solution should require the least amount of customization.
You need to configure the model-driven app.
Which components should you use?

Components

Power Apps component framework (PCF) control

Classic workflow

Power Automate flow

JavaScript

Answer Area

NEW QUESTION: 106

A company uses a model-driven app. The app uses a Power Virtual Agents chatbot.

The company has two locations in different countries/regions with separate environments for each location. Each location has a development environment, a testing environment, and a production environment. The company uses the Application Lifecycle Management (ALM) process for the environments.

You need to create the different Power Virtual Agents bot environments.

How many Power Virtual Agents bot environments are required?

- A. 1
- B. 2
- C. 3
- D. 6

Answer: D ([LEAVE A REPLY](#))

When a company uses a model-driven app that incorporates a Power Virtual Agents chatbot, and has multiple locations with different environments for each location, it is necessary to create separate Power Virtual Agents bot environments for each location.

For each location, 3 different environments are required: development, testing, and production. This is in line with the Application Lifecycle Management (ALM) process that the company uses.

In total, 6 Power Virtual Agents bot environments are required: 2 locations x 3 environments per location = 6.

It's worth mentioning that Power Virtual Agents allows to export and import the bot, so once you configure the bot in one environment, you can import the bot to the other environments, this way you don't need to start from scratch.

NEW QUESTION: 110

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it As a result, these questions will not appear in the review screen.

On a Contact record, a user creates a Note record that contains the word running.

One week later, the user reports that they cannot find the Contact record associated with the Note record.

You need to find the Note record.

Solution: Use Dataverse Search to search for the word run.

Does the solution meet the goal?

A. Yes

B. No

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 111

A company is developing several Power Virtual Agents chatbots. The company manufactures more than 1,000 different products.

The chatbots must prompt users to enter or select a product.

You need to store the model information so that it can be reused across all chatbots.

Where should you store the model data?

A. Multiple choice options

B. Global variables

C. Custom entities

D. Topics

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 112

You plan to implement Microsoft Dataverse.

You must track changes for two columns in the Account table. You must maintain a historical log of changes for the two columns and track only what is necessary. You configure the appropriate organization settings.

You need to configure the system to track changes for the two columns.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Enable auditing for the Account table.

B. Enable auditing for the two specific columns.

C. Enable change tracking for the Account table.

D. Enable change tracking for the two specific columns.

Answer: A,B ([LEAVE A REPLY](#))

By setting the IsAuditEnabled property of a table's definition and the IsAuditEnabled property of each desired column's definition to true, data changes to records of those tables can be logged by the platform.

Note: There are three levels where auditing can be configured: organization, table, and column. The organization level is the highest level, followed by the table level, and finally the column level. For column auditing to take place, auditing must be enabled at the column, table, and organization levels. For table auditing to take place, auditing must be enabled at the table and organization levels.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/configure-entities-attributes-auditing>

NEW QUESTION: 113

A company is implementing Power Apps and Power Automate.

Several components are created within Power Apps. Microsoft Dataverse. and Power Automate. These components must be promoted from the development environment to the user acceptance test environment in a single solution package.

You need to create the solution package for promotion.

Where should you create the package?

A. Office 365 admin center

B. Azure DevOps

C. Power Apps designer

D. Microsoft Power Platform admin center

E. Azure portal

Answer: E ([LEAVE A REPLY](#))

A solution package is a bundle of components, such as Power Apps, Power Automate, and Microsoft Dataverse, that can be promoted from one environment to another. To create the solution package for promotion in a company that is implementing Power Apps and Power Automate, the package should be created in the Microsoft Power Platform admin center.

In the Power Platform admin center, you can create a solution package that includes the necessary components and export it as a .zip file. This file can then be imported into the desired environment, such as the user acceptance test environment, to promote the components.

NEW QUESTION: 114

A company plans to create an app by using Power Apps. The company has the following requirements:

- * The app must be able to enter data into Microsoft SharePoint
- * Users must be able to add the app into Microsoft Teams.

You need to recommend which app to create. Which type of app should you recommend?

- A.** model-driven app as a tab app
- B.** canvas app as a personal app
- C.** canvas app as a tab app
- D.** model-driven app as a personal app

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 115

You are building a Power Pages site for a supermarket chain.

The company plans to have the managers of individual stores use the site. Managers will authenticate on the site each week by using their corporate identity to update stock information for their store. Managers must be able to add and update stock information for their store only.

You need to configure the site security.

Solution: Configure table permissions.

Does the solution meet the goal?

- A.** Yes
- B.** No

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 116

A company plans to implement Power Pages.

The company requests that you create demonstration sites based on the following requirements:

- * A website that supports automated scheduling
- * A website that supports event registration
- * A website that can be extended by using the company's branding

In addition, custom development work must be minimized.

You need to identify the appropriate Power Pages templates to use.

Which templates should you use? To answer, drag the appropriate templates to the correct requirements. Each template may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Templates	Requirement	Template
after school program	Automated scheduling	
blank page	Event registration	
building permit	Extension by using branding	
financial institution		

Answer:

Templates	Requirement	Template
after school program	Automated scheduling	financial institution
blank page	Event registration	after school program
building permit	Extension by using branding	blank page
financial institution		

NEW QUESTION: 117

A company uses a model-driven app with Microsoft Dataverse in a single environment. The company requires a canvas app that includes the same data as the model-driven app. You need to create the canvas app.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Select the Excel option.	
Sign into the Microsoft Power Platform admin portal.	
Sign into the Power Apps Maker portal.	
Select the Dataverse option.	
Select the data source and tables to include in the canvas app and then save the app.	

Answer:

Answer Area

Sign into the Power Apps Maker portal.

Select the Dataverse option.

Select the data source and tables to include....

- 1 - Sign into the Power Apps Maker portal.
- 2 - Select the Dataverse option.
- 3 - Select the data source and tables to include....

NEW QUESTION: 118

You need to set up webpage permissions.

Which permissions must you set? To answer, move the appropriate permissions to the correct page. You may use each permission once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 119

You are a Dynamics 365 administrator for a veterinarian clinic.

On the client appointment form, there is a dropdown field for clients to select their type of pet. If a client selects the option Other, the veterinarian wants a text field to appear so that additional details can be added.

You need to create a dynamically visible field.

What should you configure?

- A. filed visibility on the form
- B. business process flow
- C. workflow
- D. business rule

Answer: D ([LEAVE A REPLY](#))

Reference:

<https://www.sherweb.com/blog/dynamics-365/configuring-business-rules-within-microsoft-dynamics-365-crm/>

NEW QUESTION: 120

You are building a Power Pages site for a supermarket chain.

The company plans to have the managers of individual stores use the site. Managers will authenticate on the site each week by using their corporate identity to update stock information for their store. Managers must be able to add and update stock information for their store only.

You need to configure the site security.

Solution: Use Microsoft Entra ID authentication.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 121

You are setting up Power Apps security for a company. The company has a CEO, two vice presidents, and 10 managers. Five support representatives report to each manager.

You set up Manager Hierarchy so managers are able to view data only for the representatives who report to them. The CEO must be able to view all data for everyone. All support representatives must be able to view customer information in each other's data across all managers.

You need to resolve issues that arise during testing.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Issue

Managers are unable to view all their report data.

Action

Add the manager's name to the representative's user record.
Change the Manager Hierarchy depth to 2.
Move the manager and reports to a separate business unit.
Set up a position in hierarchy.

The CEO is unable to view representative data but can view manager data.

Add the CEO to the representative user record as a manager.
Change Manager Hierarchy depth to 3.
Create team security.

Five support representatives can view only their own data.

Add the manager's name to the representative's user record.
Add users to field security.
Set up a position hierarchy.

Answer:

Issue	Action
Managers are unable to view all their report data.	▼ Add the manager's name to the representative's user record. Change the Manager Hierarchy depth to 2. Move the manager and reports to a separate business unit. Set up a position in hierarchy.
The CEO is unable to view representative data but can view manager data.	▼ Add the CEO to the representative user record as a manager. Change Manager Hierarchy depth to 3. Create team security.
Five support representatives can view only their own data.	▼ Add the manager's name to the representative's user record. Add users to field security. Set up a position hierarchy.

NEW QUESTION: 122

A company creates a bot by using Power Virtual Agents.

The company requires the bot to transfer callers to an agent if the bot is unable to recognize a customers request.

You need to configure the bot for the unrecognized information from the customer.

Which feature should you use?

- A. Fallback workstream
- B. Fallback topic
- C. Fallback skill
- D. Fallback queue
- E. Fallback entity

Answer: B ([LEAVE A REPLY](#))

A Fallback topic is a type of topic in Power Virtual Agents that is used when the bot is unable to understand the customer's request. When a Fallback topic is triggered, it takes over the conversation and presents the customer with a set of options or a message that allows them to get the help they need. This can include options such as requesting to speak with an agent, providing feedback, or getting more information about the bot's capabilities. Fallback topic can be configured to automatically transfer the customer to an agent.

NEW QUESTION: 123

You need to set up the capability to view the change history for the food type and amount.

What should you set up? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 124

You need to embed the check-in solution into the communication solution. To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

What must you use to embed the check-in solution?

Visual Studio
Power Apps Web Studio
AI Builder
Common Data Service

Where must the check-in solution be available within the communication solution?

chat section of the solution
Microsoft 365 Apps selection grid
in an embedded webpage
in a tab

Answer:

Topic 3, Bellows College Case Study

Overview

Bellows College is a post-secondary school that wants to start a football team. The college uses Microsoft Power Platform to manage its recruiting efforts. The registration team and assistants use model-driven apps. The coaches use canvas apps on their mobile devices.

Prospects are considered underage if they are younger than 18 years old at the time of registration.

Environment

- * Custom code is not allowed in the system.
- * Server-side synchronization is configured for emails, appointments, contacts, and tasks.
- * The database and file storage of Dataverse must be minimized to keep costs low.

Contact table

- * Birthdate is a custom date and time field.
- * Age at Registration is a calculated Field that displays the age of the prospect at the time of registration.
- * Current Age is a calculated field that displays the age of the prospect based on the current date and time.

Evaluation Table

- * The Evaluation table is a custom table used to track evaluation criteria.
- * Evaluation records cannot be manually created.
- * Users must not be able to continue until an evaluation record is created automatically for the prospect.

Consent table

- * The consent forms completed by the parents are stored as records in the Consent table.
- * Occasionally, a parent cannot complete the consent online and a paper copy must be printed. The signed copy must be scanned and stored with the consent record.

team website

- * The consent forms completed by the parents are stored as records in the Consent table.
- * Occasionally, a parent cannot complete the consent online and a paper copy must be printed. The signed copy must be scanned and stored with the consent record.

Requirements

- * The team website is created by using Power Pages.
- * A starter layout template was used to create the site.
- * The site consists of five pages:
 - o Home: A page open to everyone to view the announcements from the team,
 - o Schedule: A page open to everyone to view the tryout and game schedule,
 - o Evaluations: A page that displays tracking from the evaluation table.

Prospects are able to view their own information only.

- o Forms: A page that displays the consent form,
- o Contact Us: A page for anyone to submit questions and comments.
- * Two web roles for authenticated users are created: Primary Contact User and Prospect User.
- o All primary contacts and prospects are assigned to their respective roles.

Registration

- * Parents and prospects are created as contacts and must be linked.
- * The registration team must be able to rapidly create prospects without navigating away from the Parents form. Only the First Name, Last Name, and Birthdate fields should be displayed for the team.
- * Assistants must be able to update prospect information and add teams that the prospect has previously played on to a subgrid.

Parent consent

- * When a prospect is underage, a Primary Contact field will appear. The field must be populated before the prospect record can be saved.
- * A view named Underage Prospects that lists all underaged prospects is required.
- * The Underage Prospects view must run once a week without requiring modifications to display correct information.
- * A consent email must meet the following requirements:
 - o be sent to the primary contact of each new underage prospect
 - o contain a link to the team website
 - o be automatically sent weekly and tracked to the contact record in Dataverse
 - o include the current date using the full month name, date, and year
- * Evaluations
- * Coaches rate prospects each day on a scale of 1-10 in three categories: endurance, coordination, and skill.
- * The total of the three categories is displayed at the bottom of the form. If the total for the day is greater than 25, the number should appear green.

NEW QUESTION: 125

A company is using a model-driven app in a production environment.

You must set up server-side synchronization for all users to connect with the company's Exchange Online instance.

You need to determine the locations to use to complete the configuration.

Where should you navigate to? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Server-side synchronization interfaces

Configuration step	Interface
Set up the server profile.	Microsoft Power Platform admin center Maker portal solution Microsoft Power Platform admin center Exchange admin center
Set default processing.	System settings System settings Personalization settings
Approve email.	User mailbox in Dataverse User mailbox in Dataverse Exchange admin center
Test and enable mailboxes.	User mailbox in Dataverse User mailbox in Dataverse Exchange admin center

Answer:

NEW QUESTION: 126

You are creating a Power Automate cloud flow. The cloud flow will create several SharePoint Online list items based on a variety of conditions.

If any of the dependent SharePoint Online actions fail, you must revert the changes while the automation runs.

You need to design the cloud flow to meet the requirement.

Which two actions should you implement for the design? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Retrigger the flow run.

- B. Perform a changeset request action.
- C. Add a scope.
- D. Set Run After to Has failed

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 127

You need to embed the business card solution in the check-in app.

What you use?

- A. control
- B. Button control
- C. AI Builder component
- D. Custom component

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 128

You create a new independent software vendor (ISV) solution for a Power Apps app.

The Power Apps solution will be imported into multiple customer environments. The environments will have a large variety of solutions and publishers.

You need to avoid naming conflicts during solution import.

Which element should you configure?

- A. Package type
- B. Configuration page
- C. Marketplace
- D. Prefix
- E. Version

Answer: D ([LEAVE A REPLY](#))

A solution publisher includes a prefix. The publisher prefix is a mechanism to help avoid naming collisions. This allows for solutions from different publishers to be installed in an environment with few conflicts. For example, the Contoso solution displayed here includes a solution publisher prefix of contoso.

NEW QUESTION: 129

You need to ensure that an appropriate date is selected for dog pickup.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 130

You are a Dynamics 365 Customer Engagement administrator. You create workflows to automate business processes. You need to configure a workflow to meet the following requirements:

- * Be triggered when a condition is met.
- * Run immediately.
- * Perform an action when a condition is met.

How should you configure the workflow? To answer, select the appropriate configuration in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Workflow Requirement	Configuration Option
Be triggered when a condition is met.	☐ Publish workflow. ☐ Subject contains data. ☐ Trigger when a Microsoft Flow button is pressed.
Run immediately.	☐ Approve the workflow. ☐ Configure the workflow to run now. ☐ Configure child workflow to run now.
Perform an action when a condition is met.	☐ Send an email. ☐ View chart. ☐ Update a security role.

Answer:

Answer Area

Workflow Requirement	Configuration Option
Be triggered when a condition is met.	☐ Publish workflow. ☒ Subject contains data. ☐ Trigger when a Microsoft Flow button is pressed.
Run immediately.	☐ Approve the workflow. ☒ Configure the workflow to run now. ☐ Configure child workflow to run now.
Perform an action when a condition is met.	☐ Send an email. ☐ View chart. ☐ Update a security role.

NEW QUESTION: 131

You are using the Data import wizard to import records into the account table from a CSV file.

The CSV-to-table mapping is as following:

- * Name column represents the account and maps to the Account column.
- * TIE Parent Name column represents the holding company of the account with subsidiaries underneath Records that are imported into the table are only related to other records in the file.

You need to configure the import to create the relationship between records.

What should you do?

- A. Map Parent Name in the CSV file to the Parent Account column. Select Account as lookup criteria
- B. Lookup the record IDs Of the records in the ParentAccount column. Add the record IDs new column in the file. Map the new column to the ParentAccount column.
- C. Map Parent Name in the file to the Parent Account column. Select Parent Account as lookup criteria
- D. Create an alternate key the account table by using the Account Name column. DO not map parent Name in file.

Answer: C (LEAVE A REPLY)

Add a new column for the self-referential mapping.

NEW QUESTION: 132

A company is creating a business process flow in Power Automate to analyze the probability that a customer will buy a specific product.

The company uses ratings from zero to one hundred. The company assigns likelihoods based on the following table:

Rating	Likelihood that customer will buy product
0-35	Low
36-60	Medium
60-75	High
Greater than 75	Very High

You need to define the business process steps. All logic must be included in a single evaluation statement.

Which step should you use? To answer, drag the appropriate steps to the correct ratings. Each step may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

NEW QUESTION: 134

You need to assign 10 percent of the Qualification records to the QV queue through table configuration by using a Power Automate flow. What should you do?

- A. Create an autonumber column on the Qualification table and assign its qualification records if the number cleanly divides by 10.
- B. Create a calculated column on the Service Request table that sums the number of qualification records, generates a random number between zero and the number from the new field, and assigns each qualification record if the number generated is 10 percent or less of the value of the new field.
- C. Create a roll-up column on the Service Request table that is the count of qualification records, generates a random number between zero and the number from the new field, and assigns each qualification record if the number generated is 10 percent or less of the value of the new field.
- D. Create an autonumber column on the Service Request table and assign its qualification records if the number cleanly divides by 10.

Answer: (SHOW ANSWER)

NEW QUESTION: 135

You are creating a business process flow for a Power Apps app. The business process flow must meet the following requirements:

- * Must be available offline.
- * Send an email to the team when a record is created.

You need to set up business process flow. What should you do? To answer, select the appropriate options in the answer are a. Each correct selection is worth one point

Requirement

Make it available offline.

Configuration

Ensure that the business process flow is referencing one table.
Ensure that the business process flow is referencing two tables.
Ensure that the business process flow is referencing one table per stage.

Create a step.
Create a stage.
Create a required column.

Answer:

Requirement

Make it available offline.

Configuration

Ensure that the business process flow is referencing one table.
Ensure that the business process flow is referencing two tables.
Ensure that the business process flow is referencing one table per stage.

Create a step.
Create a stage.
Create a required column.

NEW QUESTION: 136

You need to configure the Deposit column.

How should you write the formula?

- A. 'Adoption Fee" 0.20
- B. Decimal ('Adoption Fee') 0.20
- C. Decimal ('Adoption Fee" 20%)
- D. Adoption Fee' "20%

Answer: A (LEAVE A REPLY)

NEW QUESTION: 140

A company uses model-driven apps.

Users in the sales department enter the first name, last name, and phone number of customers in the app. The users request a single screen in the app to enter the customer data.

You need to configure the app.

What should you do?

- A. Create a canvas app.
- B. Modify the site map.

- C. Create a Power Automate flow.
- D. Use a Power Virtual Agents app.

Answer: B ([LEAVE A REPLY](#))

To configure a model-driven app in order to provide a single screen for the sales department users to enter the customer data, you should modify the site map of the app. A site map is a hierarchical representation of the different areas and functionality of the app, and it can be modified to create a new screen or view that combines the necessary fields for the customer data entry.

Once the site map is modified, you can add the necessary fields (first name, last name, and phone number) to the new screen or view, and make it accessible to the sales department users.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/model-driven-apps-overview>

<https://docs.microsoft.com/en-us/power-platform/admin/modify-site-map>

NEW QUESTION: 141

You create a Power Platform help Desk solution.

You need to create a dashboard that displays information on help desk cases that are handled each week.

Which dashboard components should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Component type
Add a tag chart by using opened cases.	System chart Personal dashboard Area chart
Add a stacked column chart shared with your team.	System chart Personal dashboard Area chart
Add a Microsoft Power BI visualization.	System chart Personal dashboard Area chart
Add a chart from a view that a user creates.	System chart Personal dashboard Area chart
Add a doughnut chart that shows cases by owner.	System chart Personal dashboard Area chart

Answer:

Requirement	Component type
Add a tag chart by using opened cases.	▼ System chart Personal dashboard Area chart
Add a stacked column chart shared with your team.	▼ System chart Personal dashboard Area chart
Add a Microsoft Power BI visualization.	▼ System chart Personal dashboard Area chart
Add a chart from a view that a user creates.	▼ System chart Personal dashboard Area chart
Add a doughnut chart that shows cases by owner.	▼ System chart Personal dashboard Area chart

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-edit-system-chart>

NEW QUESTION: 142

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses a Dataverse environment. The environment is accessed from canvas and model-driven apps.

The Dataverse environment contains a table that has the following columns:

- * Name
- * Company
- * Contacted On

The company requires that the table not contain any duplicate rows when users create data in the environment. You need to implement a solution that meets the requirement.

Solution: Create a business rule for the columns.

Does the solution meet the goal?

A. Yes

B. No

Answer: B ([LEAVE A REPLY](#))
