NEW QUESTION: 1

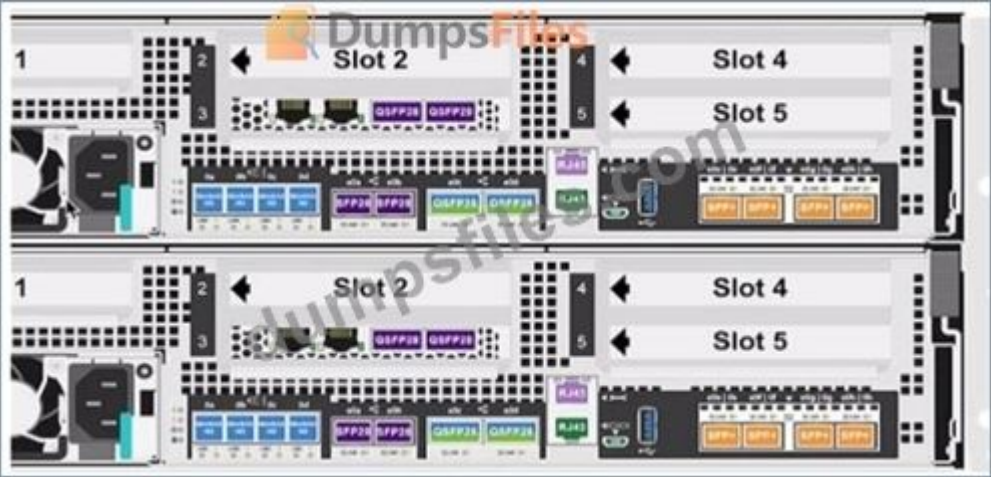

You are provisioning an SQL database VM on an AFF A400 and perform database migration operations that result in many duplicate blocks in the hosting VMFS datastore. In this scenario, which two efficiency features are helpful? (Choose two.)

- A. encryption
- B. inline compression
- C. postprocess compression
- D. deduplication

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 2

Exhibit.

You are adding a NetApp AFF A400 system to an existing 4-node cluster and want to know which ports you would use to expand your cluster. Referring to the exhibit, which tool would you use to accomplish this task?

- A. NetApp Hardware Universe (HWU)
- B. NetApp Interoperability Matrix (IMT)
- C. Active IQ Unified Manager
- D. Active IQ Conflg Advisor

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 3

The source NAS volume of a SnapMirror relationship is unavailable due to networking issues at your organization's primary data center. You want to make the destination NAS volume writable so that clients are able to access their data.

Which two steps do you need to take to solve the issue? (Choose two.)

- A. Break the SnapMirror relationship using the snapmirror break command from the source cluster.
- B. Break the SnapMirror relationship using the snapairrcr break command from the destination cluster.
- C. Use the volume mount command to mount the NAS volume in the NFS namespace.
- D. Delete the SnapMirror relationship from the destination cluster.

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 4

You have a 50 TB FlexGroup volume that is serving NFSv3 on a FAS8300 HA pair that is running ONTAP 9.8 software of files. A Linux du command runs for days to count files. In this scenario, which native ONTAP feature will report real-time file counts?

- A. volume autosize
- B. File System Analytics
- C. Quality of Service
- D. Logical Space Reporting

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 5

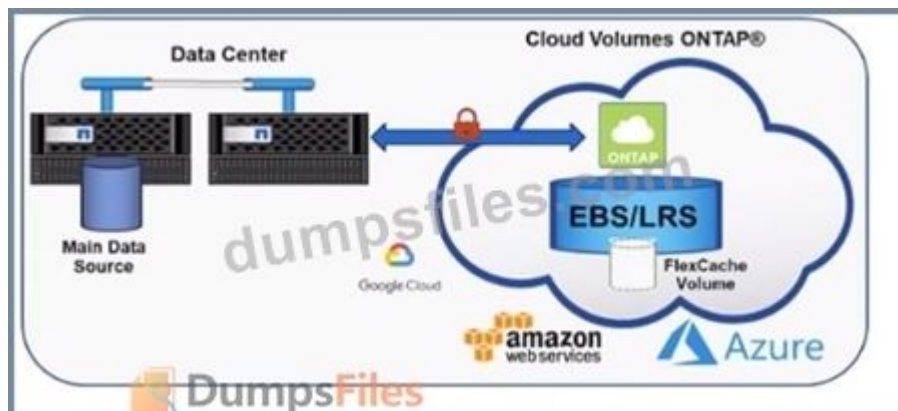

You are asked by your network engineering team to make sure that your NetApp cluster is configured to run LACP on its network ports. Which network component satisfies this request?

- A. VLAN
- B. failover group
- C. Interface group
- D. broadcast domain

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

Exhibit.

You are caching on-premises ONTAP volumes into the cloud with Cloud Volumes ONTAP as shown in the exhibit. In this scenario, which two protocols are supported? (Choose two.)

- A. NFS
- B. SMB
- C. iSCSI
- D. NVMe

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 7

You have deployed an ONTAP C190 cluster enabled with the iSCSI protocol. Your manager asks for available options to protect the data on your cluster using the native SnapMirror technology. In this scenario, which two products would satisfy this request? (Choose two.)

- A. ONTAP Select
- B. Cloud Volumes ONTAP
- C. Cloud Volumes Service for AWS
- D. Azure NetApp Files

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 8

You are attempting to establish a SnapMirror relationship between your ONTAP cluster (AcmeClus01) and a partner company's ONTAP cluster (WidgetsClus01). The clusters are unable to establish a peering relationship. You perform a packet capture on WidgetsClus01 and do not see any packets from AcmeClus01. You also discover that the IP subnet that is used for WidgetsClus01's intercluster LIFs overlaps with a local subnet at your company.

In this scenario, which feature would enable AcmeClus01 and WidgetsClus01 to peer with each other?

- A. VLANs
- B. broadcast domains
- C. IPspaces
- D. ONTAP subnets

Answer: C ([LEAVE A REPLY](#))

https://kb.netapp.com/Advice_and_Troubleshooting/Data_Protection_and_Security/SnapMirror/How_to_create_and_configure_Cluster_Peering_with_designated_InterCluster_LIFs_using_IPspaces

NEW QUESTION: 9

A volume is set to use Adaptive QoS with the default policy.

In this scenario, which change would affect the QoS throughput ceiling?

- A. Data is added to the volume.
- B. Disks are added to the volume's aggregate.
- C. More clients access the volume.
- D. The volume is resized.

Answer: ([SHOW ANSWER](#))

Reference:

https://kb.netapp.com/Advice_and_Troubleshooting/Data_Storage_Software/ONTAP_OS/What_is_Adaptive_QoS_and_how_does_it_work

NEW QUESTION: 10

Exhibit.

```

CLUSTER-01::> lun show -instance
Vserver Name: svm500
  LUN Path: /vol/LUN0/LUN0
  Volume Name: LUN0
  Qtree Name: ""
  LUN Name: LUN0
  LUN Size: 100GB
  OS Type: vmware
  Space Reservation: enabled
  Serial Number: 800Nc$QfenwV
  Serial Number (Hex): 3830304e63245166656e7756
  Comment: VMware Host
  Space Reservations Honored: true
  Space Allocation: disabled
  State: online
  LUN UUID: daf3b456-cf79-4535-878b-4e43872836cc
  Mapped: mapped
Physical Size of Logical Block: 512B
  Device Legacy ID: -
  Device Binary ID: -
  Device Text ID: -
  Read Only: false
  Fenced Due to Restore: false
  Used Size: 0
  Maximum Resize Size: 1023GB
  Creation Time: 2/9/2021 17:59:56
  Class: regular
  Node Hosting the LUN: CLUSTER-01
  QoS Policy Group: -
  QoS Adaptive Policy Group: -
  Caching Policy Name: -
  Clone: false
  Clone Autodelete Enabled: false
  Inconsistent Import: false
  Application: -

CLUSTER-01::> igroup show
Vserver  Igroup    Protocol OS Type  Initiators
-----
svm500   ESX       iscsi   vmware   -

```

You create a storage virtual machine (SVM) called SVM500 that is provisioned for iSCSI. After creating a LUN in the SVM and mapping it to an igroup, the attached VMware hosts are unable to mount the LUN.

Referring to the exhibit, what is the issue?

- A. The igroup contains the wrong protocol.
- B. The initiator is a member of igroups of different OS types.
- C. The igroup does not contain the appropriate initiators.
- D. The igroup contains multiple Initiators.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 11

Click the Exhibit button.

You have a Linux host that is unable to access the namespace shown in the exhibit.
What is causing the problem?

- A. The block size must be 8 KB to support the Linux host filesystem.
- B. Additional LIFs are required to support the Linux host.
- C. Additional NVMe namespaces are required for the Linux host.
- D. A subsystem containing the Linux host's NQN must be provisioned.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 12

Exhibit.

Vserver	Logical Interface	Status Admin/Oper	Network Address/Mask	Current Node	Current Port	Is Home
Cluster						
	Cluster1_Node1_Clus1	up/up	169.254.170.170/16	Cluster1_Node1_Clus1	e0a	false
	Cluster1_Node1_Clus2	up/up	169.254.69.110/16	Cluster1_Node1_Clus2	e0b	false
	Cluster1_Node2_Clus1	up/up	169.254.64.19/16	Cluster1_Node2_Clus1	e0a	false
	Cluster1_Node2_Clus2	up/up	169.254.238.93/16	Cluster1_Node2_Clus2	e0b	false

After an ONTAP upgrade, you notice that several cluster LIFs are not on their home ports as shown in the exhibit.
Which LIF option would change this outcome?

- A. the subnet-name option
- B. the failover-policy option
- C. the auto-revert option
- D. the data-protocol option

Answer: C (LEAVE A REPLY)

https://docs.netapp.com/us-en/ontap/networking/revert_a_lif_to_its_home_port.html

NEW QUESTION: 13

You are creating a NAS volume for vSphere.

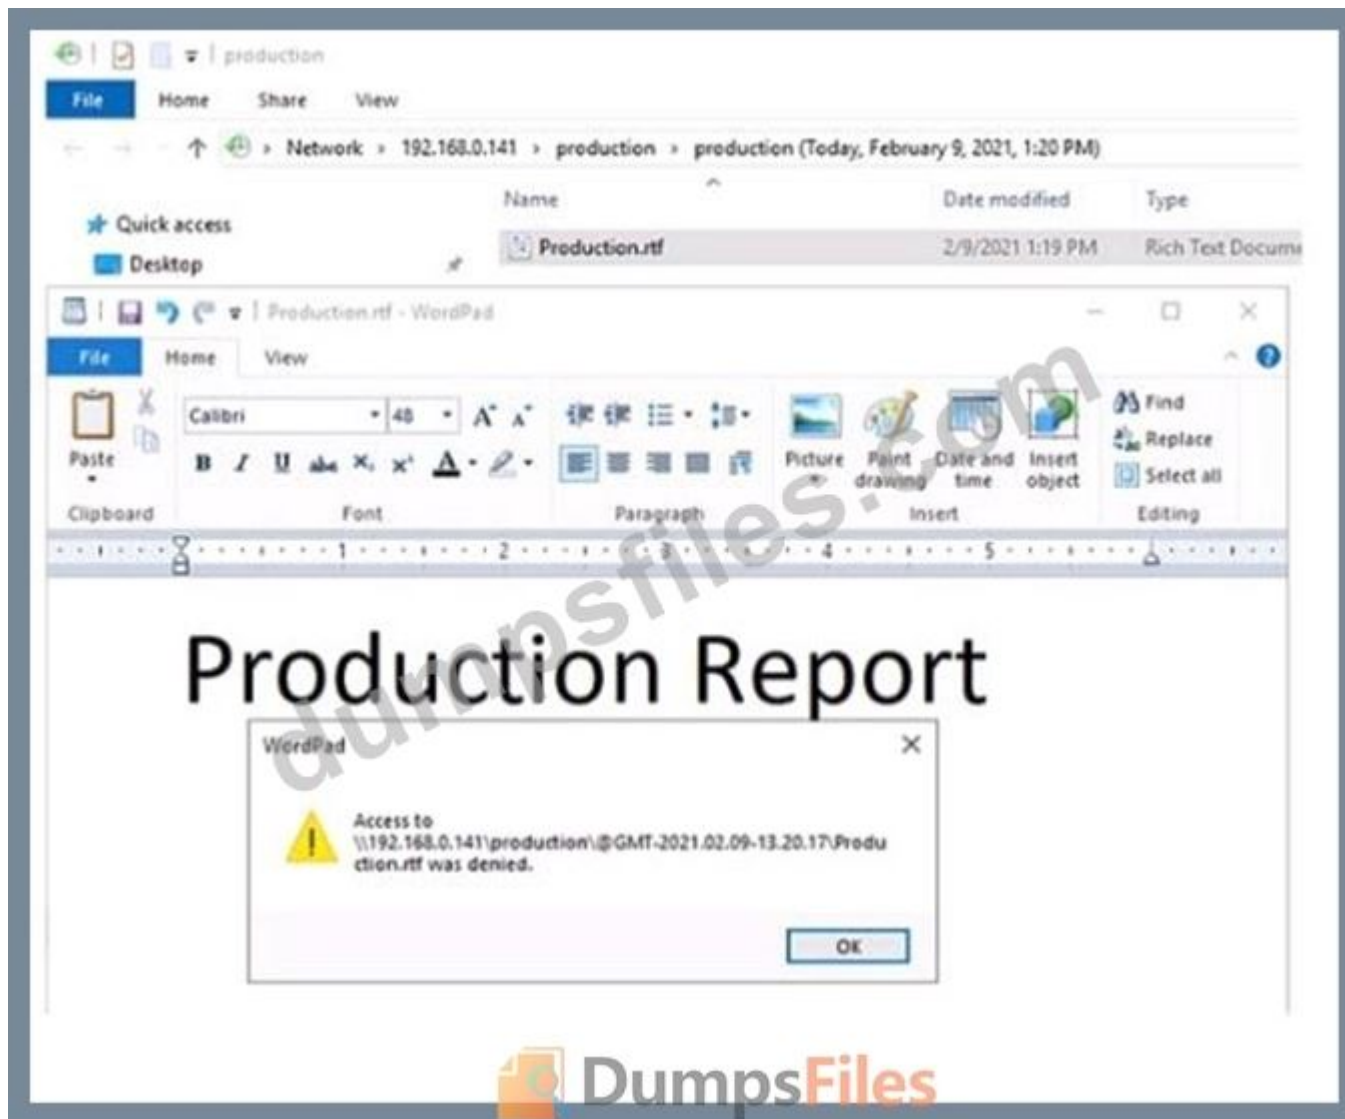

In this scenario, which two elements must be present when you perform this task? (Choose two.)

- A. iSCSI license
- B. NFS license
- C. SVM
- D. CIFS license

Answer: (SHOW ANSWER)

NEW QUESTION: 14

Exhibit.

A user cannot save a file on an ONTAP SMB share.

Referring to the exhibit, which action allows the user to save the file?

- A. Let the user save the file to a writeable location.
- B. Allow the file type *, rtf In the CIFS Server fpolicy.
- C. Synchronize the ONTAP Cluster time to the Active Directory time.
- D. Set the user permission for the share to write.

Answer: (SHOW ANSWER)

NEW QUESTION: 15

After creating an SVM In an ONTAP cluster, you are asked to delegate administration of the newly created SVM to an SVM administrator. In this scenario, which two tasks must you complete? (Choose two.)

- A. Configure role-based access control (RBAC) for the vsadmin user account.
- B. Set a password for the vsadmin user account.
- C. Create a LIF for SVM management.
- D. Create the vsadmin user account in the new SVM.

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 16

Which two storage efficiencies are enabled by default on NetApp AFF systems? (Choose two.)

- A. postprocess zero block detection
- B. Inline compression
- C. Inline deduplication
- D. postprocess compaction

Answer: (SHOW ANSWER)

Valid NS0-162 Dumps shared by TrainingDump.com for Helping Passing NS0-162 Exam! NEW QUESTION: 17

You are planning an installation of a new stack of shelves to an HA pair and need to locate empty SAS ports...

In this scenario, which tool would you use to accomplish this task remotely?

- A. Active IQ Web site
- B. Hardware Universe
- C. ONTAP System Manager
- D. Interoperability Matrix Tool

Answer: D (LEAVE A REPLY)

NEW QUESTION: 18

You have created a new FlexCache cache volume and want to warm the cache before clients access the cache volume for the first time. In this scenario, how would you accomplish this task?

- A. Prepopulate the cache volume with data from the origin volume using the flexcache prepopulate start command.
- B. Enable block-level Invalidation using the volume flexcache origin config modify command.
- C. Copy the data from the origin volume to the cache volume with the NetApp XCP Migration Tool.
- D. Synchronize the origin and cache first with the volume flexcache sync-properties command.

Answer: A (LEAVE A REPLY)

<https://docs.netapp.com/ontap-9/index.jsp?topic=%2Fcom.netapp.doc.pow-fc-mgmt%2FGUID-E878AB6F-2A64-4E66-B865-6C11A0962AA9.html>

NEW QUESTION: 19

Your company is merging with another company. You are asked to setup your AFFA 400 cluster to support two networks that have the same overlapping 192.168.1.0/ 24 subnet.

In this scenario, what must you create, to enable the same subnet with overlapping IPs on the same cluster?

- A. subnet
- B. failover group
- C. IPspace
- D. broadcast domain

Answer: C (LEAVE A REPLY)

NEW QUESTION: 20

Which statement Is correct about Temperature Sensitive Storage Efficiency (TSSE)?

- A. TSSE operations on ONTAP Select are automatically throttled depending on whether data is hot or cold.
- B. TSSE operations on Cloud Volumes ONTAP are automatically throttled depending on whether data is hot or cold.
- C. TSSE operations on a AFF array are automatically throttled depending on whether data Is hot or cold.
- D. TSSE Is enabled automatically on newly created thick provisioned volumes.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 21

After creating several volumes, you notice that the hosting aggregates Immediately show a decrease In available space. Which volume setting would prevent this outcome?

- A. space SLO set to "semi-thick"
- B. space guarantee set to "volume"
- C. space SLO set to "thick"
- D. space guarantee set to "none"

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 22

Exhibit.

Op	Size	Total	Files	Latency (ms)			Throughput
				min	max	avg	
PUT	4MB	50000	0	23	10500	719	277.3MB
GET	4KB	5000000	0	4	9591	38	48.46MB
GET	8KB	5000000	9	5	10021	37	123.3MB
GET	32KB	5000000	0	7	7889	60	475.3MB
GET	256KB	2125276	0	21	7838	450	530.7MB

You have a NetApp AFF A400 HA pair with Fabric Pool enabled on all data using the snapshot-only policy. Users are reporting slow restores when they recover files with the Windows Previous Versions tab.

Referring to the exhibit, what is the highest latency seen on restore?

- A. 7889
- B. 10021
- C. 10500
- D. 9591

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 23

You want to create a new SVM for serving NFS data using the Storage Virtual Machine (SVM) Setup wizard.

In this scenario, which object is created automatically during the setup process?

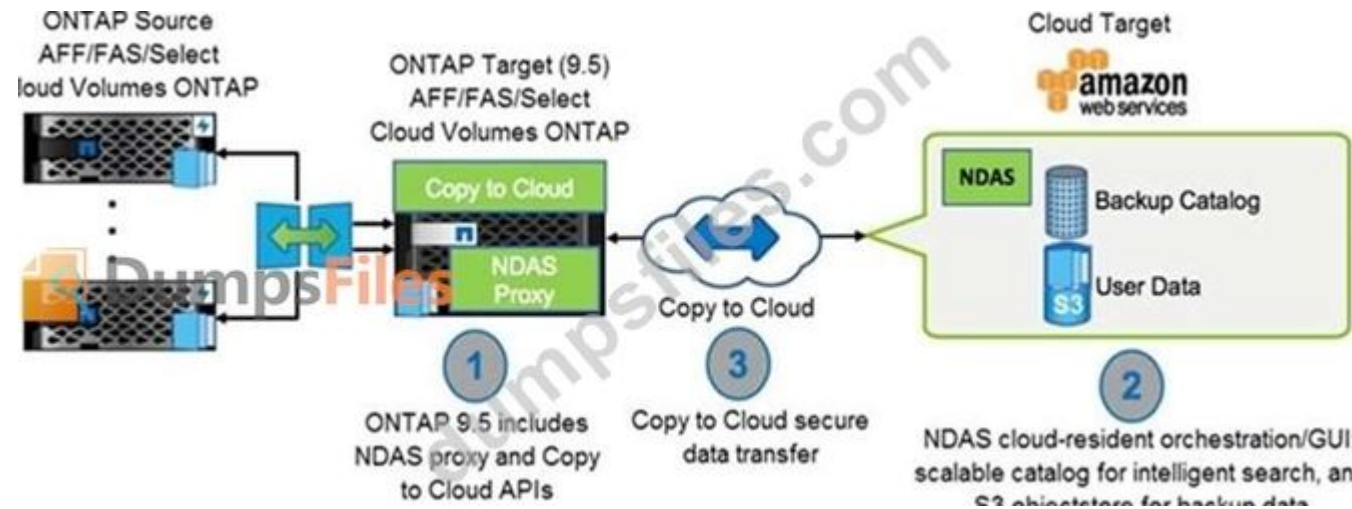

- A. an export policy named after the SVM with the suffix_nfs_exp1
- B. ai data LIF named after the SVM with the suffix_nfs_lif

- C. a data volume named after the SVM with the suffix_nfs_vol1
- D. a data aggregate named after the SVM with the suffix_nfs_aggr1

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 24

Click the Exhibit button.

Referring to the exhibit, which LIF role is required to copy to cloud with this NetApp Data Availability Services (NDAS) solution?

- A. inter cluster
- B. cluster
- C. node management
- D. data

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 25

You have an Internet of Things (IoT) application that will use SMB shares on a remote ONTAP Select Instance. There are no name services and only a local network is available at the remote IoT site.

In this scenario, which two features are supported by ONTAP software for the IoT application? (Choose two.)

- A. SMB3 Witness protocol
- B. Active Directory users
- C. SMB Server in workgroup mode
- D. CIFS local users

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 26

You want to enable the Internal ONTAP engine that quickly identifies the file and directory differences between two Snapshot copies. In this scenario, which feature would accomplish this task?

- A. SnapCenter
- B. SnapVault
- C. SnapDiff
- D. SnapLock

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 27

Exhibit.

Miss-----

You have an ONTAP 9.8 cluster. After network maintenance, the LIF that is shown in the exhibit is not always on a correct port and is unreachable by users until the LIFs are moved to port eOc or eOd on either storage node.

In this scenario, which action should you take to ensure that the LIF only fails over to the correct ports?

- A. Create a DNS load balancing zone.
- B. Split the broadcast domain.
- C. Change the LIFs failover policy to sfo-partner-only.
- D. Create an IPspace.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 28

What are three supported fabric-attached Metro Cluster solutions? (Choose three.)

- A. an eight-node solution
- B. a two-node direct-attached solution
- C. a two-node bridge-attached solution
- D. a four-node solution
- E. a two-node solution

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 29

You want to add SSDs to existing HDD aggregates.

Which NetApp tool helps you to validate how many SSDs would Improve performance?

- A. OnCommand Workflow Automation
- B. Active IQ Unified Manager
- C. ONTAP System Manager
- D. Automated Workload Analyzer

Answer: ([SHOW ANSWER](#))

https://docs.netapp.com/ontap-9/index.jsp?topic=%2Fcom.netapp.doc.dot-cm-cmpr-940%2Fstorage__automated-working-set-analyzer__start.html

NEW QUESTION: 30

A node fails on an HA configuration. A successful failover occurs, but your clients that are using the SMB protocol complain that they are not able to access their data.

In this scenario, what caused the problem?

- A. One of the cluster Interconnect ports on the surviving node failed.
- B. The quota for the qtree has been reached.
- C. The disk ownership did not transfer correctly.
- D. The surviving node is not licensed for CIFS.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 31

Click the Exhibit button.

Your manager asks you to create a new FlexVol on an aggregate called AGGR_2. When you click "Create new FlexVol," you are unable to select AGGR_2 to create the new volume.

Referring to the exhibit, which two SVM settings solve this problem? (Choose two.)

- A. Change the aggregate security style of AGGR_2 to UNIX.
- B. In the resource allocation tab, select the "Do not delegate volume creation" option.
- C. Use the volume move option and reallocate the SVMs root volume to AGGR_2.
- D. In the resource allocation tab, select the "Delegate volume creation" option and select AGGR_2.

Answer: B,D (LEAVE A REPLY)

Valid NS0-162 Dumps shared by TrainingDump.com for Helping Passing NS0-162 Exam! NEW QUESTION: 32

Exhibit.

```
cluster::> network interface show -vserver SVM_A -fields data-protocol
vserver      lif      data-protocol address
-----
SVM_A        lif-SVM-A  nfs,cifs  10.0.1.250

cluster::> volume show -fields vsERVER,volume,aggregate,policy,junction-path -vserver SVM_A
vsERVER volume      aggregate policy      junction-path
-----
SVM_A    SVM_A_root aggr1      policy-vol_a /
SVM_A    VOL_A      aggr2      policy-vol_a -
2 entries were displayed.

cluster::> export-policy rule show -vserver SVM_A -policyname policy-vol_a
Vserver      Policy      Rule      Access      Client      RO
Vserver      Name      Index      Protocol Match
-----
SVM_A        policy-vol_a  1      any      10.0.1.0/24      any
```

A Linux host with the 10.0.1.24 IP address is unable to mount the VOL_A volume using NFSv3.

Referring to the exhibit, what is the problem?

- A. The host IP address does not match the export policy rule.
- B. The volume is not mounted in the namespace.
- C. The logical interface does not allow the NFSv3 protocol.
- D. The volume is in read-only.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 33

Click the Exhibit button.

The volumes shown in the exhibit, vol1 and vol2, are in the same AFF aggregate. You write the same large 100 GB file to both vol1 and vol2.

Based on the volume efficiency settings, which action occurs?

- A. The files are deduplicated at the volume level.
- B. The files are queued for a background deduplication schedule.

- C. The files are deduplicated at the aggregate level.
- D. The files are deduplicated at the SVM level by SVM1.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 34

Which two statements are true about NVMe? (Choose two.)

- A. Namespaces are mapped to subsystems.
- B. NQNs are added to subsystems.
- C. NQNs are added to namespaces.
- D. LUNs are mapped to Initiator groups.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 35

You attempt to create an SVM for CIFS access only.

In this scenario, which three actions must be performed to Join the existing Active Directory? (Choose three.)

- A. Create a cluster LIF.
- B. Create DNS entries.
- C. Create a data LIF.
- D. Create export policies.
- E. Create NTP entries.

Answer: B,C,E ([LEAVE A REPLY](#))

Before creating an SMB server in an Active Domain controller, you must ensure that the cluster time and the time on the domain controllers of the domain to which the SMB server will belong matches to within five minutes. <https://docs.netapp.com/ontap-9/index.jsp?topic=%2Fcom.netapp.doc.pow-cifs-cg%2FGUID-5AE3CADE-5EF1-403B-A664-2DEA9F13B0C8.html>

NEW QUESTION: 36

You have created a new FlexCache cache volume and want to warm the cache before clients access the cache volume for the first time. In this scenario, how would you accomplish this task?

- A. Synchronize the origin and cache first with the volume flexcache sync-properties command.
- B. Prepopulate the cache volume with data from the origin volume using the flexcache prepopulate start command.
- C. Copy the data from the origin volume to the cache volume with the NetApp XCP Migration Tool.
- D. Enable block-level Invalidation using the volume flexcache origin config modify command.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 37

You have commissioned a new AFF A250 MetroCluster over IP configuration. Your company requires an automatic switchover to the surviving site In case of a site disaster.

What do you need to configure to fulfill this requirement?

- A. cluster failover
- B. ONTAP Mediator service
- C. storage failover
- D. automated unplanned switchover

Answer: B ([LEAVE A REPLY](#))

Reference:

Starting with ONTAP 9.7, the ONTAP Mediator service can assist the MetroCluster IP configuration in performing an automatic unplanned switchover by providing a physically separate repository for status information.

NEW QUESTION: 38

Which two components are required for committing data to a WORM volume? (Choose two.)

- A. You must create a SnapLock SVM.
- B. You must create a SnapLock Aggregate.
- C. You must license SnapLock.
- D. You must create a SnapLock volume.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 39

Which two storage efficiency features are enabled by default on AFF systems? (Choose two.)

- A. volume-level Inline deduplication
- B. aggregate-level inline deduplication
- C. LUN-level compression
- D. aggregate-level compression

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 40

Your company requests that the monthly performance data of your ONTAP 9.8 cluster be exported to a CSV file for further processing. In this scenario, which three NetApp products satisfy this requirement? (Choose three.)

- A. Active IQ OneCollect
- B. ONTAP System Manager
- C. Active IQ Unified Manager
- D. Active IQ Config Advisor
- E. Cloud Insights

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 41

Auditing has been enabled and configured on your ONTAP storage system. You have also created audit policies to monitor files and folders. Auditing has been running for over six months. You want to ensure that there have been no improper file access attempts.

How would you accomplish this task?

- A. Import EVT files into Microsoft SQL.
- B. Use Microsoft System Center to read EVT files.
- C. Use the Active IQ Web site to read EVT files.
- D. Import EVT files into Microsoft Event Viewer.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 42

What are the two capabilities of an SVM administrator? (Choose two.)

- A. to delegate an aggregate to the SVM
- B. to delete snapshot copies
- C. to create new users
- D. to create LUNs

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 43

Click the Exhibit button.
You have a mission-critical SQL application that uses a single SMB 3.1.1 share to host its database.
The storage node that is hosting the SMB share sql01_ ca for the SQL database experiences a hardware failure and fails over to the surviving node.
Referring to the exhibit, what is the state of the SMB share for the SQL database during the failover?

- A. The SMB share will be unavailable until node failback.
- B. The SMB share will be available, and all data is accessible.
- C. The SMB share is unavailable due to its stateful nature.
- D. The SMB share will be available, but all data is corrupted.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 44

You are performing an ONTAP upgrade with an intercluster data protection SnapMirror relationship in this scenario, which two steps must be performed before an NDU? (Choose two.)

- A. SnapMirror operations must be broken.
- B. SnapMirror operations must be suspended.
- C. The destination cluster must be upgraded first.
- D. The source cluster must be upgraded first.

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 45

Exhibit.

Cluster1::> ngsnp show

Node	Port	Distribution	Active
	IfGrp	Function	Ports
Node1	a0a	ip	02:a0:98:f1:2e:be partial e0c, e0d
Node2	ala	ip	02:a0:98:f1:21:88 full e0c, e0d

2 entries were displayed.

Cluster1::> network port show -node Node1 -port e0c,e0d -fields mac,health-status

node	port	mac	health-status
Node1	e0c	00:a0:98:f1:2e:b2	degraded
Node1	e0d	00:a0:98:f1:2e:b3	healthy

You have received an alert from Active IQ Unified Manager that interface eOc has gone offline. Network engineering asks for the corresponding MAC address for the port that has a problem.
Referring to the exhibit, which MAC address would you supply to the engineering team?

- A. 02:a0:98:f1:2e:be
- B. 00:a0:98:f1:2e:b2
- C. 00:a0:98:f1:2e:b3

D. 02:a0:98:fl:21:88

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 46

After deploying an AFF A400, you want to deploy a storage virtual machine (SVM) to serve SMB dat

a. Which three conditions must exist in this scenario? (Choose three.)

A. You must have a non-root aggregate in the online state.

B. You must have sufficient space for the root volume.

C. You must have encryption enabled on the root volume.

D. You must have configured the export policies.

E. You must synchronize the cluster time.

Answer: B,D,E ([LEAVE A REPLY](#))

CLUSTER-01::> igroup show
Vserver  Igroup    Protocol OS Type  Initiators
-----
svm500   ESX       iscsi   vmware   -

```

You create a storage virtual machine (SVM) called SVM500 that is provisioned for iSCSI. After creating a LUN in the SVM and mapping it to an igroup, the attached VMware hosts are unable to mount the LUN.

Referring to the exhibit, what is the issue?

- A. The igroup does not contain the appropriate initiators.
- B. The igroup contains multiple Initiators.
- C. The initiator is a member of igroups of different OS types.
- D. The igroup contains the wrong protocol.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 48

Exhibit

The screenshot displays the ONTAP System Manager interface. It is divided into three main sections: IPspaces, Broadcast Domains, and Network Interfaces.

IPspaces: A table with two columns: Cluster and Broadcast Domains. It shows a 'Default' IPspace associated with 'svm1_cluster1' and 'svm2_cluster1'.

Broadcast Domains: A table with columns for Broadcast Domain, MTU, and IPspace. It lists 'cluster1-01' and 'cluster1-02' with their respective MTUs and IPspaces.

Network Interfaces: A table with columns: Name, Status, Storage VM, IPspace, Address, Current Node, Current P..., and Protocols. It lists several network interfaces, including 'if_svm1_cluster1_881', 'cluster_mgmt', 'if_svm2_cluster1_4', and 'if_svm2_cluster1_378'.

You have Installed a new ONTAP 9.8 cluster and want to move the e0e and e0c ports into a new broadcast domain. Referring to the exhibit, which action satisfies this requirement?

- A. Use the broadcast-domain split command.
- B. Use ONTAP System Manager to create a new broadcast domain.
- C. Use the broadcast-domain= merge command.
- D. Use the irrDadcast-domain create command

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 49

Which two statements are true about NVMe? (Choose two.)

- A. NQNs are added to namespaces.
- B. LUNs are mapped to Initiator groups.
- C. NQNs are added to subsystems.
- D. Namespaces are mapped to subsystems.

Answer: C,D ([LEAVE A REPLY](#))

Reference:

Add the host NQN to the subsystem: `vserver nvme subsystem host add -vserver SVM_name -subsystem Subsystem_name -host-nqn Host_NQN:subsystem.Subsystem_name` Map the namespace to the subsystem: `vserver nvme subsystem map add -vserver SVM_name -subsystem subsystem_name -path path`

NEW QUESTION: 50

You want to monitor system performance in real time.

In this scenario, which two tools would you use to accomplish this task? (Choose two.)

- A. ONTAP CLI
- B. Active IQ Digital Advisor
- C. ONTAP System Manager
- D. Active IQ Unified Manager

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 51

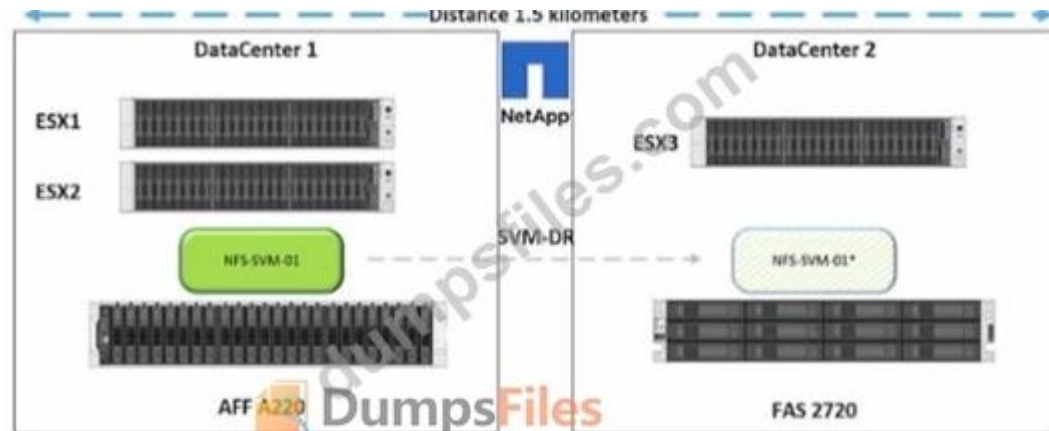

What establishes a quorum in a 4-node cluster?

- A. cluster peer
- B. TieBreaker
- C. epsilon
- D. ONTAP Mediator

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 52

Exhibit.

You have an SVM-DR relationship as shown in the exhibit. You are given a new requirement to use SnapMirror Synchronous (SMS) for the data volumes in NFS-SVM-01. In this scenario, which solution is supported to enable SMS in ONTAP 9.8 software?

- A. Modify the existing SVM-DR policy to use sync mode.
- B. Set up NetApp Cloud Sync with a cloud broker in AWS to replicate to a new destination.
- C. Set up new SM-S relationships from the FAS2720 to a new destination.
- D. Set up new SM-S relationships from the AFF A220 to a new destination.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 53

Click the Exhibit button.

The exhibit shows a Windows 2019 server with two FC HBAs using ALUA.

How many paths to LUN1 are active/optimized?

- A. 1
- B. 2
- C. 4
- D. 8

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 54

You want to configure Active Directory domain controller access for NetApp ONTAP cluster administration. In this scenario, which two actions would accomplish this task? (Choose two.)

- A. Configure an authentication tunnel through an admin SVM.

B. Use the vservar active-directory create command to create a computer account on the domain for a non-CIFS SVM.

C. Use the vservar active-directory create command to create a computer account on the domain for a CIFS SVM.

D. Configure an authentication tunnel through an existing CIFS SVM.

Answer: B,D ([LEAVE A REPLY](#))

<https://docs.netapp.com/ontap-9/index.jsp?topic=%2Fcom.netapp.doc.pov-adm-auth-rbac%2FGUID-BC7B1934-DDE6-4AFB-A319-6C85D1ADACB6.html>

Configuring an authentication tunnel

If you have already configured a CIFS server for a data SVM, you can use the security login domain-tunnel create command to configure the SVM as a gateway, or tunnel, for AD access to the cluster.

Creating an SVM computer account on the domain

If you have not configured a CIFS server for a data SVM, you can use the vservar active-directory create command to create a computer account for the SVM on the domain.

NEW QUESTION: 55

When you create a qtree, which security style is applied by default?

A. UNIX

B. NTFS

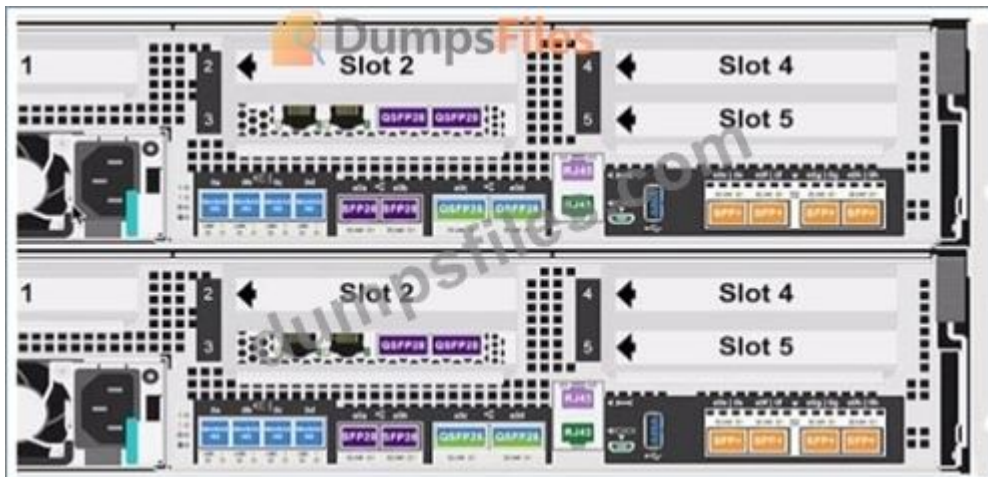

C. the security style of the parent volume

D. the security style of the SVM root volume

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 56

Exhibit.

You are adding a NetApp AFF A400 system to an existing 4-node cluster and want to know which ports you would use to expand your cluster.

Referring to the exhibit, which tool would you use to accomplish this task?

A. NetApp Hardware Universe (HWU)

B. Active IQ Unified Manager

C. NetApp Interoperability Matrix (IMT)

D. Active IQ Conflg Advisor

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 57

Which security method would be used to authenticate targets and Initiators In an iSCSI environment?

- A. LDAP
- B. /etc/hosts
- C. CHAP
- D. NIS

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 58

When you set up an ONTAP cluster, which two SVM types are automatically created? (Choose two.)

- A. cluster
- B. node
- C. data
- D. admin

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 59

Click the Exhibit button.

You are planning to present storage to your servers from your AFF system using the FC protocol. You have a pair of Fc switches to ensure connectivity and you have decided to use WWPN zoning.

Referring to the exhibit, which two WWPNs do you use for your configuration? (Choose two.)

- A. fc-2 WWPN
- B. 0c WWPN
- C. 0d WWPN
- D. fc-1 WWPN

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 60

You are using NetApp Volume Encryption (NVE) on an AFF system.

In this scenario, which two key-management solutions are supported for NVE? (Choose two.)

- A. an SSH key manager
- B. a KMIP server
- C. the onboard key management service
- D. an XTS-AES-256 key manager

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 61

Click the Exhibit button.

You have a 2-node cluster cabled as shown in the exhibit. You want to convert the cluster to a switched cluster.

Which two statements are true in this scenario? (Choose two.)

- A. After the conversion, traffic to the intercluster LIFs will flow through the cluster switch.
- B. The conversion is non-disruptive.
- C. The conversion is disruptive.

D. After the conversion, traffic to the cluster LIFs will flow through the cluster switch.

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 62

You want to configure Active Directory domain controller access for NetApp ONTAP cluster administration.

In this scenario, which two actions would accomplish this task? (Choose two.)

- A. Configure an authentication tunnel through an existing CIFS SVM.
- B. Use the vserver active-directory create command to create a computer account on the domain for a CIFS SVM.
- C. Use the vservar active-directory create command to create a computer account on the domain for a non-CIFS SVM.
- D. Configure an authentication tunnel through an admin SVM.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 63

You have a remote FlexCache storage device that is running on ONTAP Select 9.8 software. The cache origin volume is on an FAS8700 that is running ONTAP 9.8 software. The WAN connection dropped, and the FlexCache volume is in disconnected mode.

In this scenario, which LIFs would you ping to troubleshoot the disconnect?

- A. management
- B. Intercluster
- C. data
- D. cluster

Answer: D ([LEAVE A REPLY](#))

https://docs.netapp.com/ontap-9/topic/com.netapp.doc.pow-fc-mgmt/GUID-AE9CC59E-BE3B-4185-B018-E3F089CB53B0.html?cp=17_0_2

NEW QUESTION: 64

Click the Exhibit button.

The exhibit displays the values for the default adaptive QoS policy. An administrator assigns the Value policy to a 1TB volume. Over time, the volume expands to 3TB.

What is the peak IOPS for the volume, both before and after the expansion?

- A. 75 IOPS and 512 IOPS
- B. 512 IOPS and 1536 IOPS
- C. 512 IOPS and 12288 IOPS
- D. 512 IOPS and 512 IOPS

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 65

Exhibit.

```
Cluster1::> network interface show
```

Vserver	Logical Interface	Status Admin/Oper	Network Address/Mask	Current Node	Current Port	Is Home
Cluster	Cluster1_Node1_Clus1	up/up	169.254.170.170/16	Cluster1_Node1_Clus1	e0a	false
	Cluster1_Node1_Clus2	up/up	169.254.69.110/16	Cluster1_Node1_Clus2	e0b	false
	Cluster1_Node2_Clus1	up/up	169.254.64.19/16	Cluster1_Node2_Clus1	e0a	false
	Cluster1_Node2_Clus2	up/up	169.254.238.93/16	Cluster1_Node2_Clus2	e0b	false

After an ONTAP upgrade, you notice that several cluster LIFs are not on their home ports as shown in the exhibit.

Which LIF option would change this outcome?

- A. the auto-revert option
- B. the data-protocol option
- C. the subnet-name option
- D. the failover-policy option

Answer: (SHOW ANSWER)

NEW QUESTION: 66

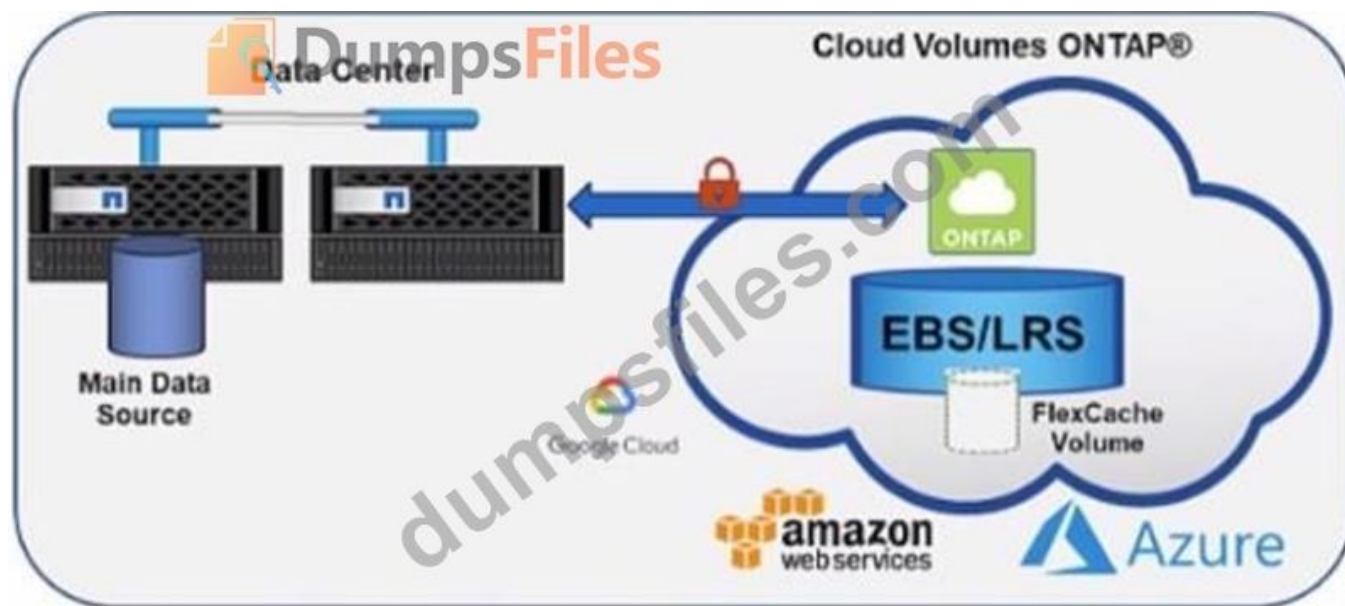

Which two SVM types does a cluster contain after cluster creation? (Choose two.)

- A. dp-destination
- B. data
- C. admin
- D. peer

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 67

Exhibit.

You are caching on-premises ONTAP volumes into the cloud with Cloud Volumes ONTAP as shown in the exhibit. In this scenario, which two protocols are supported? (Choose two.)

- A. NFS
- B. SMB
- C. iSCSI
- D. NVMe

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 68

A user wants existing data in a FlexVol created in ONTAP 9.1 to be placed into a FlexGroup volume with ONTAP 9.8. In this scenario, which two statements are true? (Choose two.)

- A. You can convert the FlexVol volume to a FlexGroup volume.
- B. Use XCP to copy data from a FlexVol to a FlexGroup.
- C. A FlexVol to FlexGroup conversion is not supported.
- D. Use SnapMirror to replicate data from FlexVol to FlexGroup.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 69

You want to configure Active Directory domain controller access for NetApp ONTAP cluster administration. In this scenario, which two actions would accomplish this task? (Choose two.)

- A. Configure an authentication tunnel through an existing CIFS SVM.
- B. Use the vservers active-directory create command to create a computer account on the domain for a CIFS SVM.
- C. Use the vservers active-directory create command to create a computer account on the domain for a non-CIFS SVM.
- D. Configure an authentication tunnel through an admin SVM.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 70

Which two storage efficiencies are enabled by default on NetApp AFF systems? (Choose two.)

- A. postprocess zero block detection
- B. Inline compression

- C. postprocess compaction
- D. Inline deduplication

Answer: (SHOW ANSWER)

NEW QUESTION: 71

You are asked to deploy a 2-node ONTAP Select cluster. The physical hardware is located in two different locations and you want the aggregates mirrored synchronously between the two data centers. You must ensure high availability and automated switchover. In this scenario, which two steps would you take to fulfill this requirement? (Choose two.)

- A. Ensure that the ONTAP Select Deploy VM resides at a third location other than the two data centers.
- B. Install the SnapMirror Sync license on the cluster.
- C. Use ONTAP Mediator service to make sure that you have a quorum for the two nodes.
- D. Use ONTAP Select Deploy to install the nodes on the physical hardware.

Answer: (SHOW ANSWER)

https://docs.netapp.com/us-en/ontap-select/reference_plan_ots_two_node.html

When a cluster consists of two nodes, it is not possible to achieve the quorum required when a node fails or loses communication. To resolve these types of split-brain situations, every instance of the ONTAP Select Deploy utility includes a mediator service. If you have one or more active two-node clusters, the ONTAP Select Deploy virtual machine administering the clusters must be running at all times.

NEW QUESTION: 72

Exhibit.

Network Interfaces						
+ Create / Edit / Delete / Status / Migrate / Send to Home / Refresh						
Interface Name	Storage Virtual Machine (SVM)	IP Address/WWPN	Current P...	Home Port	Data Protocol Access	
epic_2_n1_2a	epic_2	20:2b:00:a0:98:e2:27:ce	A800_1:2a	Yes	fc_nvme

A800_2_fc_if_1	storage_eff	20:15:00:a0:98:e2:27:ce	A800_2:2c	Yes	fcp	

Referring to the exhibit, what would cause a customer to have an issue with SVM epic_fcp when mapping a namespace to a host?

- A. FC switch zoning has not been done correctly.
- B. NVMe is not licensed on the cluster.
- C. FC has not been licensed on the cluster.
- D. NVMe is not configured for the SVM.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 73

You have commissioned a new AFF A250 MetroCluster over IP configuration. Your company requires an automatic switchover to the surviving site in case of a site disaster. What do you need to configure to fulfill this requirement?

- A. storage failover
- B. cluster failover
- C. ONTAP Mediator service
- D. automated unplanned switchover

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 74

Click the Exhibit button.

You have an AFF A400 HA pair serving SMB locally and a FAS8300 HA pair serving SMB over FlexCache. Both clusters are running ONTAP 9.8 software. In this scenario, which two protocol features are supported at the remote cache? (Choose two.)

- A. multiprotocol NFSv3
- B. SMB3 continuously available (CA) shares
- C. multiprotocol NFSv4.1
- D. file locking

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 75

Which two types of capacity tiers are supported with FabricPool aggregates in ONTAP 9.8? (Choose two.)

- A. NFS Export
- B. StorageGRID Object Storage
- C. SWIFT Object Store
- D. S3 Object Store

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 76

A volume is set to use Adaptive QoS with the default policy.

In this scenario, which change would affect the QoS throughput ceiling?

- A. The volume is resized.
- B. Data is added to the volume.
- C. More clients access the volume.
- D. Disks are added to the volume's aggregate.

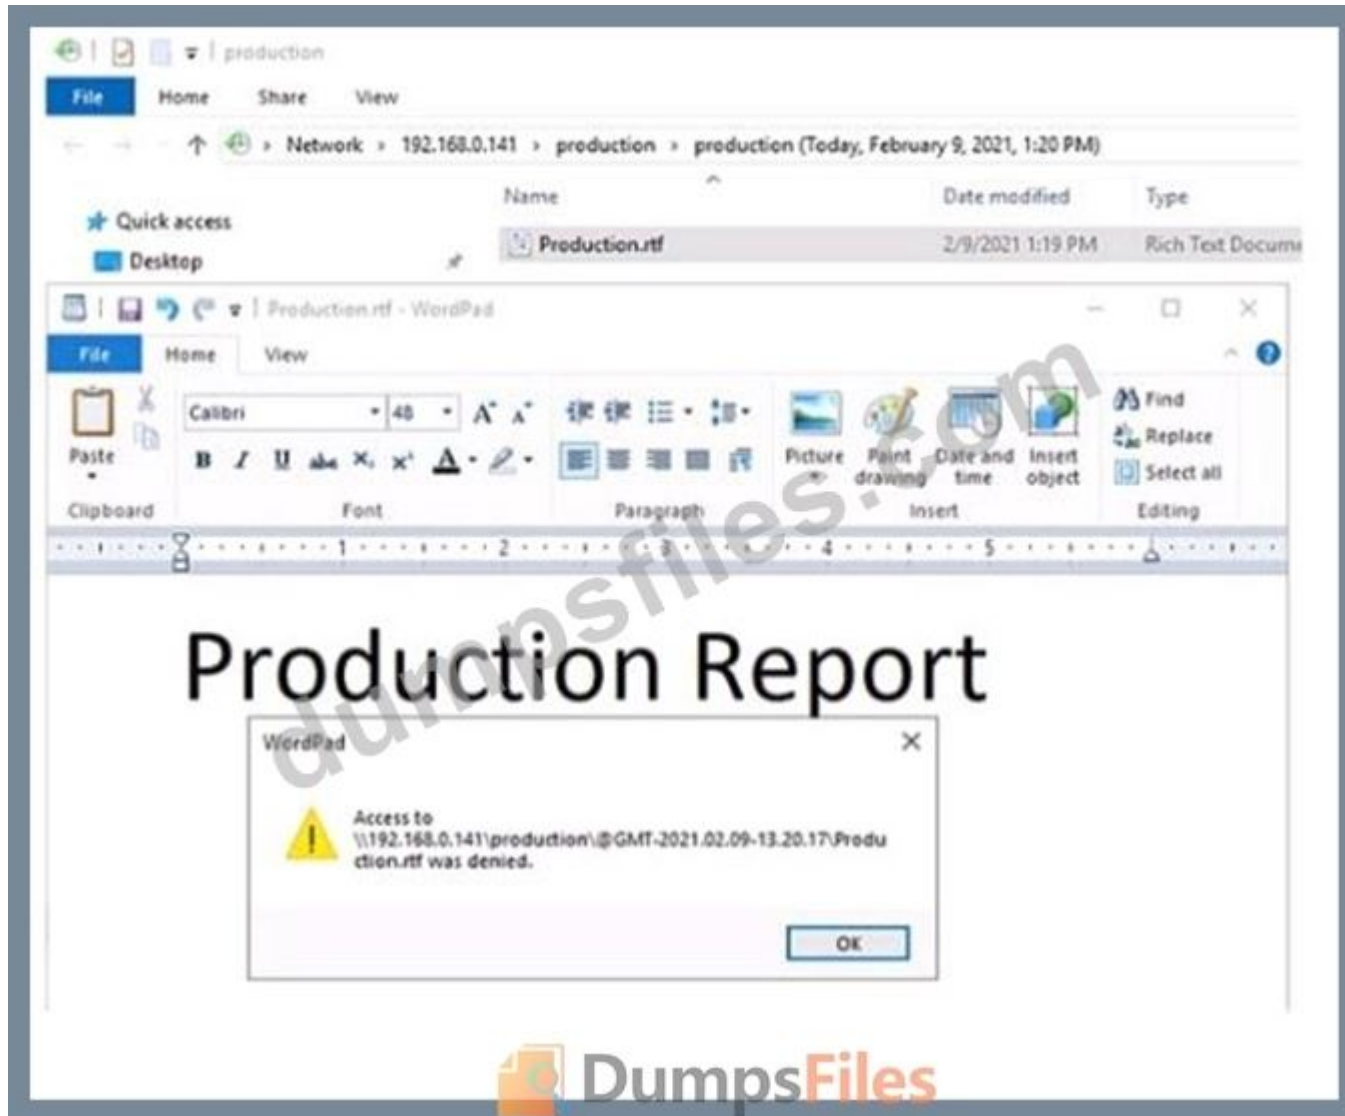

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 77

Exhibit.

A user cannot save a file on an ONTAP SMB share.

Referring to the exhibit, which action allows the user to save the file?

- A. Synchronize the ONTAP Cluster time to the Active Directory time.
- B. Allow the file type *, rtf in the CIFS Server fpolicy.
- C. Let the user save the file to a writeable location.
- D. Set the user permission for the share to write.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 78

You have a 50 TO FlexGroup volume that is serving NFSv3 on a FAS8300 HA pair that is running ONTAP 9.8 software of files. A Linux du command runs for days to count files.

In this scenario, which native ONTAP feature will report real-time file counts?

- A. File System Analytics
- B. Logical Space Reporting
- C. Quality of Service
- D. volume autosize

Answer: (SHOW ANSWER)

NEW QUESTION: 79

You are planning an installation of a new stack of shelves to an HA pair and need to locate empty SAS ports...
In this scenario, which tool would you use to accomplish this task remotely?

- A. ONTAP System Manager
- B. Active IQ Web site
- C. Hardware Universe
- D. Interoperability Matrix Tool

Answer: A (LEAVE A REPLY)

ONTAP System Manager is a web-based tool that is accessible from any web browser and can be used to manage and monitor the ONTAP system remotely. It has the ability to discover, inventory, and manage all connected equipment, including empty SAS ports. With the System Manager, you can view the available SAS ports and configure them accordingly.

NEW QUESTION: 80

You have an AFF A400 ONTAP cluster provisioned at both your production and disaster recovery sites. You want to manage and receive scheduled health reports.
Which two tools would help you to accomplish this task? (Choose two.)

- A. ONTAP System Manager
- B. Active IQ Unified Manger
- C. Active IQ Config Advisor
- D. Cloud Insights

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 81

Exhibit.

```
cluster::> network interface show -vservers SVM_A -fields data-protocol
vservers  lif  data-protocol address
-----
SVM_A    lif-SVM-A  nfs,cifs  10.0.1.250

cluster::> volume show -fields vservers,volume,aggregate,policy,junction-path -vservers SVM_A
vservers volume  aggregate policy  junction-path
-----
SVM_A    SVM_A_root aggr1  policy-vol_a /
SVM_A    VOL_A     aggr2  policy-vol_a -
2 entries were displayed.

cluster::> export-policy rule show -vservers SVM_A -policyname policy-vol_a
Policy      Rule  Access  Client  RO
Vserver    Name  Index  Protocol Match  Rule
-----
SVM_A     policy-vol_a  1  any  10.0.1.0/24  any
```

A Linux host with the 10.0.1.24 IP address is unable to mount the VOL_A volume using NFSv3.
Referring to the exhibit, what is the problem?

- A. The host IP address does not match the export policy rule.
- B. The volume is in read-only.

- C. The volume is not mounted In the namespace.
- D. The logical Interface does not allow the NFSv3 protocol.

Answer: C (LEAVE A REPLY)

The volume is not mounted in the namespace. <https://docs.netapp.com/ontap-9/index.jsp?topic=%2Fcom.netapp.doc.cdottamg-nfs%2FGUID-8E400D78-B405-4682-8F33-143783F2D580.html>
Even if the volume was read only it could be mounted - also the client IP is in the desired range and LIF is configured for NFS.

NEW QUESTION: 82

You have an ESXi cluster with VMware VMFS LUNs on an AFF A400 system. After troubleshooting performance Issues, you determine that timeout best practices are not set on the hosts.
In this scenario, which NetApp tool would apply the best practice settings?

- A. SnapCenter Plug-in for VMware vSphere
- B. SAN Host Utilities
- C. Virtual Storage Console (VSC)
- D. SnapManager

Answer: (SHOW ANSWER)

Reference:
Virtual Storage Console for VMware vSphere checks and sets the ESXi host multipathing settings and HBA timeout settings that work best with NetApp storage systems.

NEW QUESTION: 83

You are asked to create a data LIF to allow object storage access to a bucket that is hosted in ON TAP software. In this scenario, which service is required for the LIFs service data policy?

- A. management-HTTPS
- B. data-S3-server
- C. management-BGP
- D. cluster-core

Answer: B (LEAVE A REPLY)

In this scenario, the data LIFs must be configured with a service data policy that includes the S3 server protocol in order to allow object storage access.

NEW QUESTION: 84

Exhibit

```
cluster::> volume show -vserver SVM_A
Vserver  Volume  Aggregate  State  Type  Size  Available  Used%
-----
SVM_A    SVM_A_root  aggr1      online  RW    1GB    970.7MB    0%
SVM_A    VOL_A      aggr1      online  RW    100GB   95.00GB    0%
2 entries were displayed.

cluster::> qos adaptive-policy-group show -policygroup apg-VOL-A
Name: apg-VOL-A
Vserver: SVM_A
Uuid: 402a3ae5-8ba3-11eb-ba3a-00a0988887c0
ID: 13773
Expected IOPS: 1000IOPS/TB
Peak IOPS: 2000IOPS/TB
Absolute Minimum IOPS: 500IOPS
Expected IOPS Allocation: allocated-space
Peak IOPS Allocation: used-space
Block Size: ANY
Number of Workloads: 1
```

Referring to the exhibit, what is the maximum possible IOPS for the VOL_A volume?

- A. 1000 IOPS
- B. 2000 IOPS
- C. 100 IOPS
- D. 500 IOPS

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 85

All SMB users are reporting that their network share performance is slow on a new NetApp FAS500f HA pair. You determine that the users have converged network adapters (CNAs) with flow control enabled and no option to disable.

In this scenario, which two flow control settings are recommended on the NetApp ONTAP physical ports? (Choose two.)

- A. Disable flow control end-to-end on data network ports.
- B. Enable flow control end-to-end on cluster network ports.
- C. Enable flow control end-to-end on data network ports.
- D. Disable flow control end-to-end on cluster network ports.

Answer: C,D ([LEAVE A REPLY](#))

https://kb.netapp.com/Advice_and_Troubleshooting/Data_Storage_Software/ONTAP_OS/What_are_the_flow_control_best_practices_for_Ethernet

%3F#Clustered_Data_ONTAP_2F_ONTAP_9_Flow_control_recommendations:

Disable flow control on cluster network ports in the Data ONTAP cluster. Flowcontrol on the remaining network ports (the ports that provide data, management, and intercluster connectivity) should be configured to match the settings within the rest of your environment.

NEW QUESTION: 86

Exhibit.

```
cluster1::> volume show -vservers svm2_cluster1 -volume data -fields space-guarantee,fractional-reserve,autotier-mode,space-alloc
vservers      volume autotier-mode space-alloc space-guarantee fractional-reserve
-----
svm2_cluster1 data      grow      none      none      0%
```

```
cluster1::> lun show -vservers svm2_cluster1 -volume data -fields space-reserve,space-allocation
vservers      path      space-reserve space-allocation
-----
svm2_cluster1 /vol/data/lun disabled      disabled
```

You have a 2-node NetApp FAS2750 ONTAP cluster. You create a new 20-GB LUN in a new 100-GB volume and write 10 GB of data to the LUN. No storage efficiencies are enabled for the volume or aggregate.

Referring to the exhibit, which two statements are true? (Choose two.)

- A. ONTAP reports the volume as 10% full.
- B. ONTAP reports that the volume is using 10 GB of its containing aggregate.
- C. ONTAP reports the volume as 20% full.
- D. ONTAP reports that the volume is using 100 GB of its containing aggregate.

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 87

You attempt to create an SVM for CIFS access only.

In this scenario, which three actions must be performed to join the existing Active Directory? (Choose three.)

- A. Create export policies.
- B. Create a data LIF.

- C. Create a cluster LIF.
- D. Create NTP entries.
- E. Create DNS entries.

Answer: A,B,E ([LEAVE A REPLY](#))

NEW QUESTION: 88

You are asked to deploy a 2-node ONTAP Select cluster. The physical hardware is located in two different locations and you want the aggregates mirrored synchronously between the two data centers. You must ensure high availability and automated switchover.

In this scenario, which two steps would you take to fulfill this requirement? (Choose two.)

- A. Ensure that the ONTAP Select Deploy VM resides at a third location other than the two data centers.
- B. Use ONTAP Select Deploy to install the nodes on the physical hardware.
- C. Use ONTAP Mediator service to make sure that you have a quorum for the two nodes.
- D. Install the SnapMirror Sync license on the cluster.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 89

You need to configure data-at-rest encryption for your NetApp ONTAP 9.8 cluster. Your company does not have Key Management Interoperability Protocol (KMIP) services available but must require a passphrase to be entered when a node is rebooted.

In this scenario, which two actions should be performed to satisfy these requirements? (Choose two.)

- A. Configure an external key management server.
- B. Enable onboard key management.
- C. Enable cluster-wide FIPS-compliant mode.
- D. Enable common criteria mode.

Answer: ([SHOW ANSWER](#))

Valid NS0-162 Dumps shared by TrainingDump.com for Helping Passing NS0-162 Exam! TrainingDump.com now offer the **newest NS0-162 exam dumps**, the TrainingDump.com NS0-162 exam **questions have been updated** and **answers have been corrected** get the **newest** TrainingDump.com NS0-162 dumps with Test Engine here:
